**An Urban Profile of the Middle East** Hugh Roberts, 2020-10-07 Changes in economic and social conditions throughout the Middle East have been profound and perhaps nowhere has this been more evident than in the field of urban development and town planning This book first published in 1979 provides a view of the Middle East as it undergoes transition by identifying and analysing the symptoms of change      *Modern Economics* Jan Pen, Trevor S. Preston, 1969      **Normative Economics in the History of Economic Thought** Sina Badiei, 2024-06-21 This book examines the role of normative economics in the writings of Karl Marx Ludwig von Mises Milton Friedman and Karl Popper The book shows that while distinguishing positive from normative economics can be helpful this distinction should not minimize the importance of normative economics or reject the possibility of offering objective evaluations of social phenomena and policies in normative economics The book offers a critical assessment of the attempts by Marx Mises and Friedman to reduce scientific economics to the positive analysis of social phenomena alone Through a meticulous analysis of their work the book shows that their positive theories fail to justify their evaluations of economic phenomena and policies The book then draws on the writings of Popper to maintain that we should place normative economics at the center of economics The book argues that normative economics can choose the norms underlying its evaluations of social situations and policies objectively and relies on some of Popper's ideas to offer some criteria that can facilitate the selection of these norms The book will be of interest to economists historians of economic thought philosophers of economics and political theorists and philosophers      *Companion to Contemporary Economic Thought* Michael Bleaney, David Greenaway, Dr Ian Stewart, Ian Stewart, 1992-01-09 41 in depth essays cover current economic theory and applied economics in a single comprehensive volume Interfaces section considers economics as it relates to other disciplines Extensive notes bibliographies and suggestions for further reading detailed index of Topics and People A treasure house of stimulating argument and vast amounts of mostly well marshalled information The

Economica The Runaway Economy, **Explorations in Marx's Theory of Price—Why Marx Is Still Relevant for Understanding the Modern Economy** Howard Nicholas, 2023-01-01 This book is the first volume in a three volume series that takes an in depth look at the relevance of Marx's economics for understanding the modern economy The focus of this volume is the money prices of commodities In light of the failure of central banks to stimulate inflation through printing of money it is now accepted that there are problems with the mainstream approach to the explanation of prices Howard Nicholas underlines the shortcomings of this and other approaches to the explanation of prices particularly their concepts of the value of the commodity and money He argues the problems with all other approaches are manifest in their inability to explain the changes in the relative prices of commodities taking place in the context of changes in the aggregate money price level as well as independently He contends that of paramount importance in Marx's explanation is that prices are set by producers prior to putting their commodities into the process of circulation undermining the notion they are determined by the supply of and demand for the commodities in the process of exchange Marx's approach to the explanation of prices is also contrasted with those of Neoclassicals Post Keynesians and Sraffa with a view to highlighting the shortcomings in these approaches as bases for their understanding and explanations of money and prices This book will be of interest to academics and students of price theory money and finance political economy and the history of economic thought **Perspectives on Development** P. F. Leeson, Martin Minogue, 1988 *Marxian Economics: A Reappraisal* Riccardo Bellofiore, 1998-02-12 Springing from a conference held in Bergamo University on the occasion of the centenary of the publication by Engels of the third book of Capital the papers collected in these two volumes reinstate Marx's as the first genuinely evolutionary economic theory In this the capitalist process incessantly brings about states which will by themselves generate the next ones Thus as Schumpeter remarked Marx was the first to visualise what even at the present time is still the economic theory of the future for which we are slowly and laboriously accumulating stone and mortar statistical facts and functional equations

**Rethinking Economics** Stuart Birks, 2014-08-27 This brief responds to the criticism that mainstream economics is currently facing due to its heavy reliance on models and narrow range of quantitative research techniques It takes a broader view identifying issues that are also relevant for heterodox and pluralist approaches to economics By acknowledging that the world of theory is not the same as the reality that we are trying to understand the brief focuses on three paths that generally receive little attention These are from theory to the real world from theory to empirical analysis and from empirical results to

policy application Each path highlights a range of related concerns and qualifications and the focus on these transitions provides a strong basis for critical evaluation of analyses and potentially more realistic results and recommendations It also provides a framework for synthesizing information from alternative schools of thought and across disciplines In addition the importance of framing and rhetoric is demonstrated The brief addresses philosophical and methodological issues using a clear non technical approach that can be easily understood by a non specialist audience

Building Jerusalem John Pick,2013-11-26 A lively and provocative account of the arts in Britain Building Jerusalem suggests that even after fifty years of state planning of Britain s leisure industries the country is nevertheless approaching the millennium in a state of cultural confusion Drawing on a wealth of historical material from Scotland Wales and English provincial towns as well as the more familiar London story Pick and Anderton contend that the original meaning of cultural language has been distorted by the fashionable phrase making of modern government agencies and by the inaccurate and misleading view of cultural history that is constantly presented to the public The authors unfold fascinating stories of Britain s cultural past before state support of the arts They vividly relate the great changes wrought by the industrial revolution and by the development of the twentieth century media and describe the long history of Church and Royal support for the arts as well as the long periods when all of the arts

*Key Discussion Book* ,1965

**Robinson Crusoe's Economic Man** Ulla Grapard,Gillian Hewitson,2012-04-27 In this book economists and literary scholars examine the uses to which the Robinson Crusoe figure has been put by the economics discipline since the publication of Defoe s novel in 1719 The authors critical readings of two centuries of texts that have made use of Robinson Crusoe undermine the pervasive belief of mainstream economics that Robinson Crusoe is a benign representative of economic agency and that he like other economic

agents can be understood independently of historical and cultural specificity The book provides a detailed account of the appearance of Robinson Crusoe in the economics literature and in a plethora of modern economics texts in which for example we find Crusoe is portrayed as a schizophrenic consumer producer trying to maximize his personal well being Using poststructuralist feminist postcolonial Marxist and literary criticism approaches the authors of the fourteen chapters in this volume examine and critique some of the deepest fundamental assumptions neoclassical economics hold about human nature the political economy of colonization international trade and the pervasive gendered organization of social relations The contributors to this volume can be seen as engaging in the emerging conversation between economists and literary scholars known as the New Economic Criticism They offer unique perspectives on how the economy and economic thought can be read through different disciplinary lenses Economists pay attention to rhetoric and metaphor deployed in economics and literary scholars have found new areas to explore and understand by focusing on economic concepts and vocabulary encountered in literary texts
