Suburban Modern Robert M. Stamp, 2004 While avant garde modernism disrupted the art salons architecture schools and design studios of the world's more sophisticated urban centres in the 20th century Calgary slept through the cultural upheavals as a provincial backwater Calgary's initiation to modernism might be dated to February 13 1947 when Imperial Oil blew in its famous well at Leduc Or the 1948 football season when Tom Brooks and Les Lear wrapped the Calgary Stampeders football team around an innovative and modernist looking T formation backfield to win the Grey Cup Calgarians embraced the modern age after the Second World War taking modernism into the streets and into the suburbs They went beyond art architecture and design and redefined modernism to include homes furniture appliances and cars In the process Calgarians democratized feminized and suburbanized modernism Suburban Modern examines controversies over coloured margarine and mixed drinking in post war Calgary It shows how new petro office buildings

transformed the downtown skyline during the 1950s and 1960s and how new bus lines roads and bridges changed the city's transportation network. As the city sprawled horizontally to engulf its ever-expanding suburbs, shoppers deserted downtown for suburban malls. The book follows young couples into their post-war dream homes with modern furnishings and barbecue appointed patios. Suburban Modern argues that the suburbs rather than the downtown defined Calgary's approach to modernism.

Canadian Reference Sources Mary E. Bond, Martine M. Caron, 1996. This bibliography cites those Canadian and foreign reference sources that describe Canadian people, institutions, organizations, publications, art, literature, languages, and history. It lists books of a general nature as well as works in the disciplines of history and the humanities. These large divisions are then broken down by subject, genre, type of document, and province or territory. Titles of national, provincial, territorial, or regional interest are included in every subject area when available. The contents of the book are indexed four ways: by name, title, French subject, and English subject. And to facilitate browsing, the major reference books, those dealing with more than one subject or a large geographical region, are also cross-referenced. Two entries have been created for each bilingual document in order to provide access and bibliographical descriptions in both of Canada's official languages. Entries for unilingual works include citation in the language of the publication and a bilingual annotation. The annotations are descriptive and provide information on the content, arrangements, and indexing of works, the availability of non-print formats, previous editions, and title changes, and related works. Canadian Reference Sources will be an invaluable reference tool for future scholars and researchers.

Modern Architecture Graham Livesey, 2024-11-15. *Modern Architecture: The Basics* examines technological, stylistic, socio-political, and cultural changes that have transformed the history of architecture since the late 18th century. Broad definitions of modernity and postmodernity introduce the book, which comprises 24 short thematic chapters looking at the concepts behind the development of modern and postmodern architecture. These include major historical movements, key figures, and evolving building typologies. There is also an emphasis on the changing city during the 19th and 20th centuries. Approaches to representation and its impacts on architecture are studied along with the changing global role of architecture as cultural expression. The book introduces new topics including gender, race, postcolonialism, and indigeneity. An undaunting, contemporary, and inclusive account of modern architectural history, this is a must-read for all students of architecture as well as those outside the discipline approaching the subject for the first time.
