Environmental Science 6e (paper) Daniel D. Chiras, 2013 Earth Isaac Asimov, 1974 Summary Discusses the problems faced by the Earth s inhabitants as population increases and energy sources food and land become more scarce *Bulletin of the Atomic Scientists* , 1981-06 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin s iconic Doomsday Clock stimulates solutions for a safer world **Diseases at the Wildlife - Livestock Interface** Joaquín Vicente, Kurt C. Vercauteren, Christian Gortázar, 2021-04-29 Shared diseases among wildlife livestock and humans often transboundary are relevant to public health and global economy as being highlighted currently relative to the global COVID19 pandemic Diseases at these interfaces also impact the conservation of biodiversity and must be considered

when managing wildlife While wildlife and domestic livestock have coexisted in dynamic systems for thousands of years spillover disease risks are higher today than in the past due to global patterns of increasing close contact and interactions among wildlife livestock and humans in the context of complex diverse and numerous circumstances Multidisciplinary studies of animal interfaces especially those involving wildlife therefore must be brought to the forefront so that knowledge gaps can be realized and filled to inform managers and policy makers In the first part of the book authors illustrate and discuss ecological and epidemiological concepts related to the interfaces with a vision towards socio ecological system health In addition the history of past animal interfaces provides the necessary perspective to focus current questions better understand present situations and informs how we can best approach the future The second part discusses the myriad of similar and differing wildlife livestock interfaces found around the world from a regional point of view The third part focuses on how to assess the spatial and temporal overlap between livestock and wildlife and authors present new technical innovations about how inter transmissions between wild and domestic populations can be quantified An overview of main modeling approaches available to quantify multi host disease transmission at the wildlife livestock interface illustrated with specific case studies is also presented Finally the need for interdisciplinary approaches and a dedicated thematic field to approach the wildlife livestock interfaces and create opportunities to promote wildlife livestock coexistence is emphasized The concluding chapter presents perspectives and directions to better understanding disease dynamics at the wildlife livestock interface global change and implications for the future The changing distribution of interfaces ongoing human and environmental changes e g climate warming changes in animal production systems etc and their likely impacts and consequences for the interfaces and disease transmission processes are all discussed

Population Geography Helen D. Hazen, Heike C. Alberts, Kazimierz J. Zaniewski, 2023-07-06 Population Geography Social Justice for a Sustainable World surveys the ways in which geographic approaches may be applied to population issues exploring how human populations are embedded in natural and social environments It encourages students to evaluate population issues critically given that population topics are at the heart of many of today s most contentious subjects Through introducing students to different lenses of analysis ecological economic and social equity the authors ask students to consider how different perspectives can lead to different conclusions on the same issue Identifying and tackling today s population problems therefore requires an understanding of these diverging and sometimes conflicting perspectives The text covers all the key background information critical to any book on population geography population size distribution and composition fertility mortality and migration population and resources but also pushes students to think critically about the materials they have covered using the perspectives of sustainability and social justice In this way students move beyond simple fact learning toward higher level skills such as analysis synthesis and evaluation of materials This textbook will be a valuable resource for students of human geography population geography demography and diaspora studies
