Rachel Carson Environmemnt New Directions:

New Directions in Global Political Governance John J. Kirton, Jun'ichi Takase, 2002 Focused on politics and security this volume extends the G8 and Global Governance series into the domain of international security in both its classic and newer forms Going beyond the conventional focus on globalization it takes up the central question of shaping international order looking at the emergence of several important phenomena including The advent of human security The global importance of once deeply domestic security issues Enhanced demands for civil society participation Sections on Japan's perspective on the G8 and international order critical issues in global security governance and the role of international institutions and American leadership therein make this a distinctive account of international security in the 21st century

Rachel Carson John Henricksson, 1991 A biography of the biologist focusing on the events that led her to expose pesticide pollution in her book *Silent Spring* and her legacy as a founder of the environmental movement **Rachel Carson the Environmental Movement** Elizabeth Ring, John Henricksson, 1991-01-01 A biography of the biologist focusing on her childhood in Pennsylvania her growing interest as an adult in environmental concerns and the importance of her book *Silent Spring* in exposing the environmental harm done by pesticides [Writing Nature in Cold War American Literature](#) Sarah Daw, 2018-08-23 First book length ecocritical study of Cold War American literature Compelling analyses of the function and representation of Nature in a wide range of Cold War fiction and poetry by authors including Paul Bowles J D Salinger Jack Kerouac Allen Ginsberg and Mary McCarthy reveals the prevalence of portrayals of Nature as an infinite interdependent system in American literature written between 1945 and 1971 Daw astutely highlights the Cold War's often overlooked role in environmental history and argues that Rachel Carson's *Silent Spring* 1962 can be considered as part of a trend of increasingly ecological depictions of Nature in literature written after 1945 By exploring the most recent developments in the field of ecocriticism the book is embedded within current ecocritical debates concerning the Anthropocene and anthropogenic climate change Key Features Contains five case studies of six Cold War writers Paul Bowles Peggy Pond Church J D Salinger Jack Kerouac Allen Ginsberg and Mary McCarthy Offers an in depth exploration of the influences behind each writer's presentation of Nature Shows the Cold War to be a time of seismic change in the human's relationship to the environment and demonstrates the degree to which this inflects Cold War literature Engages with the most recent developments in the field of ecocriticism which drive the study's analytical methodology and embed the book within current ecocritical debates *Sustainable Environmental Management* Jatna Supriatna, Ralph Lenz, 2025-08-02 Environmental sustainability in the developing world is the focus of this book Our purpose will not however be to produce an endless list of huge numbers of facts about the many developing countries Indonesia could be considered a proto typical example of a developing world country As an archipelago situated along the equator in Southeast Asia its location is ideal for a prototype almost all developing countries are tropical Kalimantan Sumatra and Papua in particular contain a substantial portion of the

world's remaining equatorial rainforests rainforest management is among the most pressing global sustainability problems. However, Indonesia's forests are far from monolithic; they include a large set of different biome types. Indonesia's population is multi-ethnic, a characteristic not only of other very large developing countries like India and Nigeria but of nearly every African country and of many other formerly colonized regions. Another factor favoring a prototype designation is a relatively recent escape from the category of severe underdevelopment. Indonesia ranked eighth in the world in real per capita GDP growth rate between 1960 and 2018, not an atypical outcome for Southeast Asian market economies. Thailand, Malaysia, Singapore, and Myanmar ranked even higher. EarthTrends of World Resources Institute. Like most developing countries, economic growth has mainly been sparked by exports of energy and mineral extraction products and plantation crops. There is also manufacturing growth. Indonesia has seven million cities and the world's sixth largest metro area by population. At the same time, many of the population remain engaged in agriculture; many are extremely impoverished. Environmental problems Indonesia encounters in its path to economic development are typical of those in other developing countries, and solutions it may find can serve as guidelines for other developing countries anticipating a similar economic take-off. This book consists of 21 chapters on sustainability efforts in Indonesia by many stakeholders: government, local government, private sectors, NGOs, and communities.

Rail Transport of Hazardous Materials United States. Congress. Senate. Committee on Governmental Affairs. Subcommittee on Federal Spending Practices and Open Government, 1979

The Law of Environmental Damage Marie-Louise Larsson, 2023-09-20 From its starting point within international law throughout its progression from regional to national law, *The Law of Environmental Damage* combines the disciplines of environmental law, liability law, and insurance in its analysis of the development of reparative environmental law. In the model adopted, three generations of reparative schemes are identified based on civil liability or administrative liability or self-taken measures from the area of insurance. The analysis applied is based on factors of standard and designation of liability as well as the definition and assessment of environmental damage. Issues such as environmental lender liability and damage to public natural resources are highlighted. The results of the study are evaluated within the framework of a theory of environmental efficiency among other factors; the reparative effect of liability rules is discussed.

