The Oxford Dictionary of Architecture James Stevens Curl, Susan Wilson, 2015 With over 6 000 entries this is the most authoritative dictionary of architectural history available *The Barcelona Pavilion* by Mies van der Rohe Dietrich Neumann, 2020-12-07 While Mies van der Rohe s pavilion at the International Exposition in Barcelona in 1929 went unnoticed by most of the visitors to the fairgrounds contemporary critics enthusiastically hailed it as the most convincing statement of the Modern Age This book presents 100 selected texts about this much discussed building written then and now from the opening speech by the Spanish king to newspaper articles and private letters voices of contemporary architects architecture critics and historians and even a text by artist Ai Weiwei who created an installation in the outdoor area of the pavilion in 2010 Thus the history of this building s reception depicts a dazzling picture and inconceivable breadth including statements by such eminent authors as Frank Lloyd Wright Leonardo Benevolo Rem Koolhaas Peter Eisenman

Dawes, 2018-04-12 This book presents the first detailed mathematical analysis of the social cognitive and experiential properties of Modernist domestic architecture The Modern Movement in architecture which came to prominence during the first half of the twentieth century may have been famous for its functional forms and machine made aesthetic but it also sought to challenge the way people inhabit understand and experience space Ludwig Mies van der Rohe s buildings were not only minimalist and transparent they were designed to subvert traditional social hierarchies Frank Lloyd Wright s organic Modernism not only attempted to negotiate a more responsive relationship between nature and architecture but also shape the way people experience space Richard Neutra s Californian Modernism is traditionally celebrated for its sleek geometric forms but his intention was to use design to support a heightened understanding of context Glenn Murcutt s pristine pavilions seemingly the epitome of regional Modernism actually raise important questions about the socio spatial structure of architecture Rather than focussing on form or style in Modernism this book examines the spatial social and experiential properties of thirty seven designs by Wright Mies Neutra and Murcutt The computational and mathematical methods used for this purpose are drawn from space syntax isovist geometry and graph theory The specific issues that are examined include the sensory and emotional appeal of space and form shifting social and spatial structures in architectural planning wayfinding and visual understanding and the relationship between form and program

[A Critical History of Contemporary Architecture](#) Dr Elie G Haddad, Asst Prof

David Rifkind, Ms Sarah Deyong, 2014-03-28 This book provides a comprehensive critical overview of the developments in architecture from 1960 to 2010 The first section provides a presentation of major movements in architecture after 1960 and the second a geographic survey that covers a wide range of territories around the world This book not only reflects the different perspectives of its various authors but also charts a middle course between the aesthetic histories that examine architecture solely in terms of its formal aspects and the more ideological histories that subject it to a critique that often skirts the discussion of its formal aspects

An Accidental Masterpiece Dietrich Neumann, 2020-12-07 The Complex History of a Building With the temporary exhibition pavilion of the German Reich at the 1929 International Exposition in Barcelona Mies van der Rohe designed an architectural icon but also a controversial monument of the way the Weimar Republic portrayed itself The building is one of the most unusual success stories in the history of architecture Despite its short existence its reputation grew steadily in the following decades thanks in part to magnificent photographs It was soon considered the constructed manifesto of the Modern Age and its spatial and ideational ambitions were called a milestone of Modern architecture This comprehensively broadly researched book portrays the building's complex history and its political entanglement up to and including its reconstruction according to van der Rohe's plans at the original site between 1983 and 1986 Presumably the most important and influential architectural icon of the 20th century uniquely documented and depicted On the occasion of the 50th anniversary of Mies' death and the Bauhaus centenary Many never before published photographs from archives in the US Germany and Spain

The Production Sites of Architecture Sophia Psarra, 2019-01-14 The Production Sites of Architecture examines the intimate link between material sites and meaning It explores questions such as how do spatial configurations produce meaning What are alternative modes of knowledge production How do these change our understanding of architectural knowledge Featuring essays from an international range of scholars the book accepts that everything about the production of architecture has social significance It focuses on two areas firstly relationships of spatial configuration form order and classification secondly the interaction of architecture and these notions with other areas of knowledge such as literature inscriptions interpretations and theories of classification ordering and invention Moving beyond perspectives which divide architecture into either an aesthetic or practical art the

authors show how buildings are informed by intersections between site and content space and idea thought and materiality architecture and imagination Presenting illustrated case studies of works by architects and artists including Amale Andraos Dan Wood OMA Koen Deprez and John Soane *The Production Sites of Architecture* makes a major contribution to our understanding of architectural theory *The New Conservatism* Jürgen Habermas, 2015-10-07 Jürgen Habermas is well known for his scholarly writings on the theoretical foundations of the human sciences *The New Conservatism* brings to light another side of Habermas's work showing him to be an incisive commentator on a wide range of contemporary themes The 1980s have been a crucial decade in the political life of Western democracies in general and of the Federal Republic of Germany in particular The transformations that accompanied a shift from 13 years of Social democratic rule in Germany to government by the conservative Christian Democrats are captured in this series of insightful often passionate political and cultural commentaries The central theme uniting the essays is the German problem of coming to terms within the past a problem that has important implications outside Germany as well Of particular note are the essays on what has come to be known as the Historians' Debate Habermas's attack on the revisionist German historians who have been trying to trivialize and normalize the history of the Nazi period and his defence of the need for a realistic and discriminating approach to the Nazi period and its legacy Habermas also takes up the recent debate concerning Martin Heidegger's involvement with Nazism and the rise of the neoconservative movement in Europe and America In particular the essay on *The New Obscurity* combines Habermas's analysis of the problems of the welfare state with his suggestions for avenues open to utopian impulses today

that addressed aspects of type essential structure and primal humanistic aspects of environment making and discusses how these concerns outlived the mid century moment and in the designs and writings of Aldo Rossi and others they paved the way for Post Modernism
