The Tuning of the World R. Murray Schafer, 1977 The soundscape is our acoustic environment the ever present noises with which we all live The author suggests that we now suffer from acoustical overload and are less able to hear the nuances and subtleties of sound Our task he maintains is to listen analyze and make distinctions in spite of sound pollution **R.**

Murray Schafer L. Brett Scott, 2019-01-21 R Murray Schafer A Creative Life is the authoritative exploration of the life and work of this preeminent Canadian composer artist educator and activist Working closely with the composer and his family L Brett Scott has created the most up to date and accurate exploration of Schafer Scott draws on many public and private sources including the composer's own journals and correspondence which have not been previously available to researchers Scott discusses Schafer's extensive writings including his research writings on Ezra Pound and E T A Hoffmann and his multiple works of fiction The volume also includes a detailed summary of Schafer's work in the field of acoustic ecology and recognition of his role as founder of the World Soundscape Project as well as an overview of his writings on creative music education With complete discussions of his theater works choral compositions compositions for voice chamber pieces orchestral compositions and early and transitional works and a chronological list of compositions and select discography this volume presents the most comprehensive study of Schafer and his enduring legacy **R. Murray Schafer : a Collection** R.

Murray Schafer, 1979 **The Soundscape** R. Murray Schafer, 1993-10-01 The soundscape a term coined by the author is our sonic environment the ever present array of noises with which we all live Beginning with the primordial sounds of nature we have experienced an ever increasing complexity of our sonic surroundings As civilization develops new noises rise up around us from the creaking wheel the clang of the blacksmith's hammer and the distant chugging of steam trains to the sound imperialism of airports city streets and factories The author contends that we now suffer from an overabundance of acoustic information and a proportionate diminishing of our ability to hear the nuances and subtleties of sound Our task he maintains is to listen analyze and make distinctions As a society we have become more aware of the toxic wastes that can enter our bodies through the air we breathe and the water we drink In fact the pollution of our sonic environment is no less real Schafer emphasizes the importance of discerning the sounds that enrich and feed us and using them to create healthier environments To this end he explains how to classify sounds appreciating their beauty or ugliness and provides exercises and soundwalks to help us become more discriminating and sensitive to the sounds around us This book is a pioneering exploration of our acoustic environment past and present and an attempt to imagine what it might become in the future
