Models And Metaphors Studies In Language And Philosophy:

Models and Metaphors Max Black, 2019-06-30 Although the range is wide philosophy of language logic philosophy of science in this collection of essays there is a certain unity of treatment arising from the author's steady interest in using linguistic analysis to cast some new light on old problems such as the nature of logic causation and induction

Models and Metaphors Max Black, *Models and Metaphors* Franklin K. Moore, 1962 Model and Metaphors, 1981 Rhetorics of Display Lawrence J. Prelli, 2021-12-24 Groundbreaking case studies mapping the rhetoric inherent in acts of presentation and concealment *Rhetorics of Display* is a pathbreaking volume that brings together a distinguished group of scholars to assess an increasingly pervasive form of rhetorical activity Editor Lawrence J Prelli notes in his introduction that twenty first century citizens continually confront displays of information and images from the verbal images of speeches and literature to visual images of film and photography to exhibits in museums to the arrangement of our homes to the merchandising of consumer goods The volume provides an integrated comprehensive study of the processes of selecting what to reveal and what to conceal that together constitute the rhetorics of display Surveying major historical transformations in the relationship between rhetoric and display this book also identifies the leading themes in relevant scholarship of the past three decades Seventeen case studies canvass a representative and diverse range of displays from body piercing to a civil rights memorial to a Titanic exhibition to imagery found in gambling casinos and examine the ways that phenomena persons places events identities communities and cultures are exhibited before audiences Collectively the contributors shed light on rhetorics that are nearly ubiquitous in contemporary communication and culture

Metaphors in Medical Texts Geraldine W. van Rijn-van Tongeren, 1997 This book claims that metaphors must be seen as indispensable cognitive and communicative instruments in medical science Analysis of texts taken from recently published medical handbooks reveals what kind of metaphors are used to structure certain medical concepts and what the functions are of the metaphorical expressions in the texts Special attention is drawn to the idea that scientific facts do not originate from passive observation of reality Imaginative thinking and the use of metaphors are required to make the unknown accessible to us Yet although metaphors are often a sine qua non for the genesis of a scientific fact they may also inhibit the development of alternative views This is due to the fact that metaphors always highlight certain aspects of a phenomenon while other aspects remain obscured Analysis of the metaphors used in medical texts may reveal exactly which aspects are highlighted and which remain hidden and may thus help to find alternative metaphors and possibly therapies when current metaphors are no longer adequate This book should be of interest not only to linguists translators and researchers working in the field of intercultural communication but also to doctors and medical scientists and those interested in the philosophy of science

Mary B. Hesse (1924-2016): Metaphors, Models, and the Growth of Scientific Knowledge Pietro Gori, 2025-08-20 This volume explores the work of Mary B Hesse 1924 2016 a pivotal figure in twentieth century philosophy of science At a time when the

foundations of an integrated approach to the history and philosophy of science were being established Hesse as a female philosopher offered a distinctive and influential contribution grounded in a post empiricist understanding of the natural sciences Central to her thought was a focus on the metaphorical and analogical value of scientific language in contrast to views assessing its literal significance Hesse also departed from traditional hypothetico deductive accounts of scientific methodology and theory structure advancing instead perspectives rooted in both historical and contemporary scientific practices To mark the centenary of her birth this book brings together an international group of scholars to re examine and engage with Hesse s intellectual legacy The chapters address the central themes of her work and situate them within her broader philosophical context Each contribution adopts a cross disciplinary perspective highlighting the continued relevance of Hesse s ideas to current debates in the philosophy of science This volume will be of particular interest to scholars in the history and philosophy of science as well as those engaged in gender studies and the study of women in philosophy

Hofmann, 2009-07-31 Biobanking i.e. storage of biological samples or data emerging from such samples for diagnostic therapeutic or research purposes has been going on for decades However it is only since the mid 1990s that these activities have become the subject of considerable public attention concern and debate This shift in climate is due to several factors The purpose of this book is to investigate some of the ethical legal and social challenges raised by research biobanking in its different modern forms and formats The issues raised by research biobanking in its modern form can be divided into four main clusters how biological materials are entered into the bank research biobanks as institutions under what conditions researchers can access materials in the bank and problems concerning ownership of biological materials and of intellectual property arising from such materials and how the information is collected and stored e.g. access rights disclosure confidentiality data security and data protection *Normative Structures of the Social World*, 2021-11-15 *A Nice*

