Models Of Love:

The New Model of Love Charles Lim Wu, 2018-05-11 Throughout history we've been conditioned by society, media, education, and family to believe we need love to be happy. In *The New Model of Love*, author Charles Lim Wu examines and challenges this tightly held and deep-seated belief. He shows how love has evolved throughout the years and discusses the importance of realizing and accepting these changes to positively move forward. Wu looks at and redefines love. He explores the origins of the old model of love and tells how it no longer serves us to remain within its confines. *The New Model of Love* discusses how it can be daunting to confront the old model, but once that fear is conquered, you'll be free to love as you've never loved before. Once you accept the new model, you'll find freedom in love and liberation from the shackles of needing love from others. You'll stop seeking love and start creating it for yourself. Using his personal experiences and discoveries as a backdrop, Wu offers an opportunity to experience abundant joy and happiness in all your relationships with the goal of naturally and freely experiencing infinite love.

Modeling Love Dynamics Sergio E. T. Al Rinaldi, 2015-10-22 This book shows for the very first time how love stories, a vital issue in our lives, can be tentatively described with classical mathematics. Focus is on the derivation and analysis of reliable models that allow one to formally describe the expected evolution of love affairs from the initial state of indifference to the final romantic regime. The models are in full agreement with the basic philosophical principles of love psychology. Eight chapters are theoretically oriented and discuss the romantic relationships between important classes of individuals identified by particular psychological traits. The remaining chapters are devoted to case studies described in classical poems or in worldwide famous films.

New Philosophical Essays on Love and Loving Simon Cushing, 2021-09-20 New philosophical essays on love by a diverse group of international scholars. Topics include contributions to the ongoing debate on whether love is arational or if there are reasons for love, and if so, what kind. The kinds of love there may be between humans and artificial intelligences, between non-human animals and humans, whether love can explain the difference between nationalism and patriotism, whether love is a necessary component of truly seeing others and the world, whether love like free will is fragile and may not survive in a deterministic world, and whether or not love is actually a good thing or may instead be a force opposed to morality. Key philosophers discussed include Immanuel Kant, Iris Murdoch, Bernard Williams, Harry Frankfurt, J. David Velleman, Niko Kolodny, Thomas Hurka, Bennett Helm, Alfred Mele, and Derk Pereboom. Essays also touch on the treatment of love in literature and popular culture, from Graham Greene's *The End of the Affair* to Spike Jonze's movie *Her*.

Beyond the Systems Paradigm Luciano L'Abate, 2013-05-30 This monograph owes its origins to the decades old proposal by David Bakan 1968 about the duality of human experience He proposed that community and agency would be two necessary and sufficient constructs to classify and to encompass most human relationships This dichotomy has been found to be valid by a variety of contributions over the last half a century L'Abate 2009 L'Abate Cusinato Maino Colesso Scilletta 2010 Additionally the purpose of this book is to argue and assert that two important fields of psychology family and personality psychologies if not already dead are conceptually empirically and practically moribund They are being superseded respectively by perhaps more appropriate perhaps more specific and more likely verifiable concepts and constructs such as intimacy and identity The traditional family still conceived as composed by two parents and two children of different gender is esponsible for only one fourth of all domiciles in USA Singles same sex couples and completely different family organization complete the remaining 100% Difficulties in defining what is personality require a change in perspective and advance toward a comprehensive theory of

Object Choice Klaus Theweleit, 1994-05-17 Whom do we choose when we fall in love How do we make the love object into what we want These are questions which only became important at the end of the nineteenth century as Freud began to formulate a new discipline which would be called psychoanalysis Freud argues Klaus Theweleit was the first theoretician of the new situation boy versus girl in the world series of love Theweleit looks at a number of relationships Alfred Hitchcock and Alma Reville the triangle of Hannah Arendt Martin Heidegger and Elfriede Heidegger Jung and Sabina Spielrein But the key figure is Freud himself Who would who could Freud choose As it happened Freud proposed to Martha Bernays The 1 500 letters of Freud's courtship became something like the first psychoanalysis without knowing it Martha

Bernays became an analytic instance But Object Choice is not only a study of the founder of psychoanalysis it is also an illuminating lexicon of love in the twentieth century Freud is accompanied here by Jimi Hendrix the Kinks and the Velvet Underground Like Theweleit's Male Fantasies this is a collage book mixing auto biography theory and pop culture and always haunted by history above all the history of Nazism As an epilogue Theweleit brings Freud back to the scene of his courtship and the Beatles back to Hamburg in an exploration of that city's Wandsbek district once home to an important Jewish community His comments on the transformations and destruction that Wandsbek has endured form an elegiac tribute to German Jewry and a powerful conclusion to this remarkable book
