Valente, 1995 This text presents a key to understanding how ideas products and opinions take off and spread throughout society referred to as the diffusion of innovation and provides a means to estimate how fast or slow that spread occurs The diffusion of innovations occurs among individuals in a social system and the pattern of communications among these individuals is a social network The network determines how quickly innovations diffuse and the timing of each individual s adoption The book thus analyses how social networks structure the diffusion of innovation Banking on Innovation Tanai Khiaonarong, Jonathan Lieben, 2009-06-01 Innovation in banking should be directed at improving the infrastructure that fosters efficient financial services and international trade In this work innovation theory is used to show how modern payment systems have transformed the technology of banking and facilitated changes in the strategy and structure of financial services organisations Design implementation and dissemination of payment systems are described and the analysis of their costs and benefits is combined with case studies of banks undergoing change By studying firm capabilities competencies and resources the approach is extended to services in general and linked to the ability of firms to compete and promote national economies Payment

systems vary and advanced and developing economies face obstacles in their legal and technical infrastructure and maturity of banks By adopting an international perspective the book offers a unique comparative analysis that shows what kind of investments are likely to be effective **Control Variables in Models of Innovation Diffusion** Shlomo Kalish,1982

Rogers,2003-08-16 Now in its fifth edition Diffusion of Innovations is a classic work on the spread of new ideas In this renowned book Everett M Rogers professor and chair of the Department of Communication Journalism at the University of New Mexico explains how new ideas spread via communication channels over time Such innovations are initially perceived as uncertain and even risky To overcome this uncertainty most people seek out others like themselves who have already adopted the new idea Thus the diffusion process consists of a few individuals who first adopt an innovation then spread the word among their circle of acquaintances a process which typically takes months or years But there are exceptions use of the Internet in the 1990s for example may have spread more rapidly than any other innovation in the history of humankind Furthermore the Internet is changing the very nature of diffusion by decreasing the importance of physical distance between people The fifth edition addresses the spread of the Internet and how it has transformed the way human beings communicate and adopt new ideas *Business Models and Cognition* Kristian J.
