

A nighttime photograph of a street in Quito, Ecuador. On the left, a tall church tower with a cross on top is illuminated. The street is paved with cobblestones and has a few people walking. On the right, there is a long, low building with many columns, also illuminated. In the bottom right corner, a modern white bus with the 'SHUNAUTO' logo is visible. The sky is dark blue.

Bolívar, Liberator of Venezuela, Colombia, Ecuador, Peru and Bolivia Henry Rowan Lemly,1923 List of Officers of the Department of State, Including the List of Ministers, Consuls, and Other Diplomatic and Commercial Agents of the United States in Foreign Countries United States. Department of State,1953 List for March 7 1844 is the list for September 10 1842 amended in manuscript , **The Popular Encyclopedia** ,1841 **The Popular Encyclopedia;: pt. 1: On the rise and progress of literature [part 1], Canaille-Congress** Sir Daniel Keyte Sandford,1836 The Popular Encyclopedia; Or "Conversations Lexicon": Being a General Dictionary of Arts, Science, Literature, Biography, History, Ethics and Political Economy Encyclopaedias,1841 **Environmental Technology and its Role in the Search for Urban Environmental Sustainability** Santiago Mejía-Dugand,2015-05-18 The aim of this thesis is to analyze the role that environmental technology plays in the solution of environmental problems in cities and discuss models and conditions that can facilitate the processes of selection implementation and use of environmental technologies in and by cities The technological component is perhaps one of the most important characteristics of modern cities The dependence of humans on technology is in most cases a given something that is not ignored in the sustainability debate The development and implementation of new better technologies is however hindered by the inertia that modern societies have and the influence of the dominant systems e g economic systems based on growth extraction of natural resources and

environmental disturbance So called environmental technologies are not always able to efficiently compete against other technologies that are embedded in societies by lock in mechanisms e g learning by doing and using scale economies subsidies and network externalities Even with the right technologies an exclusively techno centered approach to sustainability can result in other problems and it might reduce the sustainability debate and the cities role in it to discussions of an administrative nature The actual role of local actors and their agency must be also considered in the models and frameworks directed at understanding sustainability transition processes It is thus important to analyze the dynamics of technology selection implementation use and diffusion in cities from a stakeholders perspective as well Not only is the availability of technology of interest for understanding the impact it has on the environment but also the intensity of its use This has resulted in increased attention from politicians and scholars on the so called global cities e g London New York Tokyo which are characterized by their intense use of e g transport security and surveillance and information and communication Paradigmatic models of sustainability can however be contested when the role of local actors power and agency are considered in detail and not isolated from the context Some authors recognize the need to address what they call ordinary cities since focusing on the cities comparative level of development be it political economic or technological hinders the possibility of bidirectional learning In the end sustainability is a collective good which means that it is in everyone s interest to coordinate efforts and learn from the best practices regardless of where they come from This thesis focuses on ordinary cities and promises to offer conclusions that can contribute to a better understanding of how societies can learn from each other and how environmental technologies can have deeper and better results when implemented in different contexts than the ones where they were developed Two questions related to the process of environmental technology adaptation are addressed in this thesis How do technology adaptation processes for the solution of urban environmental problems take place in cities And how do cities benefit from environmental technologies It is found that environmental technology is not only seen as a solution to environmental problems in cities but every day more as a component of strategies to attract attention and compete for resources in national and international markets Cities have different adaptation and learning strategies This means that technological solutions have to be flexible and adaptive to local conditions and allow for vernacular knowledge and past experiences to enrich their performance by facilitating their connection to existing systems Learning between cities is important and necessary for global sustainability transitions When it comes to environmental technology this process is facilitated by strong proof of concept projects Such projects are not only expected to be able to show their technical ability to solve a problem but must also offer contextual connections to the problems faced by interested cities or potential implementers

International Research Group,2022-11-07 We are witnessing a worldwide resurgence of reactionary ideologies and movements combined with an escalating assault on democratic institutions and structures Nevertheless most studies of these phenomena remain anchored in a methodological nationalism while comparative research is almost entirely limited to the Global North Yet authoritarian transformations in the South and the struggles against them have not only been just as dramatic as those in the North but also preceded them and consequently have been studied by Southern scholars for many years This volume brings together the work of more than 15 scholar activists from across the Global South combining in depth studies of regional processes of authoritarian transformation with a global perspective on authoritarian capitalism With a foreword by Ver nica Gago