Derangement of Epistemes John H. Zammito, 2004-02-15 Since the 1950s many philosophers of science have attacked positivism the theory that scientific knowledge is grounded in objective reality Reconstructing the history of these critiques John H. Zammito argues that while so called postpositivist theories of science are very often invoked they actually provide little support for fashionable postmodern approaches to science studies Zammito shows how problems that Quine and Kuhn saw in the philosophy of the natural sciences inspired a turn to the philosophy of language for resolution This linguistic turn led to claims that science needs to be situated in both historical and social contexts but the claims of recent science studies only deepened the philosophical quandary In essence Zammito argues that none of the problems with positivism provides the slightest justification for denigrating empirical inquiry and scientific practice delivering quite a blow to the discipline

postmodern science studies Filling a gap in scholarship to date A Nice Derangement of Epistemes will appeal to historians philosophers philosophers of science and the broader scientific community **The Language Animal** Charles Taylor,2016-03-14 From Sources of the Self to A Secular Age Charles Taylor has shown how we create ways of being as individuals and as a society Here he demonstrates that language is at the center of this generative process Language does not merely describe it constitutes meaning and the shared practice of speech shapes human experience *The Theory of Categorical Conversion* Dompere, Kofi Kissi,2017-09-17 The Theory of Categorical Conversion is advanced by Professor Kofi Kissi Dompere as mathematical philosophical and game theoretic foundations to solve the problem of socio natural transformation as governed by some internal process in relation to Marx Schumpeter and Nkrumah Dompere s methodology is based on the Africentric principles of opposites made up of actual potential polarity negative positive duality with relational continuum and unity under cost benefit rationality and Asantrofi Anoma principle supported by fuzzy paradigm of thought Socio natural transformations are seen in terms of game theories in a fuzzy stochastic space admitting of defective deceptive information structures in quality quantity space within the subjective objective duality The main premise of the monograph is that there exists a set of necessary and sufficient conditions for internal self transformation The necessary conditions are made up of categorial moments and categorial transfer functions forming the domain of control instrumentation in creating the sufficient conditions for categorial conversion processes Dompere presents an important methodological framework for the study and construction of the theories of socioeconomic development and political change as well as info dynamics connecting knowledge sciences innovation and engineering to the space of knowing under qualitative quantitative transformational dynamics with defective deceptive information structures in the games for power and dominance by duals and poles in conflicts The necessary conditions of socio natural transformation are internally derived based on the relational structure of matter energy information activities within the dynamics of qualitative dispositions of dualities of actual potential polarities The theory consists of category formation showing ontological epistemological categories and categorial dynamics shows elemental conversions of categorial varieties in a continuum The logical tools and the paradigm of thought for the theoretical development of Nkrumah s framework involve self excitement self correction and self control systems induced by internal contradictions The set of necessary conditions constitutes the natural necessity that constrains cognitive freedom in socio natural transformations Had this conceptual system been familiar to economists and social scientists the construct of the theories of socioeconomic development and transformations would have been increasingly successful *Entrepreneurial Ecosystems in Cities and Regions* Robert Huggins,Fumi Kitagawa,Daniel Prokop,Christina Theodoraki,Piers Thompson,2024-02-18 The concept of entrepreneurial ecosystems has emerged as a means for theorizing and making policy decisions concerning entrepreneurship and economic development within and across cities and regions Entrepreneurial Ecosystems in Cities and Regions assembles original contributions from scholars across the world to provide an in depth

analysis of a concept that has the capability to capture a dynamic global economy with entrepreneurial innovation at the crux of its future development. It addresses wider issues concerning the evolution of new forms of industrial organisation. The book develops an agenda and understanding that aims to build upon the early explosion of interest within academic policy and practice circles by providing new and important insights that contribute to knowledge, direct future investigations and to increase the effectiveness of research-based policy and practice. **Entrepreneurial Ecosystems in Cities and Regions** builds a framework for establishing a robust and sustainable concept that can help propel an understanding of how cities and regions around the world can use entrepreneurship and innovation as a catalyst for their future economic, social and environmental development. The volume highlights the need to account for urban and regional contextual factors when determining the strength or otherwise of entrepreneurial ecosystems and illustrates that these factors can lead to the development of entrepreneurial activity of quite a different nature across cities and regions.