EPA Journal, 1978

Environmental Security and Gender Nicole Detraz, 2014-08-21 Over the past 20 years, scholars, policymakers, and the media have increasingly recognized the links between both traditional and non-traditional security issues and the changing condition of the global environment. Concepts such as environmental security and resource conflict have been used to hint at these significant linkages. While there has been a good deal of scholarly work conducted that seeks to identify the ways that actors link these concepts, there has been little examination of the intersection between approaches to environmental security and gender. This book explores this intersection to provide an insight into the gendered nature of both global environmental politics and security studies. It examines how the issues of security and the environment are linked to theory and practice and the extent

to which gender informs these discussions By adopting a feminist environmental security discourse this book provides crucial redefinitions of key concepts and offers new insights into the ways we understand security environment connections Case studies evaluate if and how environment and security discourses are being used to understand a range of environmental issues and how a feminist environmental security discourse contributes to our understanding of security environment connections This multidisciplinary volume draws on literature from the environmental sciences security studies and sociology to highlight the complex human insecurities that often accompany environmental change As conceptualizations of security continue to shift and broaden to include environmental issues and concerns it is imperative that gender informs the debate

Encyclopedia of Business Ethics and Society Robert W. Kolb, 2008 This encyclopedia spans the relationships among business ethics and society with an emphasis on business ethics and the role of business in society *Buying Power* Lawrence B. Glickman, 2009-06-10 A definitive history of consumer activism *Buying Power* traces the lineage of this political tradition back to our nation's founding revealing that Americans used purchasing power to support causes and punish enemies long before the word boycott even entered our lexicon Taking the Boston Tea Party as his starting point Lawrence Glickman argues that the rejection of British imports by revolutionary patriots inaugurated a continuous series of consumer boycotts campaigns for safe and ethical consumption and efforts to make goods more broadly accessible He explores abolitionist led efforts to eschew slave made goods African American consumer campaigns against Jim Crow a 1930s refusal of silk from fascist Japan and emerging contemporary movements like slow food Uncovering previously unknown episodes and analyzing famous events from a fresh perspective Glickman illuminates moments when consumer activism intersected with political and civil rights movements He also sheds new light on activists relationship with the consumer movement which gave rise to lobbies like the National Consumers League and Consumers Union as well as ill fated legislation to create a federal Consumer Protection Agency

Principles of Philosophy: An Engaging History of Western Thought

Pasquale De Marco, Embark on an intellectual journey through the annals of Western philosophy with this comprehensive and engaging history From the ancient Greeks to modern day thinkers this book traces the evolution of philosophical thought and explores the profound ideas that have shaped our understanding of the world Readers will encounter the brilliance of Socrates the rigor of Aristotle the idealism of Plato the skepticism of Descartes the empiricism of Locke the rationalism of Leibniz the existentialism of Sartre and the pragmatism of Dewey among many others Through their writings and debates we gain insights into the nature of knowledge the existence of God the problem of evil the freedom of the will and the meaning of life This book is not just a dry recounting of philosophical theories it is a transformative exploration that challenges our assumptions expands our perspectives and deepens our understanding of ourselves and the world around us By engaging with the ideas of the great philosophers we open ourselves up to new possibilities question our beliefs and cultivate a more nuanced and informed worldview Written in a clear and engaging style this book is accessible to readers of all backgrounds

whether they are seasoned philosophers or simply curious about the history of ideas Each chapter focuses on a specific era or school of thought providing an overview of the key philosophers and their contributions More than just a history of philosophy this book is an invitation to think critically question deeply and explore the enduring quest for wisdom and truth Join us on this intellectual odyssey and discover the profound insights and enduring legacy of the greatest minds in history Delve into the depths of philosophical thought and gain a deeper understanding of the human condition This book is an essential guide for anyone seeking a richer and more meaningful understanding of the world we live in If you like this book write a review

