Markides,Paul A. Geroski,2004-09-24 Discover why being a fast second is often more financially rewarding than being at the cutting edge If you get there first you ll lead the pack right Not necessarily The skill sets of most established companies say strategy experts Constantinos Markides and Paul Geroski are far better suited to scaling up newly created markets pioneered by others in other words being fast seconds than to creating these markets from scratch In *Fast Second* they explore the characteristics of new markets describe the skills needed to create and compete in them and show how these skills match up with different types of companies Drawing on examples of successful fast second firms such as Microsoft Amazon Canon JVC Heinz and many others they illustrate how to determine which new markets have the potential to be successful and how to move into them before the competition does when to make a move into a new market how to scale up a market where to position a company in the market and whether to be a colonizer or a consolidator Order your copy today *The Future of Strategy: A Transformative Approach to Strategy for a World That*

Won't Stand Still Johan Aurik, Martin Fabel, Gillis Jonk, 2015-01-02 Own the Future of Your Industry with a Transformational Strategy Designed for Today's Business World Leaders today are inundated with strategic opportunities besieged by business disruptions and pressured to innovate to do things better faster or differently The CEO of a Fortune 500 firm explains it best I am looking at 23 different strategic initiatives Trying to develop and implement so many strategies is like trying to change the driver tires the oil and the bumpers paint the body and tune the engine And doing all of this on a car that's running at full speed The answer used to be found in strategy But in the past decade the commonly deployed large scale strategic exercises were largely discredited They were slow and elaborate and did not deliver the expected returns let alone help make sense of a glut of initiatives or cope with an increasingly unpredictable future The Future of Strategy brings strategy back from those big top down plans It answers the questions of executives facing tumultuous business conditions and rapidly shifting markets Is strategy still possible Yes Aren't strategies outdated before they can be implemented Not if they are done right Rather than developing strategy aren't we better off being agile and able to capitalize on emerging trends faster than our peers Agility complements strategy it cannot replace it This book is about reversing course and repositioning strategy in its rightful place as the overarching management system The authors introduce their core methodology designed to future proof companies against the friction and fog of war that inexorably accompany changing times They synthesize three fundamental principles that when combined provide the means to reclaim strategy Take direct cues from fundamental trends affecting the company going forward Engage people across the company to translate these cues into strategy and effectively eliminate the handover hurdle between formulation and execution a major reason for strategy failure Capture the output as competitive opportunities and manage their life cycles when some have run their course others are ready to take over Strategy today requires stepping over the shadows of one's own ingrained beliefs to capture new opportunities This book reveals the inner workings of transformational strategies developed by leaders who gradually become more successful by advancing winning combinations of attitudes values habits and practices
