Parliaments and Citizens Cristina Leston-Bandeira, 2016-04-22 The relationship between parliaments and citizens is one of the least studied subjects in legislative studies yet this is a crucial dimension to understand parliaments and the role they play in our political systems Furthermore this relationship has gained considerable visibility over the last decade thanks in part to the development of new media but also as a reaction to the trends of political apathy In a context of increasing political disengagement parliamentary discourse shifted attention from the traditionally predominant relationship with government to the relationship with citizens Issues of legitimacy became more directly associated with the link between parliament and citizens resulting in investment in new and more complex mechanisms for contact with citizens even in the more centralised systems This book looks at a wide range of case studies across Europe and beyond assessing overall strategies in the move towards stronger engagement with citizens It assesses the extent to which the shift in discourse has led to actual changes in parliamentary practice This book was published as a special issue of the Journal of Legislative Studies

The History of Parliamentary Behavior William O. Aydelotte, 2015-03-08 In this volume thirteen American and European scholars show how a variety of mathematical tools may be used to attack major questions in the history of parliamentary behavior Their essays treat key topics related to the varied but comparable circumstances of seven countries These topics include recruitment and career patterns actions and decisions of legislators as revealed by their roll call votes and hypotheses that might help explain legislative behavior Historians have long been interested in the study of parliaments but the recent application of quantitative techniques has made possible the effective use of data too voluminous to be comprehended by traditional methods These techniques have also permitted a

more precise and searching examination of certain controversial questions These essays provide a new measure of and challenge to long accepted views regarding the operation of parliaments Contributors William O Aydelotte Aage R Clausen Gudmund Hernes S ren Holmberg Geoffrey Hosking Anthony King Donald R Matthews Mogens N Pedersen Douglas Price Antoine Prost Christian Rosenzweig Peter H Smith and James A Stimson Originally published in 1977 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905
