Philippe Rushton, 1999 Race, Evolution, and Behavior J. Philippe Rushton, 1997-01 Testing for racial differences in behavior has been much neglected over the past sixty years And when not subject to neglect to strongly negative imputations among professionals and politicians alike According to J Philippe Rushton substantial racial differences do exist and their pattern can only be explained adequately from an evolutionary perspective In Race Evolution and Behavior he reviews international data and finds a distinct pattern People of East Asian ancestry and people of African ancestry are at opposite ends of a continuum with people of European ancestry intermediate albeit with much variability within each broad grouping This volume is sure to be controversial as Rushton attempts nothing less than a paradigmatic change in the way social scientists approach their work especially those concentrated in the study of racial differences Race Evolution and Behavior must be read by sociologists anthropologists and black studies specialists *Race, Evolution, and Behavior* J. Rushton, 2013-07-28 New edition A masterpiece of modern racial science grounded in irrefutable fact Testing for racial differences in behavior has been much neglected over the past sixty years And when not subject to neglect to strongly negative imputations among professionals and politicians alike According to J Philippe Rushton substantial racial differences do exist and their pattern can only be explained adequately from an evolutionary perspective In this book the author reviews international data and finds a distinct pattern People of East Asian ancestry and people of African ancestry are at opposite ends of a continuum with people of European ancestry intermediate albeit with much variability within each broad grouping Rushton s thesis is that when fully modern humans migrated out of Africa perhaps only 100 000 years ago the colder Eurasian climate selected for larger brains more forward planning greater family stability and increased longevity with concomitant reductions in sex hormone speed of maturation reproductive potency and aggressiveness Rushton s theory emphasizes a trade off between parenting and mating and brings into focus the concept of a coordinated life history of characteristics evolving together to replicate genes more effectively The selection for large brains and parenting skills was taken furthest in east Asia Rushton s theory explains differentiation in intelligence and predicts other seemingly unrelated race effects such as differences in frequency of twinning The capacity to unify disparate phenomena is usually considered a virtue in theories Rushton s gene based evolutionary models explain ethnocentrism and racial group differences and may provide a catalyst for understanding individual differences and human nature This volume is sure to be controversial as Rushton attempts nothing less than a paradigmatic change in the way social scientists approach their work especially those concentrated in the study of racial differences Race Evolution and Behavior
