Nicolaes Witsen and Shipbuilding in the Dutch Golden Age A. J. Hoving, Diederick Wildeman, 2012-03-29 In 1671 Dutch diplomat and scientist Nicolaes Witsen published a book that served among other things as an encyclopedia for the shell first method of ship construction In the centuries since Witsen's rather convoluted text has also become a valuable source for insights into historical shipbuilding methods and philosophies during the Golden Age of Dutch maritime trade However as Andr Wegener Sleeswyk's foreword notes Witsen's work is difficult to access not only for its seventeenth century Dutch language but also for the vagaries of its author's presentation Fortunately for scholars and students of nautical archaeology and shipbuilding this important but chaotic work has now been reorganized and elucidated by A J Hoving and translated into English by Alan Lemmers In *Nicolaes Witsen and Shipbuilding in the Dutch Golden Age* Hoving master model builder for the Rijksmuseum in Amsterdam sorts out the steps in Witsen's method for building a seventeenth century pinas by following them and building a model of the vessel Experimenting with techniques and materials conducting research in other publications of the time and rewriting as needed to clarify and correct some vital omissions in the sequence Hoving makes Witsen's work easier to use and understand *Nicolaes Witsen and Shipbuilding in the Dutch Golden Age* is an indispensable guide to Witsen's work and the world of his topic the almost forgotten basics of a craftsmanship that has been credited with the flourishing of the Dutch Republic in the seventeenth century To view a sample of Ab Hoving's ship model drawings please visit <http://nautarch.tamu.edu/shiplab/AbHoving.htm> **The Ship of the Line** Brian Lavery, 2015-01-14 A beautiful book a goldmine of information to anyone interested in the capital ships of the sailing navy of the 17th and 19th Centuries *Ships in Scale* The National Maritime Museum in Greenwich houses the largest collection of scale ship models in the world many of which are official contemporary artifacts made by the craftsmen of the navy or the shipbuilders themselves and ranging from the mid seventeenth century to the present day As such they represent a three dimensional archive of unique importance and authority Treated as historical evidence they offer more detail than even the best plans and demonstrate exactly what the ships looked like in a way that even the finest marine painter could not achieve *The Ship of the Line* is the second of a new series that takes selections of the best models to tell the story of specific ship types in this case the evolution of the ship of the line the capital ship of its day and the epitome of British seapower during its heyday from 1650 1850 This period also coincided with the golden age of ship modelling Each volume depicts a wide range of models all shown in full color including many close up and detail views These are captioned in depth but many are also annotated to focus attention on interesting or unusual features and the book weaves the pictures into an authoritative text producing a unique form of technical history The series is of particular interest to ship modellers but all those with an enthusiasm for the ship design and development in the sailing era will be attracted to the in depth analysis of these beautifully presented books **The Ships of Abel Tasman** Ab

Hoving, Cor Emke, 2000 Model Shipwright 132 John Bowen, 2005-12-22 This quarterly journal since its launch in 1972 has been regarded as the world's leading ship modelling publication.
