

Choosing the Right Organizational Model for **Team Autonomy**

Feature		Networked organization	Agile & tribes	Holacracy
1	 Team autonomy	Varies; autonomy depends on network node structure	High, within sprints and team goals	Very high, roles and circles self-govern
2	 Decision-making	Often shared; depends on local team setup	Product Owner/Scrum Master roles guide priorities	Distributed through structured governance
3	 Structure	Fluid, team-of-teams model with overlapping roles	Squads, tribes, chapters, guilds	Role- and circle-based with no traditional hierarchy
4	 Best suited for	Cross-functional collaboration across business areas	Rapid development, product teams, iterative work	Values-driven orgs, adaptable operations, flat hierarchies
5	 Key challenge	Coordination overhead and unclear accountability	Scaling consistency across teams	Complex to adopt and sustain

Models Of Autonomy:

Models of Autonomy YÄ‘rÄ‘m DinÄ‘ä‘ein, In 1938 Eliezer Yapou *Artificial Intelligence: Theories, Models and Applications* John Darzentas, 2008-09-19 This book constitutes the refereed proceedings of the 5th Hellenic Conference on Artificial Intelligence SETN 2008 held at Syros Greece in October 2008 The 27 revised full papers together with 17 revised short papers were carefully reviewed and selected from 76 submissions The papers address any area of artificial intelligence particular fields of interest include Adaptive Systems AI and Creativity AI rchitectures Artificial Life Autonomous Systems Data Mining and Knowledge Discovery Hybrid Intelligent Systems Methods Intelligent Agents Multi agent Systems Intelligent Distributed Systems Intelligent Information Retrieval Intelligent Natural Interactivity Intelligent Virtual Environments Knowledge Representation and Reasoning Logic Programming Knowledge Based Systems Machine Learning Neural Nets Genetic Algorithms Natural Language Processing Planning and Scheduling Problem Solving Constraint Satisfaction Robotics Machine Vision Machine Sensing Models and Mirrors Don Handelman, 1998 Ritual is one of the most discussed cultural practices yet its treatment in anthropological terms has been seriously limited characterized by a host of narrow conceptual distinctions One major reason for this situation has been the prevalence of positivist anthropologies that have viewed and summarized ritual occasions first and foremost in terms of their declared and assumed functions By contrast this book which has become a classic investigates them as epistemological phenomena in their own right Comparing public events a domain which includes ritual and related occasions the author argues that any public event must first be comprehended through the logic of its design It is the logic of organization of an occasion which establishes in large measure what that occasion is able to do in relation to the world within which it is created and practiced *Cultures of Infancy* Heidi Keller, 2022-05-26 The Classic Edition of Heidi Keller s *Cultures of Infancy* first published in 2007 includes a new introduction by the author which describes for readers the original context of her work how she has further developed her research and thinking and the ongoing relevance of this volume in the context of future challenges for the field In its original volume *Cultures of Infancy* presented the first systematic analysis of culturally informed developmental pathways synthesizing evolutionary and cultural psychological perspectives for a broader understanding of human development In this compelling book Heidi Keller utilizes ethnographic reports as well as quantitative and qualitative analyses to illustrate how humans resolve universal developmental tasks in particular sociodemographic contexts These contexts are represented in cultural models with three distinct models addressed throughout the text the model of independence with autonomy as developmental organizer the model of interdependence with relatedness as the developmental organizer and the model of autonomous relatedness representing particular mixtures of autonomy and relatedness The book offers an empirical examination of the first integrative developmental task during the early months of life relationship formation Keller shows that early parenting experiences shape the basic foundation of the self within particular models of parenting that are

