A manual of naval tactics: together with a brief critical analysis of the principal modern naval battles ... With an appendix, being an extract from Sir H. Douglas's "Naval warfare with steam." James Harmon Ward, 1859     *Understanding Modern Warfare* David Jordan, James D. Kiras, David J. Lonsdale, Ian Speller, Christopher Tuck, C. Dale Walton, 2016-07-14 A fully revised and updated new edition of this leading introduction to the theory and conduct of warfare in the twentieth and twenty first centuries The book combines analysis of key concepts theory and military doctrine with reference to relevant examples from history and integrates the land sea and air environments     **Makers of Modern Strategy from Machiavelli to the Nuclear Age** Peter Paret, Gordon A. Craig, Felix Gilbert, 2010-10-01 Authoritative and convincing New York Times Book Review The classic reference on the theory and practice of war The essays in this volume analyze war its strategic characteristics and its political and social functions over the past five centuries The diversity of its themes and the broad perspectives applied to them make the book a work of general history as much as a history of the theory and practice of war from the Renaissance to the present *Makers of Modern Strategy from Machiavelli to the Nuclear Age* takes the first part of its title from an earlier collection of essays that became a classic of historical scholarship Three essays are repinted

from the earlier book while four others have been extensively revised The rest twenty two essays are new The subjects addressed range from major theorists and political and military leaders to impersonal forces Machiavelli Clausewitz and Marx and Engels are discussed as are Napoleon Churchill and Mao Other essays trace the interaction of theory and experience over generations the evolution of American strategy for instance or the emergence of revolutionary war in the modern world Still others analyze the strategy of particular conflicts the First and Second World Wars or the relationship between technology policy and war in the nuclear age Whatever its theme each essay places the specifics of military thought and action in their political social and economic environment Together the contributors have produced a book that reinterprets and illuminates war one of the most powerful forces in history and one that cannot be controlled in the future without an understanding of its past

**A Manual of Naval Tactics** James Harmon Ward, 1865      The Evolution of Modern Grand Strategic Thought Lukas Milevski, 2017-07-04

In strategic studies and international relations grand strategy is a frequently invoked concept Yet despite its popularity it is not well understood and it has many definitions some of which are even mutually contradictory This state of affairs undermines its usefulness for scholars and practitioners alike Lukas Milevski aims to remedy this situation by offering a conceptual history of grand strategy in the English language analysing its evolution from 1805 to the present day in the writings of its major proponents In doing so he seeks to clarify the meaning and role of the concept both theoretically and practically and shed light on its continuing utility today

*The New Makers of Modern Strategy* Hal Brands, 2023-05-02

First published by Princeton in 1943 the collection of essays that constituted *Makers of Modern Strategy* has largely held the field as the key book that studied the means and ends of military power and thought and the historical figures that shaped that history The books in two editions have long been a staple of Princeton's backlist in international politics and strategic studies The first edition edited by Edward Mead Earle and subtitled *Military Thought from Machiavelli to Hitler* emerged out of a seminar of foreign policy and security experts organized between Princeton and the Institute of Advanced Study in reaction to World War II as a global conflict The subsequent edition edited by Peter Paret then at Stanford University was prepared in the early 1980s and subtitled *From Machiavelli to the Nuclear Age* In that edition three essays were reprinted from the earlier book four others were revised and the remainder twenty two essays were wholly new to reflect the updates in the field and also how the global political context had changed The two books together are regarded as the founding and leading text in military and strategic studies containing influential essays by many of the best known scholars of the subject The ambition of the new volume is to commission an entirely new edition of this classic reference work with 37 chapters organized into 5 sections covering key military leaders and the most important elements of strategic thinking since Thucydides and Sun Tzu The field of strategic and military history has witnessed an intellectual renaissance in recent decades as the number of strategic challenges faced by the world has grown enormously International politics has also changed The Cold War ended and the Soviet Union disappeared The United States entered a

period of unipolarity only to see it challenged by the rise of new powers China in particular Terrorism civil wars so called rogue states insurgency and counter insurgency and cybersecurity all joined a growing list of strategic concerns New technologies promise to upend our understanding of conflict Furthermore scholars have learned more about earlier periods from the classic thinkers of strategy to the struggles of great power war to the dynamics of world politics during the Cold War Finally scholarship on international politics war and peace in the 20th century and after has become increasingly internationalized with the opening of new archives and the incorporation of new perspectives The aim of this volume is to serve as an overview and stimulant to research in this field one that encompasses the broader definitions of strategy in current research reflects the current state of world politics and also takes a more global and less Western perspective Publisher's description

**War, Strategy and the Modern State, 1792-1914** Carl Cavanagh Hodge, 2016-11-25 This book is a comparative study of military operations conducted by modern states between the French Revolution and World War I It examines the complex relationship between political purpose and strategy on the one hand and the challenge of realizing strategic goals through military operations on the other It argues further that following the experience of the Napoleonic Wars military strength was awarded a primary status in determining the comparative modernity of all the Great Powers that military goals came progressively to distort a sober understanding of the national interest that a genuinely political and diplomatic understanding of national strategy was lost and that these developments collectively rendered the military and political catastrophe of 1914 not inevitable yet probable