Net Zero, Food and Farming Neil Ward, 2022-08-04 This book examines the implications of the net zero transition for food and farming in the UK and how these can be managed to avoid catastrophic climate change in the crucial decades ahead For the UK to meet its international obligations for reducing greenhouse gas emissions nothing short of a revolution is required in our use of land our farming practices and our diet Taking a historical approach the book examines the evolution of agriculture and the food system in the UK over the last century and discusses the implications of tackling climate change for food farming and land use setting the UK situation in an international context The chapters analyse the key challenges for this transition including dietary change and food waste afforestation and energy crops and low emission farming practices This historical perspective helps develop an understanding of how our food farming and land use system has evolved to be the way that it is and draws lessons for how the agri food system could evolve further to support the transition to net zero and avoid catastrophic climate change Written in a clear and accessible style this book will be essential reading to students and scholars of food agriculture and the environment as well as policymakers and professionals involved climate change policy and the agriculture and food industry

Environmental Quality Council on Environmental Quality (U.S.), 1979

Planning in the USA J. B. Cullingworth, Roger W. Caves, 2009 This revised edition continues to provide a comprehensive introduction to the policies and practices of planning. Discussing land use, urban planning and environmental protection policies, the text explains the nature of the planning process.

Environmental Sustainability Education for a Changing World Erika Péntzesné Kónya, Martin Haigh, Josef Křeček, 2021-06-22 Globally there is a need to promote and empower practical action towards better environmental conservation and greater sustainability. Education aspires to achieve and motivate this one mind at a time. This book advances a future oriented vision of the development of environmental sustainability education in settings outside the high school. It provides practical guidance for teacher practitioners and policy makers in community oriented environmental sustainability education. It promotes a modern holistic approach to sustainability learning in and by the community through participative engagement with sustainability issues. Its special foci include working with volunteers and citizen scientists through museums or through re purposing Higher Education. Its approach emphasises the implementation of the United Nations Sustainable Development Goals and cooperation with environmental management professionals. This book's cosponsors include the International Association for Headwater Control and FAO European Forestry Commission's Working Party on the Management of Mountain Watersheds as well as the International Environmental Education Conferences Eger Hungary and the Hungarian Academy of Science's Subcommittee on Future Studies. Community education has long been a goal for environmental management whose practitioners realise that interventions such as biodiversity conservation are only truly sustainable when supported by the local land user and stakeholder communities. This depends upon these stakeholders understanding why intervention is necessary.

Proceedings of the National Conference on the Environment and Health Care Costs, August 15, 1978, U.S. House of Representatives, Caucus Room, Washington, D.C., 1978

Planning in the USA J. Barry Cullingworth, Roger Caves, 2013-12-05 This extensively revised and updated fourth edition of *Planning in the USA* continues to provide a comprehensive introduction to the policies, theory and practice of planning. Outlining land use, urban planning and environmental protection policies, this fully illustrated book explains the nature of the planning process and the way in which policy issues are identified, defined and approached. This full colour edition incorporates new planning legislation and regulations at the state and federal layers of government, updated discussion on current economic issues and examples of local ordinances in a variety of planning areas. Key updates include a new chapter on planning and sustainability, a new discussion on the role of foundations and giving to communities, a discussion regarding the aftermath of Katrina in New Orleans, a discussion on deindustrialization and shrinking cities, a discussion on digital billboards, a discussion on recent comprehensive planning efforts, a discussion on land banking, unfunded mandates, a discussion on community character, a companion website with multiple choice and fill the blank questions and test yourself glossary terms. This book

gives a detailed account of urbanization in the United States and reveals the problematic nature and limitations of the planning process the fallibility of experts and the difficulties facing policy makers in their search for solutions Planning in the USA is an essential book for students planners and all who are concerned with the nature of contemporary urban and environmental problems Environment, Power, and Justice Graeme Wynn, Jane Carruthers, Nancy J. Jacobs, 2022-07-26

Spanning the colonial postcolonial and postapartheid eras these historical and locally specific case studies analyze and engage vernacular activist and scholarly efforts to mitigate social environmental inequity This book highlights the ways poor and vulnerable people in South Africa Lesotho and Zimbabwe have mobilized against the structural and political forces that deny them a healthy and sustainable environment Spanning the colonial postcolonial and postapartheid eras these studies engage vernacular activist and scholarly efforts to mitigate social environmental inequity Some chapters track the genealogies of contemporary activism while others introduce positions actors and thinkers not previously identified with environmental justice Addressing health economic opportunity agricultural policy and food security the chapters in this book explore a range of issues and ways of thinking about harm to people and their ecologies Because environmental justice is often understood as a contemporary phenomenon framed around North American examples these fresh case studies will enrich both southern African history and global environmental studies Environment Power and Justice expands conceptions of environmental justice and reveals discourses and dynamics that advance both scholarship and social change Contributors Christopher Konz Marc Epprecht Mary Galvin Sarah Ives Admire Mseba Muchaparara Musemwa Matthew A Schnurr Cherryl Walker