influenced by culturally informed socialization goals With distinct patterns of results that the studies have revealed Cultures of Infancy helps redefine developmental psychology as part of a culturally informed science based on evolutionary groundwork Scholars interested in a broad perspective on human development and culture will benefit from this pioneering volume Same-sex Marriage in Latin America Jason Pierceson,Adriana Piatti-Crocker,Shawn Schulenberg,2013-01-01 This volume sheds light on regional national and individual level factors that have led to major developments for same sex relationship equality in Latin America and explores institutional political and social barriers for same sex couples in the region It analyzes cross national patterns of same sex relationship policies in Latin America and examines country cases of recent policies for same sex couples in the region *The Theory and Practice of Autonomy* Gerald Dworkin,1988-08-26 This important new book develops a new concept of autonomy The notion of autonomy has emerged as central to contemporary moral and political philosophy particularly in the area of applied ethics professor Dworkin examines the nature and value of autonomy and uses the concept to analyse various practical moral issues such as proxy consent in the medical context paternalism and entrapment by law enforcement officials **The Global Model of Constitutional Rights** Kai Möller,2012-10-25 Since the end of the Second World War and the subsequent success of constitutional judicial review one particular model of constitutional rights has had remarkable success first in Europe and now globally This global model of constitutional rights is characterized by an extremely broad approach to the scope of rights sometimes referred to as rights inflation the acceptance of horizontal effect of rights positive obligations and increasingly also socio economic rights and the use of the doctrines of balancing and proportionality to determine the permissible limitations of rights Drawing on analyses of a broad range of cases from the UK the European Court of Human Rights Germany Canada the US and South Africa this book provides the first substantive moral reconstructive theory of the global model It shows that it is based on a coherent conception of constitutional rights which connects to attractive accounts of judicial review democracy and the separation of powers The first part of the book develops a theory of the scope of rights under the global model It defends the idea of a general right to personal autonomy a right to everything which according to the agent s self conception is in his or her interest The function of this right is to acknowledge that every act by a public authority which places a burden on a person s autonomy requires justification The second part of the book proposes a theory of the structure of this justification which offers original and useful accounts of the important doctrines of balancing and proportionality *Bio A.I. - From Embodied Cognition to Enactive Robotics* Adam Safron,Inês Hipólito,Andy Clark,2023-12-08 Even before the deep learning revolution the landscape of artificial intelligence AI was already changing drastically in the 90s Embodied intelligence it was proposed must play a crucial role in the design of intelligent machines This new wave was inspired by what is today known as Embodied and Enactive Cognitive Science or E Cognition which considers that cognitive activity does not reduce to the intellectual capacities of agents being able to represent their environments E cognition set AI and robotics in a new direction

in which intelligent machines are required to interact with the environment and where this interaction does not reduce to explicit representations or prespecified algorithms These ideas revolutionized the way we think about intelligent machines and cognition but these theoretical advances are only partially reflected in modern approaches to AI and machine learning ML Despite deeply impressive achievements AI ML still struggles to recapitulate the kinds of intelligence we find in natural systems whether we are considering individual insects e g simultaneous localization and mapping or swarm behaviour e g foraging sensing and ensemble inferences and especially the kinds of flexibility and high level reasoning characteristic of human cognition **Social Theory and Practice** ,2013 **The Agent Modeling Language - AML** Radovan

Cervenka,Ivan Trencansky,2007-04-17 Multi agent systems have been a focus of studies for more than 25 years Yet despite substantial effort of an active research community modeling of multi agent systems still lacks complete and proper definition general acceptance and practical application This book provides the Agent Modeling Language AML a comprehensive modeling language as an extension of UML 2 0 concentrating on multi agent systems and applications **Models and World Making** Annabel Jane Wharton,2022-01-14 From climate change forecasts and pandemic maps to Lego sets and Ancestry algorithms models encompass our world and our lives In her thought provoking new book Annabel Wharton begins with a definition drawn from the quantitative sciences and the philosophy of science but holds that history and critical cultural theory are essential to a fuller understanding of modeling Considering changes in the medical body model and the architectural model from the Middle Ages to the twenty first century Wharton demonstrates the ways in which all models are historical and political Examining how cadavers have been described exhibited and visually rendered she highlights the historical dimension of the modified body and its depictions Analyzing the varied reworkings of the Holy Sepulchre in Jerusalem including by monumental commanderies of the Knights Templar Alberti s Rucellai Tomb in Florence Franciscans olive wood replicas and video game renderings she foregrounds the political force of architectural representations And considering black boxes instruments whose inputs we control and whose outputs we interpret but whose inner workings are beyond our comprehension she surveys the threats posed by such opaque computational models warning of the dangers that models pose when humans lose control of the means by which they are generated and understood Engaging and wide ranging Models and World Making conjures new ways of seeing and critically evaluating how we make and remake the world in which we live **Ethical Artificial Intelligence from Popular to Cognitive Science** Jordan Richard

Schoenherr,2022-06-24 This book offers a unique interdisciplinary perspective on the ethics of artificial intelligence autonomous intelligent and connected systems or AIs applying principles of social cognition to understand the social and ethical issues associated with the creation adoption and implementation of AIs As humans become entangled in sociotechnical systems defined by human and artificial agents there is a pressing need to understand how trust is created used and abused Compounding the difficulty in answering these questions stakeholders directly or indirectly affected by

these systems differ in their motivations understanding and values This volume provides a comprehensive resource to help stakeholders understand ethical issues of designing and implementing AISs using an ethical sensemaking approach Starting with the general technical affordances of AIS Dr Jordan Richard Schoenherr considers the features of system design relating data integrity selection and interpretation of algorithms and the evolution processes that drive AISs innovation as a sociotechnological system The poles of technophobia algorithmic aversion and technophilia algorithmic preference in the public perception of AISs are then described and considered against existing evidence including issues ranging from the displacement and re education needs of the human workforce the impact of use of technology on interpersonal accord and surveillance and cybersecurity Ethical frameworks that provide tools for evaluating the values and outcomes of AISs are then reviewed and how they can be aligned with ethical sensemaking processes identified by psychological science is explored Finally these disparate threads are brought together in a design framework Also including sections on policies and guideline gaming and social media and Eastern philosophical frameworks this is fascinating reading for students and academics in psychology computer science philosophy and related areas as well as professionals such as policy makers and those working with AI systems

