Anti-racism and Multiculturalism Mark Alleyne, 2017-09-08 All scholarly books are engagements with the existing literature often the published scholarly work of one established discipline This book originated with modest objectives to produce a work that would be in conversation with the literature of international relations even though not of relevance only to that field The professed goal of international relations is international peace The ethical lens of pondering the best means to achieve world peace is used to filter media content in the field of multiculturalism and anti racism Although there has been little work on the impact of racial difference on the contours of contemporary international order there has been a sizeable body of research intended to abolish the credibility of pseudo scientific racism Such racism has provided the ideological foundation and justification for imperialism colonialism the holocaust and apartheid Race has been debunked as a myth Because of this racism the ideology bred of human classification according to racial difference has been found to be intellectually and morally barren But the need to communicate egalitarian and scientific sentiments remains The contributors to this volume consider five questions How does the literature on antiracism improve our understanding of conflict resolution How does the analysis of the media s role in racist and anti racist discourses improve the process of theorizing on hate and war propaganda How can research on anti racist discourse improve UN peacekeeping What implications does this subject have for theory building and cultural diversity How and why should the literature on anti racism expand research in international relations This is a unique worthwhile framework for cross disciplinary research in race and intellectual consensus and conflict

ade of its obvious entertainment aspect it has proved to be a perpetuating reflector of nationalism ethnicity community or communal identity and cultural specificity Naturally therefore the game is a complex representative of minorities status especially in countries where minorities play a crucial role in political social cultural or economic life The question is also important since in many nations success in sports like soccer has been used as an instrument for assimilation or to promote an alternative brand of nationalism Thus Jewish teams in pre Second World War Europe were set up to promote the idea of a muscular Jewish identity Similarly in apartheid South Africa soccer became the game of the black majority since it was excluded from the two principal games of the country rugby and cricket In India on the other hand the Muslim minorities under colonial rule appropriated soccer to assert their community identity The book examines why in certain countries minorities chose to take up the sport while in others they backed away from participating in the game or alternatively set up their own leagues and practised self exclusion The book examines European countries like the Netherlands England and France the USA Africa Australia and the larger countries of Asia particularly India This book was previously published as a special issue of Soccer and Society
