personality in social psychology before carrying out a computational analysis of Virginia Woolf's experimental novel *The Waves*. Frequencies of grammatical and semantic categories in the language of the six speaking characters are analyzed using Wmatrix software developed by UCREL at Lancaster University. The quantitative analysis is supplemented by a qualitative analysis into recurring patterns of metaphor. The author concludes that these analyses successfully differentiate all six characters both synchronically and diachronically and claims that this methodology is also applicable to the study of personality in non-literary language. The book, written in a clear and accessible style, will be of interest to postgraduate students and academics in linguistics, stylistics, literary studies, psychology, and also computational approaches.

The Representation of Speech Events in Chariton's Callirhoe and the Acts of the Apostles Adrian T. Smith, 2014-06-26. In *The Representation of Speech Events in Chariton's Callirhoe and the Acts of the Apostles* Adrian T. Smith summarizes cross-linguistic research on how and why narrators vary the formulae that introduce direct speech. This research is applied to *Chariton* and to *Acts*. The findings demonstrate that narrators vary quotation formulae for numerous pragmatic purposes, including the tracking of conversational dynamics via a set of marked and unmarked quotation devices.