Semantics in Data and Knowledge Bases Klaus-Dieter Schewe, Bernhard Thalheim, 2013-01-03. This book constitutes the thoroughly refereed post-conference proceedings of the 5th International Workshop on Semantics in Data and Knowledge Bases SDKB 2011 held in July 2011 in Zurich, Switzerland. Handbook of Empirical Literary Studies Donald Kuiken, Arthur M. Jacobs, 2021-09-20. This handbook reviews efforts to increase the use of empirical methods in studies of the aesthetic and social effects of literary reading. The reviewed research is expansive, including extension of familiar theoretical models to novel domains, e.g., educational settings; enlarging empirical efforts within under-represented research areas, e.g., child development; and broadening the range of applicable quantitative and qualitative methods, e.g., computational stylistics, phenomenological methods. Especially challenging is articulation of the subtle aesthetic and social effects of literary artefacts, e.g., poetry, film. Increasingly, the complexity of these effects is addressed in multi-variate studies including confirmatory factor analysis and structural equation modeling. While each chapter touches upon the historical background of a specific research topic, two chapters address the area's historical background and guiding philosophical assumptions. Taken together, the material in this volume provides a systematic introduction to the area for early-career professionals while challenging active researchers to develop theoretical frameworks and empirical procedures that match the complexity of their research objectives.

Lamarckism and the Emergence of 'Scientific' Social Sciences in Nineteenth-Century Britain and France Snait

B. Gissis,2024-04-09 The book presents an original synthesizing framework on the relations between the biological and the social Within these relations the late nineteenth century emergence of social sciences aspiring to be constituted as autonomous as scientific disciplines is described analyzed and explained Through this framework the author points to conceptual and constructive commonalities conjoining significant founding figures Lamarck Spencer Hughlings Jackson Ribot Durkheim Freud who were not grouped nor analyzed in this manner before Thus the book offers a rather unique synthesis of the interactions of the social the mental and the evolutionary biological Spencerian Lamarckism and or Neo Lamarckism crystallizing into novel fields It adds substantially to the understanding of the complexities of evolutionary debates during the last quarter of the nineteenth century It will attract the attention of a wide spectrum of specialists academics and postgraduates in European history of the nineteenth century history and philosophy of science and history of biology and of the social sciences including psychology **Metaphors in International Relations Theory** M. Marks,2011-08-14

Metaphors constitute a fundamental way in which humans understand the world around them This book offers a comprehensive analysis of metaphors in theories of international relations Until recently conscious attention to metaphors in theories of international relations has been haphazard and sporadic This book examines the metaphors that inform the major paradigms in international relations theory Readers will discover that the vast majority of the terminology cataloguing defining and naming theories concepts and analytical tools pertaining to the study of international relations are metaphorical in nature The book concludes that metaphors are an essential element in all aspects of international relations theory **The**

Comparable Body - Analogy and Metaphor in Ancient Mesopotamian, Egyptian, and Greco-Roman Medicine John Z Wee,2017-11-13 The Comparable Body Analogy and Metaphor in Ancient Mesopotamian Egyptian and Greco Roman Medicine explores how analogy and metaphor illuminate and shape conceptions about the human body and disease through 11 case studies from ancient Mesopotamian Egyptian and Greco Roman medicine Topics address the role of analogy and metaphor as features of medical culture and theory while questioning their naturalness and inevitability their limits their situation between the descriptive and the prescriptive and complexities in their portrayal as a mutually intelligible medium for communication and consensus among users *Coding as Literacy* Vera Bühlmann,Ludger Hovestadt,Vahid

Moosavi,2015-07-24 Recent developments in computer science particularly data driven procedures have opened a new level of design and engineering This has also affected architecture The publication collects contributions on Coding as Literacy by computer scientists mathematicians philosophers cultural theorists and architects The main focus in the book is the observation of computer based methods that go beyond strictly case based or problem solution oriented paradigms This invites readers to understand Computational Procedures as being embedded in an overarching media literacy that can be revealed through and acquired by computational literacy and to consider the data processed in the above mentioned methods as being beneficial in terms of quantum physics Self Organizing Maps SOM which were first introduced over 30 years ago
