book is one of the first to examine the intersections between literature and the environment from the perspective of the oppressions of race class gender and nature and the first to review American Indian literature from the standpoint of environmental justice and ecocriticism By examining such texts as Sherman Alexie s short stories and Leslie Marmon Silko s novel *Almanac of the Dead* Adamson contends that these works in addition to being literary are examples of ecological criticism that expand Euro American concepts of nature and place Adamson shows that when we begin exploring the differences that shape diverse cultural and literary representations of nature we discover the challenge they present to mainstream American culture environmentalism and literature By comparing the work of Native authors such as Simon Ortiz with that of environmental writers such as Edward Abbey she reveals opportunities for more multicultural conceptions of nature and the environment More than a work of literary criticism this is a book about the search to find ways to understand our cultural and historical differences and similarities in order to arrive at a better agreement of what the human role in nature is and should be It exposes the blind spots in early ecocriticism and shows the possibilities for building common ground a middle place where writers scholars teachers and environmentalists might come together to work for social and environmental change

**Pests in the City** Dawn Day Biehler, 2013-11-01. From tenements to alleyways to latrines, twentieth-century American cities created spaces where pests flourished and people struggled for healthy living conditions. In *Pests in the City*, Dawn Day Biehler argues that the urban ecologies that supported pests were shaped not only by the physical features of cities but also by social inequalities, housing policies, and ideas about domestic space. Community activists and social reformers strived to control pests in cities such as Washington, DC, Chicago, Baltimore, New York, and Milwaukee, but such efforts fell short when authorities blamed families and neighborhood culture for infestations rather than attacking racial segregation or urban disinvestment. Pest control campaigns tended to target public or private spaces, but pests and pesticides moved readily across the porous boundaries between homes and neighborhoods. This story of flies, bedbugs, cockroaches, and rats reveals that such creatures thrived on lax code enforcement and the marginalization of the poor, immigrants, and people of color. As Biehler shows, urban pests have remained a persistent problem at the intersection of public health, politics, and environmental justice, even amid promises of modernity and sustainability in American cities. Powell, 2016-11-14 Miles Powell explores how early conservationists became convinced that the vitality of America's white races depended on preserving the wilderness. **American Unexceptionalism** Kathy Knapp, 2014-05 The novels in question all take place in the sprawling terrain that stretches out beyond the Twin Towers: the postwar suburbs that since the end of World War II have served like the Twin Towers themselves as a powerful advertisement of dominance to people around the globe by projecting an image of prosperity and family values. These suburban tales and their everyman protagonists grapple, however indirectly, with the implications of the apparent decline of the economic, geopolitical, and moral authority of the United States. In the context of perceived decay and diminishing influence, these novels actively counteract the narrative of American exceptionalism frequently peddled in the wake of 9/11.
