On The Farm Front The Womens Land Army In World War II:

On the Farm Front Stephanie A. Carpenter, 2018-12-17 Rosie the Riveter is an icon for women's industrial contribution to World War II but history has largely overlooked the three million women who served on America's agricultural front. The Women's Land Army sent volunteers to farms, canneries, and dairies across the country, accounting for the majority of wartime agricultural labor. *On the Farm Front* tells for the first time the remarkable story of these women who worked to ensure both Freedom from Want at home and victory abroad. Formed in 1943 as part of the Emergency Farm Labor Program, the WLA placed its workers in areas where American farmers urgently needed assistance. Many farmers in even the most desperate areas, however, initially opposed women working their land. Rural administrators in the Midwest and the South yielded to necessity and employed several hundred thousand women as farm laborers by the end of the war, but those in the Great Plains and eastern Rocky Mountains remained hesitant, suffering serious agricultural and financial losses as a consequence. Lynne Carpenter reveals for the first time how the WLA revolutionized the national view of farming. By accepting all available women as agricultural workers, farmers abandoned traditional labor and stereotypical social practices. When the WLA officially disbanded in 1945, many of its women chose to remain in their agricultural jobs rather than return to a full-time home life or prewar employment. *On the Farm Front* illuminates the Women's Land Army's unique contribution to prosperity and victory, showing how this landmark organization changed the role of women in American society. **At the**

Agricultural Front Stephanie Ann Carpenter, 1997 The importance of the WLA on women's lives and agriculture is represented by the number of women who remain employed in the 1950s. With World War II being perceived as either the defining event for women to join the work force or only influencing them to join the labor market, the WLA, as an example, demonstrates that the use of women as agricultural workers in World War II altered the previous concept and structure of farm labor on the national and regional scale. [American Women During World War II](#) Doris Weatherford, 2009-10-16

American Women during World War II documents the lives and stories of women who contributed directly to the war effort via official and semi-official military organizations as well as the millions of women who worked in civilian defense industries ranging from aircraft maintenance to munitions manufacturing and much more. It also illuminates how the war changed the lives of women in more traditional home front roles. All women had to cope with rationing of basic household goods, and most women volunteered in war-related programs. Other entries discuss institutional change as the war affected every aspect of life, including schools, hospitals, and even religion. *American Women during World War II* provides a handy one-volume collection of information and images suitable for any public or professional library. *At Grandma's House* H. Byron Earhart, 2020-08-21 Illinois State Historical Society Certificate of Excellence Winner 2021 When H. Byron Earhart's father enlisted in the U.S. Navy in 1942, young Byron and his family moved into his grandparents' old-fashioned home with a coal-fired range and potbelly stove, and his mother took charge of the family business, a frozen food locker. Grandma was the

undisputed head of the family While his father served on the battleship USS Missouri his grandparents and mother held the family and the business together At Grandma s House is a tribute to everyday Americans who provided the social glue for a country at war as they balanced fear and anxiety for loved ones with the challenges and pleasures of daily life The experiences of the Earhart family and this Midwestern community supplemented by contemporary documents family photos and professional illustrations recount with vivid local color the drama that played out on the national and international stage

Fresh Susanne Freidberg, 2010-10-01 That rosy tomato perched on your plate in December is at the end of a great journey not just over land and sea but across a vast and varied cultural history This is the territory charted in Fresh Opening the door of an ordinary refrigerator it tells the curious story of the quality stored inside freshness We want fresh foods to keep us healthy and to connect us to nature and community We also want them convenient pretty and cheap Fresh traces our paradoxical hunger to its roots in the rise of mass consumption when freshness seemed both proof of and an antidote to progress Susanne Freidberg begins with refrigeration a trend as controversial at the turn of the twentieth century as genetically modified crops are today Consumers blamed cold storage for high prices and rotten eggs but ultimately aggressive marketing advances in technology and new ideas about health and hygiene overcame this distrust Freidberg then takes six common foods from the refrigerator to discover what each has to say about our notions of freshness Fruit for instance shows why beauty trumped taste at a surprisingly early date In the case of fish we see how the value of a living quivering catch has ironically hastened the death of species And of all supermarket staples why has milk remained the most stubbornly local Local livelihoods global trade the politics of taste community and environmental change all enter into this lively surprising yet sobering tale about the nature and cost of our hunger for freshness World War II Spencer C.

Helen M. Schneider, 2011-03-01 For many the term home economics conjures images of sterile classrooms where young girls

and women learn to cook dinner and swaddle dolls far removed from the seats of power Keeping the Nation's House unsettles this assumption by revealing how elite Chinese women helped to build modern China one family at a time Trained between the 1920s and the early 1950s home economists believed that their discipline would transform the most fundamental of political spaces the home by teaching women to nurture ideal families and manage projects of social reform Although their discipline came undone after 1949 it created a legacy of gendered professionalism and reinforced the idea that leaders should shape domestic rituals of the people By focusing on an overlooked group of Chinese women this book genders the past by showing how these women helped make the present and it reveals how a group of intellectuals made the transition to the Communist era WarTalk Hilary Footitt, Simona Tobia, 2015-12-04 Offering a new perspective on the British experience of the Second World War in Europe this book provides a series of snapshots of the role which languages played in the key processes of British war making moving from frameworks of perception and intelligence gathering through to liberation occupation and on to the aftermath of conflict
