The Racial Affinities of the Baganda and Other Bantu Tribes of British East Africa Lawrence Oschinsky, 1954

Blacks in Antiquity Frank M. Snowden, 1970 The Africans who came to ancient Greece and Italy participated in an important chapter of classical history Although evidence indicated that the alien dark and black skinned people were of varied tribal and geographic origins the Greeks and Romans classified many of them as Ethiopians In an effort to determine the role of black people in ancient civilization Mr Snowden examines a broad span of Greco Roman experience from the Homeric era to the age of Justinian focusing his attention on the Ethiopians as they were known to the Greeks and Romans The author dispels unwarranted generalizations about the Ethiopians contending that classical references to them were neither glorifications of a mysterious people nor caricatures of rare creatures Mr Snowden has probed literary epigraphical papyrological numismatic and archaeological sources and has considered modern anthropological and sociological findings on pertinent racial and intercultural problems He has drawn directly upon the widely scattered literary evidence of classical and early Christian writers and has synthesized extensive and diverse material Along with invaluable reference notes Mr Snowden has included over 140 illustrations which depict the Negro as the Greeks and Romans conceived of him in mythology and religion and observed him in a number of occupations as servant diplomat warrior athlete and performer among others Presenting an exceptionally comprehensive historical description of the first major encounter of Europeans with dark and black Africans Mr Snowden found that the black man in a predominantly white society was neither romanticized nor scorned that the Ethiopian in classical antiquity was considered by pagan and Christian without prejudice

Darwin's Athletes John Milton Hoberman,1997 Studies our society's fixation on black athletic achievement and argue that this obsession shared by both blacks and whites in the media in corporate America and even by athletes themselves has come to play a disastrous role in African American life and a troubling role in our country's race relations As for example the athleticizing of black identity encourages a disdain for academic achievement already too widespread among black males

Cohen,2017-07-12 Underlying the anthropological study of humans is the principle that there is a reality to which a human must adapt for survival Populations must adapt to the realities of the physical world and maintain a proper fit between their biological makeup and the pressures of the various niches of the world Social groups must develop adaptive mechanisms in the organization of their social relations if there is to be order regularity and predictability in patterns of cooperation and competition This book presents an introduction to anthropology that is unified and made systematic by its focus on adaptations that have accompanied the evolution of humans from non human primates to inhabitants of vast urban areas in modern industrial societies Human Adaptation contains over forty outstanding essays that are intended to serve as an introduction to physical anthropology archeology and linguistics from the point of view of the processes of adaptation The organization of these selections contains a balance between biological and prehistoric cultural adaptations They provide coherence for the study of human evolution Several selections notably those in connection with linguistic adaptations deal with contemporary people in order to shed light on earlier evolutionary processes More than half of the selections deal with

biological evolution This volume unifies the subject matter of anthropology within a single and powerful explanatory framework and incorporates the work of the most renowned anthropological experts on man The Eastern Anthropologist,1954 **Traditional Religion, Custom, and Christianity in Uganda** F.
