Gardner's theory of multiple intelligences has revolutionized the way we think about being smart. Written by an award-winning expert on the topic, this book introduces the theory, explains the different types of intelligences like Word Smart, Self Smart, Body Smart, and helps kids identify their own learning strengths and use their special skills at school, at home, and in life. As kids read the book, they stop asking "How smart am I?" and start asking "How am I smart?" This powerful learning tool is recommended for all kids and all adults committed to helping young people do and be their best. Resources describe related books, software, games, and organizations. This revised and updated edition includes information on a newly researched ninth intelligence, Life Smart, thinking about and asking questions about life, the universe, and spirituality. **Nonfiction Reading Power** Adrienne Gear, 2008. Help students think while they read in all subject areas with the key skills of connecting, questioning, visualizing, inferring, and synthesizing. *The Philosophy Foundation* Peter Worley, 2012-09-30. Imagine a one-stop shop stacked to the rafters with everything you could ever want to tap into young people's natural curiosity and get them thinking deeply. Well, this is it. Edited by professional philosopher Peter Worley from The Philosophy Shop and with a foreword by Ian Gilbert, this book is jam-packed with ideas, stimuli, thought experiments, activities, short stories, pictures, and questions to get young people thinking philosophically. Primarily aimed at teachers to use as a stimuli for philosophical enquiries in the classroom or even as starter activities to get them thinking from the off, it can also be used by parents for some great family thinking or indeed anyone fed up of being told what to think or urged not to think and who wants a real neurological workout. The proceeds of the book are going towards The Philosophy Foundation charity. **Philosophy and Education** Roberta Israeloff, Jana Mohr Lone, 2013-01-15. Are children natural philosophers? They are curious about questions such as the meaning and purpose of being alive and whether we can know anything at all. Pre-college philosophy takes as a starting point young people's inherent interest in large questions about the human condition. *Philosophy and Education: Introducing Philosophy to Young People* seeks to illuminate the ways in which philosophy can strengthen and deepen pre-college education. The book examines various issues involved in teaching philosophy to young people at different grade levels, including assessing what teachers need in order to teach philosophy and describing several models for introducing philosophy into schools. Ways to explore specific branches of philosophy: ethics, epistemology, metaphysics, aesthetics, and logic through literature, thought experiments, and games, and activities as well as traditional philosophy texts are described. The book's final section considers student assessment and program evaluation and analyzes the contributions pre-college philosophy can make to education in general. Teachers and educators and parents all want young people to grow up with the skills they need to pursue their own goals and become productive and successful adults. Thinking independently and reasoning clearly are central to these objectives. Philosophy helps students develop some of the analytic skills they need to engage in thoughtful decision-making throughout their lives, and the richness of the questions involved can help young people maintain their awareness of the world as marvelous and mysterious. **Philosophy in Education** Jana Mohr Lone, Michael
