## **Modern European History:**

*Modern European History* Hutton Webster, 1925      The Oxford Handbook of Early Modern European History, 1350-1750 Hamish M. Scott, 2015 This Handbook re-examines the concept of early modern history in a European and global context. The term early modern has been familiar especially in Anglophone scholarship for four decades and is securely established in teaching, research and scholarly publishing. More recently, however, the unity implied in the notion has fragmented while the usefulness and even the validity of the term and the historical periodisation which it incorporates have been questioned. The Oxford Handbook of Early Modern European History 1350-1750 provides an account of the development of the subject during the past half century but primarily offers an integrated and comprehensive survey of present knowledge together with some suggestions as to how the field is developing. It aims both to interrogate the notion of early modernity itself and to survey early modern Europe as an established field of study. The overriding aim will be to establish that early modern is not simply a chronological label but possesses a substantive integrity. Volume II is devoted to Cultures and Power, opening with chapters on philosophy, science, art and architecture, music and the Enlightenment. Subsequent sections examine Europe beyond Europe with the transformation of contact with other continents during the first global age and military and political developments, notably the expansion of state power.

Modern European History Charles Downer Hazen, 1919      The Politics of Moderation in Modern European History Ido de Haan, Matthijs Lok, 2019-09-04 This book charts the varieties of political moderation in modern European history from the French Revolution to the present day. It explores the attempts to find a middle way between ideological extremes from the nineteenth century: *Juste Milieu* and balance of power via the Third Ways between capitalism and socialism to the current calls for moderation beyond populism and religious radicalism. The essays in this volume are inspired by the widely recognized need for a more nuanced political discourse. The contributors demonstrate how the history of modern politics offers a range of experiences and examples of the search for a middle way that can help us to navigate the tensions of the current political climate. At the same time, the volume offers a diagnosis of the problems and pitfalls of Third Ways of finding the middle between extremes and of the weaknesses of the moderate point of view.
