Modeling Marine Systems:

Modeling Marine Systems A. M. Davies, 2018-01-18 This two volume reference presents a series of review and research articles on advances in computing marine physics and remote sensing and addresses their importance to shallow sea modeling. Intended as a tribute to Dr Norman Heaps, topics in the book reflect the range and diversity of his work as well as his influence on international marine science. Topics discussed include numerical techniques, flow in homogenous sea regions, stratified flows, lake regimes, validation of numerical models, remote sensing as a method to collect oceanographic data at the sea surface and bottom boundary modeling. Marine scientists actively involved in mathematical modeling and scientists who are interested in using models as tools to gain more insight and understanding of the processes they are observing will find this text useful.

Marine Systems Identification, Modeling and Control Tony Roskill, Rikard Mikalsen, 2015-04-06 Marine Systems Identification, Modeling and Control is a concise stand alone resource covering the theory and practice of dynamic systems and control for marine engineering students and professionals. Developed from a distance learning CPD course on marine control taught by the authors, the book presents the essentials of the subject including system representation and transfer feedback control and closed loop stability. Simulation code and worked examples are provided for both Scilab and MATLAB making it suitable for both those without access to expensive software and those using MATLAB in a professional setting. This title considers the key topics without superfluous detail and is illustrated with marine industry examples. Concise and practical, covering the relevant theory without excessive detail.

Industry specific examples and applications for marine engineering students and professionals Clearly presents key topics of the subject including system representation and transfer feedback control and closed loop stability making it ideal for self study or reference Simulation code and worked examples using Scilab and MATLAB provided on the book s companion website
