World Architecture and Society Peter Louis Bonfitto, 2021-12-06 This two volume encyclopedia covers buildings and sites of global significance from prehistoric times to the present day providing students with an essential understanding of architectural development and its impact on human societies This two volume encyclopedia provides an in depth look at buildings and sites of global significance throughout history The volumes are separated into four regional sections 1 the Americas 2 Europe 3 Africa and the Middle East and 4 Asia and the Pacific Four regional essays investigate the broader stylistic and historical contexts that describe the development of architecture through time and across the globe Entries explore the unique importance of buildings and sites including the megalithic wonder of Stonehenge and the imposing complex of Angkor Wat Entries on Spanish colonial missions in the Americas and the medieval Islamic universities of the Sahara connect to broader building traditions Other entries highlight remarkable stories of architectural achievement and memory like those of Tuskegee University a site hand built by former slaves or the Hiroshima Peace Memorial Park which was built at the site of the atomic detonation Each entry focuses on the architectural but includes strong consideration of the social impact importance and significance each structure has had in the past and in the present **The Architecture of**

Use Stephen Grabow, Kent Spreckelmeyer, 2014-10-03 By analyzing ten examples of buildings that embody the human experience at an extraordinary level this book clarifies the central importance of the role of function in architecture as a generative force in determining built form Using familiar twentieth century buildings as case studies the authors present these from a new perspective based on their functional design concepts Here Grabow and Spreckelmeyer expand the definition of human use to that of an art form by re evaluating these buildings from an aesthetic and ecological view of function Each building is described from the point of view of a major functional concept or idea of human use which then spreads out and influences the spatial organization built form and structure In doing so each building is presented as an exemplar that reaches beyond the pragmatic concerns of a narrow program and demonstrates how functional concepts can inspire great design evoke archetypal human experience and help us to understand how architecture embodies the deeper purposes and meanings of everyday life *Great Building Designs 1900 - Today* Ian Graham, 2015-08 Examines the

development of architectural design from the Flatiron and Empire State Buildings to Burj Khalifa in Dubai and the Shard in London profiles noted architects and discusses the design process **Building Modern Houston** Anna Mod, 2011 Founded in 1836 Houston is now the country's fourth largest city In the early 20th century Houston's economy shifted from agriculture to oil fueling the city's explosive growth in the following decades Houston grabbed the reins and saw a building boom in commercial residential and civic architecture redefine the city and skyline Modernism was a new and fresh

architectural expression and the perfect complement to the city's can-do entrepreneurial spirit. The 1960s brought groundbreaking ceremonies for the National Aeronautics and Space Administration's NASA headquarters while residents and tourists alike lined up to tour the revolutionary new Astrodome. Building Modern Houston tells the story of Houston's architecture during its transformation from Bayou City to Space City. **Modern Building** John Winter, 1969 Great Buildings DK Publishing, 2012-08-20 Great Buildings is a fabulous photographic tour of more than 50 of the world's most magnificent buildings. From monumental pyramids to the latest chrome and glass skyscrapers and sculptural-looking museums, the buildings are arranged chronologically, providing an excellent introduction to the history of architecture.

Houses and Interiors Vol 1 Harry Seidler, Chris Abel, The Images Publishing Group, 2003 No other architect in Australia's history has been as internationally influential or famous as Harry Seidler. This work provides an insight into and an analysis of the designs selected by Seidler to be his most important. The American Spirit in Architecture Talbot Hamlin, 1926

