Buddhism, Knowledge and Liberation David Burton, 2017-03-02 Buddhism is essentially a teaching about liberation from suffering ignorance selfishness and continued rebirth Knowledge of the way things really are is thought by many Buddhists to be vital in bringing about this emancipation This book is a philosophical study of the notion of liberating

knowledge as it occurs in a range of Buddhist sources Buddhism Knowledge and Liberation assesses the common Buddhist idea that knowledge of the three characteristics of existence impermanence not self and suffering is the key to liberation It argues that this claim must be seen in the context of the Buddhist path and training as a whole Detailed attention is also given to anti realist sceptical and mystical strands within the Buddhist tradition all of which make distinctive claims about liberating knowledge and the nature of reality David Burton seeks to uncover various problematic assumptions which underpin the Buddhist worldview Sensitive to the wide diversity of philosophical perspectives and interpretations that Buddhism has engendered this book makes a serious contribution to critical and philosophically aware engagement with Buddhist thought Written in an accessible style it will be of value to those interested in Buddhist Studies and broader issues in comparative philosophy and religion

Plato on the Unity of the Virtues Rod Jenks,2024-04-08 Plato in the Protagoras suggests that the virtues are profoundly unified yet also distinct In Plato on the Unity of the Virtues A Dialectic Reading Rod Jenks argues that the way in which virtues are both one and many is finally ineffable He shows how Plato countenances ineffability throughout his corpus Jenks s interpretation of Protagoras accounts for the otherwise inexplicable inability of both Socrates and Protagoras to identify the bone of contention between them Not only can the thesis not be argued for it can t even be properly stated In this book Jenks shows how the long exegesis on the Simonides poem is philosophically relevant Further he shows that both the parts of the face analogy and the gold analogy are inadequate arguing that Plato intends them to be so Jenks explains why the unity thesis is supported by what most scholars agree are terrible arguments that the virtues are both

one and many He explains why despite the unity claim being profoundly elusive Plato believes it to be crucial that we come to appreciate how virtue which really does have parts can also be profoundly one

Applying Scientific Reasoning to the Field of Marketing Terry Grapentine, 2012-10-03

Marketing decisions often misfire when driven more by beliefs than by knowledge This book will guide you on how to differentiate between the two and to think more clearly and correctly when making those decisions thereby increasing organizational success The author has based this book on the fields of epistemology the study of how knowledge is created and the philosophy of science the study of what it means for a science to be called a science The motivation behind the book is quite simple Given that science is so successful why shouldn't marketers borrow thinking and reasoning skills from science and apply them to marketing Indeed why not The book details the groundwork for learning how to apply scientific reasoning to the field of marketing such as some basic and important definitions What is a belief What is knowledge and identifies barriers to scientific reasoning giving an example from the Dow Chemical Company and just how Dow uses critical thinking and reasoning skills to make more effective marketing and business decisions You'll also learn some real thinking tools you will need to apply scientific reasoning to solving your marketing problems It introduces topics relating to attributes versus constructs the meaning of causation the relationship between coherence and justified beliefs the importance of logic to sound reasoning and the avoidance of logical fallacies in making sound recommendations The book concludes by giving you direction to further improve your ability to apply scientific reasoning to solving marketing problems
