R D Management Systems In Japanese Industry:

R & D Management Systems in Japanese Industry Hajime Etō, Konomu Matsui, 1984 Interest in Japanese innovations leads to an interest in R D management systems and strategies in Japanese industry Since Japanese management and Japanese innovations differ from those of the West the R D management systems and strategies formation process may well be different in Japan than in the West Recognizing this difference will surely contribute to the methodological progress in the related disciplines and interdisciplinary approaches *Management of Software Engineering Innovation in Japan* Yasuo Kadono, 2015-10-14 This book assesses the achievements of the software engineering discipline as represented by IT vendors in Japan in order to deepen understanding of the mechanisms of how software engineering capabilities relate to IT vendors business performance and business environment from the perspective of innovation and engineering management Based on the concepts of service science and science for society the volume suggests how to improve the sophistication of services between the demand side i e IT user companies and the supply side i e IT vendors simultaneously The author and his colleagues developed a structural model including innovational paths such as service innovation product innovation and process innovation and a measurement model including the seven software engineering capabilities deliverables project management quality assurance process improvement research and development human resource development and customer contact Then they designed research on software engineering excellence and administered it with the Japanese Ministry of Economy Trade and Industry and Information Technology Promotion Agency Through statistical analyses of the results they found that human resource development and R D are significant fundamental conditions to improve the quality of the deliverables and that IT firms with high levels of deliverables derived from high levels of human resource development quality assurance project management and process improvement tend to sustain high profitability In addition they developed a measurement model based on Porter's five forces and Barney's resource based view A regression tree analysis suggested that manufacturer spin off vendors tend to expand business with well resourced R D whereas user spin off vendors tend to depend heavily on parent company demand **Japan's Software Factories** Michael A. Cusumano, 1991-05-16 Though Japan has successfully competed with U S companies in the manufacturing and marketing of computer hardware it has been less successful in developing computer programs This book contains the first detailed analysis of how Japanese firms have tried to redress this imbalance by applying their skills in engineering and production management to software development Cusumano focuses on the creation of software factories in which large numbers of people are engaged in developing software in cooperative ways i e individual programs are not developed in isolation but rather utilize portions of other programs already developed whenever possible and then yield usable portions for other programs being written Devoting chapters to working methods at System Developing Corp Hitachi Toshiba NEC and Fujitsu and including a comparison of Japanese and U S software factories Cusumano's book will be important reading for all people involved in software and computer technology