Dramatic Experiments Eyal Peretz, 2013-09-26 Dramatic Experiments offers a comprehensive study of Denis Diderot one of the key figures of European modernity Diderot was a French Enlightenment philosopher dramatist art critic and editor of the first major modern encyclopedia He is known for having made lasting contributions to a number of fields but his body of work is considered too dispersed and multiform to be unified Eyal Peretz locates the unity of Diderot s thinking in his complication of two concepts in modern philosophy drama and the image Diderot s philosophical theater challenged the work of Plato and Aristotle inaugurating a line of drama theorists that culminated in the twentieth century with Bertolt Brecht and Antonin Artaud His interest in the artistic image turned him into the first great modern theorist of painting and perhaps the most influential art critic of modernity With these innovations Diderot provokes a rethinking of major philosophical problems relating to life the senses history and appearance and reality and more broadly a rethinking of the relation between philosophy and the arts Peretz shows Diderot to be a radical thinker well ahead of his time whose philosophical effort bears comparison to projects such as Gilles Deleuze s transcendental empiricism Martin Heidegger s fundamental ontology Jacques Derrida s

deconstruction and Jacques Lacan's psychoanalysis

Becoming an Antiracist School Leader Patrick A. Duffy, 2023 This resource describes an adaptive framework for developing structural and curricular antiracist leadership with practical applications for leaders of systems schools and student groups The text features a comprehensive study of a Midwestern high school including personal narratives from a diverse group of antiracist school leaders

Sickness and Healing Robert A. Hahn, 1995 Hahn begins by developing a definition of sickness that is based on the patient's perception of suffering and disturbance rather than on the physician's assessment of biomedical signs After reviewing the principal theories that account for the forms of sickness and healing found in different historical and cultural contexts he explores the relevance of both anthropological and epidemiological approaches to sickness focusing on the persistent gap between white and black infant mortality in the United States Hahn then describes contemporary Western medicine as it might be seen by a visiting foreign anthropologist

Imogene King's Conceptual Framework and Theory of Goal Attainment Diana Newman, Beverly J. Whelton, Stacey Marye, Nancy E. Loos, 2025-07-09 Imogene King 1923 2007 was a major 20th century thought leader for professional nursing practice The texts and articles she wrote challenged nurse scholars to think conceptually about nursing practice King's Conceptual Systems and Theory of Goal Attainment were formative in the nursing theory movement which was a part of the professionalization of the nursing practice This text the first book that originates from within the King International Nursing Group makes the systems framework and theory of Imogene King relevant for today's practitioners and displays the value of this theory to improve clinical nursing practice The personal and professional biographical content is broad and broaches such topics as spirituality vulnerable populations ethics nurse listening behaviors as foundational nursing practice philosophy professional role and shared governance reflecting the continued relevance of King's work both in the United States and around the globe with a focus on outcomes

Big Theories Revisited 2 Gregory Arief D. Liem, Dennis M. McInerney, 2018-04-01 Students' school motivation and engagement are key contributors to the quality of their academic learning and performance as well as growth in other important areas of life social emotional and physical health Fostering motivation and engagement is thus a meaningful educational purpose both in and of itself and as a pathway to holistic student development However motivation and engagement do not develop in a vacuum and effort seeking to facilitate them cannot be effectively pursued without understanding their underpinning sociocultural influences In the first edition of this volume Big Theories Revisited McInerney Van Etten 2004 authors of major models of school motivation and engagement were challenged to look into their theoretical work through a sociocultural lens The volume has been well received as objectively reflected in the number of citations of its chapters Significant progress has since been made in the theorizing and research of big theories of school motivation and engagement In this volume we invited a group of internationally renowned scholars to re-examine their theoretical and conceptual work by highlighting the what factors and how processes of sociocultural influences in association with the key motivation and or engagement constructs of their

expertise We made it clear to our contributors that we solicited new chapters rather than chapters with merely rehashed materials As a result this volume *Big Theories Revisited 2* Liem McNerney 2018 contains chapters that critically discuss sociocultural influences on school motivation and engagement constructs as viewed from focal theories including self determination theory achievement goal theory personal investment theory expectancy value theory self efficacy theory self and co regulated learning models and many others Whereas some of the chapter topics covered in the initial edition are also part of this edition some are new and provide fresh sociocultural angles on achievement relevant processes and outcomes Likewise whereas some of the authors contributed to the earlier edition of the Volume many of them are different What appears to be the same across the two editions is the scholarly distinction of the authors and the substantive rigor of the chapters in advancing our current understanding of this field of enquiry Readers will learn much from and be inspired by stimulating ideas presented in this volume