Culture and Democracy Hugh Dalziel Duncan, 1989-01-01 This work by the late and great sociologist Hugh Dalziel Duncan paints the great panorama of the Middle West where egalitarianism is the most cherished value and money is the most important vehicle of life. How art finds a place in this society is shown in the specific struggle between the architects, businessmen, unionists, and educators of Chicago. Into such specifics Duncan reveals the place of supposedly abstract theories developed by John Dewey, George Herbert Mead, Thorstein Veblen, and above all Louis H. Sullivan, whose school of architecture presents both a new form of physical design and a new order of society. The rise, seeming defeat, and final triumph of Sullivan's principles of order in architecture are related to his social and aesthetic theories of form in society. In democratic society, all individuals must be capable of art, just as all individuals share in art as experience. Sullivan's description of the development within the individual of the idea of architecture is treated as an allegory of such development in the spirit of democratic values. His life is offered as a parable of the problem facing American artists as they attempt to root art in democratic culture. In Sullivan's words: "The critical study of architecture becomes not merely the direct study of art, but in extenso a study of the social conditions producing it. The study of a newly shaping type of civilization. By this light the study of architecture becomes naturally and logically a branch of social science." Duncan's exceptional volume, written with grace and clarity, registers the achievements of this Chicago School, showing how culture and democracy reached a special moment of consensus with the money-based economy of our time. The Buildings Around Us Thom Gorst, 1995 This introduction to buildings aims to demystify the culture of architecture. The 50 buildings here range from churches and banks to semi-detached houses and offices. The text shows how building design has evolved over the last 150 years and explains the architecture of our daily environment. **Picturepedia** DK, 2020-10-13 Science and technology, nature, geography, culture, sports, and hobbies, and history all combine in this mind-blowing visual encyclopedia. Congressional Record United States. Congress,1930 The Architecture of Rome Ulrich Fürst,1998 Architects and artists have always acknowledged over the centuries that Rome is rightly called the eternal city Rome is eternal above all because it was always young always in its prime Here the buildings that defined the West appeared over more than 2000 years here the history of European architecture was written The foundations were laid even in ancient Roman times when the first attempts were made to design interiors and thus make space open to experience as something physical And at that time the Roman architects also started to develop building types that are still valid today thus creating the cornerstone of later Western architecture In it Rome's primacy remained unbroken whether it was with old St Peter's as the first medieval basilica or new St Peter's as the building in which Bramante and Michelangelo developed the High Renaissance or with works by Bernini and Borromini whose rich and lucid spatial forms were to shape Baroque as far as Vienna Bohemia and Lower Franconia and also with Modern buildings of which there are many unexpected pearls to be found in Rome All this is comprehensible only if it is presented historically i e in chronological sequence and so the guide has not been arranged topographically as usual but chronologically This means that one is not led in random sequence from a Baroque building to an ancient or a modern one but the historical development is followed successively Every epoch is preceded by an introduction that identifies its key features This produces a continuous lavishly illustrated history of the architecture of Rome and thus at the same time of the whole of the West Practical handling is guaranteed by an alphabetical index and detailed maps whose information does not just immediately illustrate the historical picture but also makes it possible to choose a personal route through history *New York* Ric Burns,James Sanders,Lisa Ades,2021-11-23 An expanded edition of the only comprehensive illustrated history of New York with more than 600 ravishing photographs and illustrations that tells the remarkable 400 year long story of the city from its beginning in 1624 up to the current moment The companion volume to the acclaimed PBS series This landmark book traces the spectacular growth of New York from its initial settlement on the tip of

Manhattan through the destruction wrought by the Revolutionary War to its rise as the nation's premier commercial capital and industrial center and as a magnet for immigrant hopes and dreams in the 19th century to its standing as a beacon of modern culture in the 20th century and as a worldwide symbol of resilience in the 21st century. The story continues here with new chapters delivering a sweeping portrait of New York at the dawn of the 21st century when it emerged after decades of decline to assert its place at the very center of a new globalized culture. Here is a city challenged indeed sometimes shaken to its core by a series of profound crises: the aftermath of 9/11, the continual struggle with racial injustice, the financial crisis of 2008, the devastation of Superstorm Sandy, the still unfolding cataclysm of the COVID-19 pandemic whose earliest and deadliest urban epicenter was New York itself. Here too is a lively portrait of the city's vibrant street life and culture: the birth of hip hop in the South Bronx, Christo and Jeanne Claude's Gates in Central Park, the musicals of Broadway, the explosion in location filmmaking in every borough, the pivotal rise of the tech industry and so much more. The history of this city especially in the tumultuous and transformative two decades detailed in the new chapters is an epic story of rebirth and growth, an astonishing transfiguration still in progress of the world's first modern city into a model and prototype for the global city of the future.

Fundamental Building Materials K. Ward-Harvey, 2009. Written by an architect with many years experience in practice and teaching, this book is a well illustrated introduction to the great range of materials used in much of the world's building and construction. It is the only book of its type on the market and suitable for anyone teaching or studying for building trades, architecture, building landscape design, structural engineering and allied disciplines. When first published a reviewer commented: 'This book has filled a large gap in publications available to both students and the building professions.' The Fourth 2009 Edition is now available incorporating many references to current standard codes, research, manufacturers and other authoritative information on the internet to expand content further if needed.

Modern Landscape Architecture Marc Treib, 1994-07-25. Twenty-two essays that provide a forum for assessing the tenets, accomplishments and limits of modernism in landscape architecture and for formulating ideas about possible directions for the future of the discipline. These twenty-two essays provide a rich forum for assessing the tenets, accomplishments and limits of modernism in landscape architecture and for formulating ideas about possible directions for the future of the discipline. During the 1930s Garrett Eckbo, Dan Kiley and James Rose began to integrate modernist architectural ideas into their work and to design a landscape more in accord with the life and sensibilities of their time. Together with Thomas Church whose gardens provided the setting for California living, they laid the foundations for a modern American landscape design. This first critical assessment of modern landscape architecture brings together seminal articles from the 1930s and 1940s by Eckbo, Kiley, Rose, Fletcher Steele and Christopher Tunnard and includes contributions by contemporary writers and designers such as Peirce Lewis, Catherine Howett, John Dixon Hunt, Peter Walker and Martha Schwartz who examine the historical and cultural framework within which modern landscape designers have worked. There are also essays by Lance Necker, Reuben Rainey
