James Jennings, 1992-12-17 In April 1992 the world witnessed a renewal in South Central Los Angeles of the urban violence that had exploded there over a quarter of a century earlier. As in the Watts rebellion of 1965, the spark that ignited the firestorm was Black rage over police brutality. But in both eras the tinder was prepared by decades of social neglect and political disenfranchisement that have left the predominantly non-white urban poor trapped and virtually without hope. *Race, Politics and Economic Development* examines the underlying causes of Black urban poverty and recommends means to escape the seemingly endless cycle of retributive violence that it spawns. The book brings together Black activists and scholars, including two former mayors of American cities, to analyze the theoretical and practical problems facing the Black community in the United States. The essays argue that political influence, power, and wealth are major factors in determining social welfare policies; that both liberal and conservative policies are no longer effective in alleviating a growing human service crisis among Blacks; and that political mobilisation of the Black community is absolutely critical in resolving the problem of poverty in urban America. Drawing on work in the social sciences, political theory, and economics, and also on the contributors' activist experiences, these essays present an agenda for the participation of grassroots Black leaders in developing and implementing urban policy.

The Handbook of Economic Development and Institutions Jean-Marie Baland, François Bourguignon, Jean-Philippe Platteau, Thierry Verdier, 2020-01-21 The definitive reference on the most current economics of development and institutions. The essential role that institutions play in understanding economic development has long been recognized across the social sciences, including in economics. Academic and policy interest in this subject has never been higher. *The Handbook of Economic Development and Institutions* is the first to bring together in one single volume the most cutting-edge work in this area by the best-known international economists. The volume's editors themselves, leading scholars in the discipline, provide a comprehensive introduction, and the stellar contributors offer up-to-date analysis into institutional change and its interactions with the dynamics of economic development. This book focuses on three critical issues: the definitions of institutions in order to argue for a causal link to development; the complex interplay between formal and informal institutions; and the evolution and coevolution of institutions and their interactions with the political economy of development. Topics examined include the relationship between institutions and growth; educational systems; the role of the media; and the intersection between traditional systems of patronage and political institutions. Each chapter, covering the frontier research in its area and pointing to new areas of research, is the product of extensive workshoping on the part of the contributors. The definitive reference work on this topic, *The Handbook of Economic Development and Institutions* will be essential for academics, researchers, and professionals working in the field.

The Political Economy of Human Behaviour and Economic Development Sangaralingam Ramesh, 2022-09-24 This book explores how economics can be based around studies on human behaviour rather than relying on overly simplified assumptions generated from mathematical modelling. Through examining the link between human economic activity and psychology, specifically regarding the

development of cognitive and non cognitive ability insight into the human dimensions of economic development and the sources of human inequality are provided This book aims to question assumptions of rationality utilised in neoclassical economic theory and suggest how economic activity can be better understood through a deeper recognition of human behaviour It will be relevant to students and researchers interested in the political economy and behavioural economics

The Theory and Experience of Economic Development Mark Gersovitz, Carlos F. Diaz-Alejandro, Gustav Ranis, Mark R. Rosenzweig, 2012-08-06 This volume first published in 1982 is a collection of original essays written to honour Professor W Arthur Lewis 1979 co winner of the Nobel Prize in economics The authors an international group of distinguished scholars address a varied set of specific issues reflecting Professor Lewis research interests covering topics which include technological change in agriculture analyses of unemployment and income distribution the role of government policy in the development process the historical record of development and the relationship between developed and developing nations The book will be of interest to both the academic researcher and practicing professionals in the international organisations and national governments and are particularly appropriate to graduate courses in economic development cost benefit analysis and economic history

Race, Racism and Development Kalpana Wilson, 2013-10-10 Race Racism and Development places racism and constructions of race at the centre of an exploration of the dominant discourses structures and practices of development Combining insights from postcolonial and race critical theory with a political economy framework it puts forward provocative theoretical analyses of the relationships between development race capital embodiment and resistance in historical and contemporary contexts Exposing how race is central to development policies and practices relating to human rights security good governance HIV AIDS population control NGOs visual representations and the role of diasporas in development the book raises compelling questions about contemporary imperialism and the possibilities for transnational political solidarity

The Political Economy of Racism Melvin Leiman, 2010 An intense and compact resource for understanding how the political economy of racism evolved in the United States Science Society Racism is about more than individual prejudice And it is hardly the relic of a past era This scholarly readable and provocative book shows how the persistence of racism in America relies on the changing interests of those who hold the real power in society and use every possible means to hold onto it
