Racialized Coverage Of Congress:

Racialized Coverage of Congress Jeremy Zilber, David Niven, 2000-06-30 This examination of the causes severity and implications of racially stereotyped media coverage of Congress incorporates original analysis of congressional media coverage and interviews with congressional press staff The news media often portray African American members as being primarily interested in race overly concerned with local matters and wielding little legislative influence By contrast the images African American members attempt to project of themselves are more complex and comprehensive than the images the media communicate The authors offer a psychological explanation for this phenomenon the Distribution Effect in which those who are numerically rare in an occupation tend to be lumped together rather than treated as individuals Their findings suggest that it is the media rather than members of Congress who are responsible for the racialized images that appear regularly in the press This results in an advantage for white incumbents trying to attract votes but presents an obstacle to be overcome for African American politicians This study will appeal to political science media studies and racial studies scholars It incorporates content analysis of the newest forum of communication congressional Internet web sites to disclose how white and African American representatives in fact have similar media priorities

Racialization Karim Murji, John Solomos, 2005 Racialization has become one of the central concepts in the study of race and racism It is widely used in both theoretical and empirical studies of racial situations There has been a proliferation of texts that use this notion in quite diverse ways It is used broadly to refer to ways of thinking about race as well as to institutional processes that give expression to forms of ethno racial categorization An important issue

in the work of writers such as Robert Miles for example concerns the ways in which the construction of race is shaped historically and how the usage of that idea forms a basis for exclusionary practices The concept therefore refers both to cultural or political processes or situations where race is invoked as an explanation as well as to specific ideological practices in which race is deployed It is evident however that despite the increasing popularity of the concept of racialization there has been relatively little critical analysis exploring its theoretical and empirical usages It is with this underlying concern in mind that Racialization Studies in Theory and Practice brings together leading international scholars in the field of race and ethnicity in order to explore both the utility of the concept and its limitations

Race and Contention in Twenty-First Century U.S. Media Jason A. Smith, Bhoomi K. Thakore, 2016-04-20 This volume explores and clarifies the complex intersection of race and media in the contemporary United States Due to the changing dynamics of how racial politics are played out in the contemporary US as seen with debates of the post racial society as well as the changing dynamics of the media itself new vs old media debates an interrogation of the role of the media and its various institutions within this area of social inquiry is necessary Contributors contend that race in the United States is dynamic connected to social economic and political structures which are continually altering themselves The book seeks to highlight the contested space that the media provides for changing dimensions of race examining the ways that various representations can both hinder or promote positive racial views considering media in relation to other institutions and moving beyond thinking of media as a passive and singular institution Chapters 3 and 13 of this book are freely available as downloadable Open Access PDFs at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license

Douglas Arnold, 2013-10-31 Congress the Press and Political Accountability is the first large scale examination of how local media outlets cover members of the United States Congress Douglas Arnold asks do local newspapers provide the information citizens need in order to hold representatives accountable for their actions in office In contrast with previous studies which largely focused on the campaign period he tests various hypotheses about the causes and consequences of media coverage by exploring coverage during an entire congressional session Using three samples of local newspapers from across the country Arnold analyzes all coverage over a two year period every news story editorial opinion column letter and list First he investigates how twenty five newspapers covered twenty five local representatives and next how competing newspapers in six cities covered their corresponding legislators Examination of an even larger sample sixty seven newspapers and 187 representatives shows why some newspapers cover legislators more thoroughly than do other papers Arnold then links the coverage data with a large public opinion survey to show that the volume of coverage affects citizens awareness of representatives and challengers The results show enormous variation in coverage Some newspapers cover legislators frequently thoroughly and accessibly Others some of them famous for their national coverage largely ignore local representatives The analysis also confirms that only those incumbents or challengers in the most competitive races and those who command huge sums of money receive extensive coverage *Democracy and the Media* Robert X. Denton Jr., 2009-08-16 Presidential campaigns are our national conversations the widespread and complex communication of issues images social reality and personas In 2008 more people participated in the

After Civil Rights John D. Skrentny, 2015-11-24 A provocative new approach to race in the workplace What role should racial difference play in the American workplace As a nation we rely on civil rights law to address this question and the monumental Civil Rights Act of 1964 seemingly answered it race must not be a factor in workplace decisions In *After Civil Rights* John Skrentny contends that after decades of mass immigration many employers Democratic and Republican political leaders and advocates have adopted a new strategy to manage race and work Race is now relevant not only in negative cases of discrimination but in more positive ways as well In today's workplace employers routinely practice racial realism where they view race as real as a job qualification Many believe employee racial differences and sometimes immigrant status correspond to unique abilities or evoke desirable reactions from clients or citizens They also see racial diversity as a way to increase workplace dynamism The problem is that when employers see race as useful for organizational effectiveness they are often in violation of civil rights law *After Civil Rights* examines this emerging strategy in a wide range of employment situations including the low skilled sector professional and white collar jobs and entertainment and media In this important book Skrentny urges us to acknowledge the racial realism already occurring and lays out a series of reforms that if enacted would bring the law and lived experience more in line yet still remain respectful of the need to protect the civil rights of all workers
