Philosophy of Science Philipp Frank, 2004-01-01 A great mathematician and teacher bridges the gap between science and the humanities in this exposition of the philosophy of science Philipp Frank a distinguished physicist and philosopher in his own right traces the history of science from Aristotle to Einstein to illustrate philosophy's ongoing role in the scientific process Suitable for undergraduate students and other readers this volume explains modern technology's role in the gradual erosion of the rapport between physical theories and philosophical systems and offers suggestions for restoring the link between these related areas Dr Frank examines the ancient Greek concept of natural science to illustrate the development of modern science then using geometry as an example he charts its progress from Euclidean principles through the interpretations of Descartes Mill Kant and the rise of four dimensional and non Euclidean geometry Additional topics include the laws of motion before and after innovations of Galileo and Newton perceptions of motion light and relativity through the ages metaphysical interpretations of relativistic physics the motion of atomic objects and the phenomena and formulations of atomic physics and the principle of causality and the validation of theories

The Structural Links between Ecology, Evolution and Ethics Donato Bergandi, 2013-01-06 Evolutionary biology ecology and ethics at first glance three different objects of research three different worldviews and three different scientific communities In reality there are both structural and historical links between these disciplines First some topics are obviously common across the board Second the emerging need for environmental policy management has gradually but radically changed the relationship between these disciplines Over the last decades in particular there has emerged a need for an interconnecting meta paradigm that integrates more strictly evolutionary studies biodiversity studies and the ethical frameworks that are most appropriate for allowing a lasting co evolution between natural and social systems Today such a need is more than a mere luxury it is an epistemological and practical necessity

The Possibility of Naturalism Roy Bhaskar, 2014-07-17 Since its original publication in 1979 The Possibility of Naturalism has been one of the most influential works in contemporary philosophy of science and social science It is one of the cornerstones of the critical realist position which is now widely seen as offering perhaps the only viable alternative to positivism and post positivism This fourth edition contains a new foreword from Mervyn Hartwig who is founding editor of the Journal of Critical Realism and editor and principal author of the Dictionary of Critical Realism

German Idealism as Constructivism Tom Rockmore, 2016-05-03 German Idealism as Constructivism is the culmination of many years of research by distinguished philosopher Tom Rockmore it is his definitive statement on the debate about German idealism between proponents of representationalism and those of constructivism that still plagues our grasp of the history of German idealism and the whole epistemological project today Rockmore argues that German idealism which includes iconic thinkers such as Kant Fichte Schelling and Hegel can best be understood as a constructivist project one that asserts that we cannot know the mind independent world as it is but only our own mental construction of it Since ancient

Greece philosophers have tried to know the world in itself an effort that Kant believed had failed His alternative strategy which came to be known as the Copernican revolution was that the world as we experience and know it depends on the mind Rockmore shows that this project was central to Kant's critical philosophy and the later German idealists who would follow him He traces the different ways philosophers like Fichte Schelling and Hegel formulated their own versions of constructivism Offering a sweeping but deeply attuned analysis of a crucial part of the legacy of German idealism Rockmore reinvigorates this school of philosophy and opens up promising new avenues for its study Newspapers International Federation of Library Associations,2011 This volume comprises contributions of three conferences on legal deposit in a digital environment on web harvesting and archiving as well as newspapers in the geographical context of the Mediterranean The main focus is on how to acquire preserve and make available digital files Issues that continue to be hot topics also in a world dominated by monographs **Deleuze and Guattari's What is Philosophy?** Jeffrey A Bell,2016-01-31 In their final collaborative work Deleuze and Guattari set out to address the question what is philosophy Their answer is simple enough philosophy is the art of forming inventing and fabricating concepts Following the chapters and themes of What
