Renegade States The Evolution Of Revolutionary Foreign Policy

Stephen Chan, Andrew J. Williams

Renegade States The Evolution Of Revolutionary Foreign Policy:

Renegade States Stephen Chan, Andrew J. Williams, 1994 One of the flashpoints of international relations is the tortuous relationship between established status quo powers and revolutionary states such as China North Korea Iran Nicaragua and Iraq This textbook bridges the gap between analyses of revolutions which tend to concentrate on their domestic causes and the study of the impact of renegade states on the international system It sees revolutionary states as a central dynamic of modern international society rather than as aberrations damaging an otherwise stable international body politic The authors provide a series of historical and contemporary case studies and theoretical analyses They contribute significantly to a debate on the nature of international politics that has foundered into complacency and self congratulation about the end of history

Out of Evil Stephen Chan, 2005 A thought provoking guide to the history of ideas that form the bedrock of the future global arena

Revolution and World Politics Fred Halliday, 1999 Reassesses the role of revolution as a force that has shaped the development of world politics

The Iran-Iraq War Williamson Murray, Kevin M. Woods, 2014-09-04 A comprehensive account of the Iran Iraq War through the lens of the Iraqi regime and its senior military commanders

Revolution and International Politics Peter Calvert, 2016-10-06 This book aims to present an analysis of the role of revolution in international politics Concerning itself with the time frame from the French Revolution up to the fall of the Iron Curtain this book covers the study of revolution itself the importance of globalisation interdependence and non state actors and the change in the nature of international politics theory

Preventing the Use of Weapons of Mass Destruction Eric Herring, 2013-01-11 These studies concentrate on preventing the use of weapons of mass destruction A common argument runs through all of the papers that while complacency must be avoided much of the post Cold War focus among Western governments on the threat posed by weapons of mass destruction is alarmist

The Politics of Intelligence and American Wars with Iraq O. Seliktar, 2008-02-18 Coming at the heels of September 11 Operation Iraqi Freedom has focused the limelight on the way in which the United States predicts and manages political change The failure to find WMD and more important the continued violence in Iraq instead of the hoped for democracy has engendered an acrimonious debate on the motives of the Bush administration and its uses or misuses of intelligence The question of who got what right or wrong has been fought out along ideological and partisan lines with supporters claiming that given what was known about Saddam Hussein the decision to change his regime was justified and detractors arguing that a group of largely Jewish neoconservatives acting on behalf of Israel manipulated intelligence in order to trick the United States into an unnecessary and costly war The book provides a systematic and objective analysis of the problems that faced American intelligence in deciphering the behavior of the highly secretive and confusing Iraq regime and its enigmatic leader

Terrorism, Civil War, and Revolution Peter Calvert, 2010-10-21

Russia and the Challengers H. Belopolsky, 2015-12-11 An examination of why Russia chose to jeopardize its embryonic partnership with the West in favour of alignment with states like China Iran and

Iraq and what this means for the stability of the emerging international system **Diplomatic Strategies of Nations in the Global South** Jacqueline Braveboy-Wagner, 2016-10-19 At a time of change in the international system this book examines how non traditional leading nations from the Global South have fared to date and what the chances are of their rise to continue In the second decade of the twenty first century the enthusiasm of observers of the international scene about the rise of the rest is waning as many countries that were expected to lead the evolving multipolar order are experiencing economic contraction and governance problems In order to predict further developments the contributors to this volume focus on the types and sources of the diplomatic strategies that must be executed by rising states if they are to preserve domestic advances as well as gain influence regionally and internationally Through a comprehensive examination of case studies from Latin America Africa Asia and the Middle East they show that while there are commonalities among these rising states unique domestic conditions values and traditions impact and predict diplomatic strategizing and the ability for sustained projection on the international scene International History and International Relations Andrew J. Williams, Amelia Hadfield, J. Simon Rofe, 2012-08-06 This innovative new textbook seeks to provide undergraduate students of international relations with valuable and relevant historical context bridging the gap and offering a genuinely interdisciplinary approach Each chapter integrates both historical analysis and literature and applies this to an international relations context in an accessible fashion allowing students to understand the historical context in which these core issues have developed The book is organised thematically around the key issues in international relations such as war peace sovereignty identity empire and international organisations Each chapter provides an overview of the main historical context theories and literature in each area and applies this to the study of international relations Providing a fresh approach this work will be essential reading for all students of international relations and international relations theory The End of Certainty Professor Stephen Chan, 2013-07-04 The End of Certainty is a magical realist book on world politics Stephen Chan takes the reader on a rollercoaster ride through how we can establish a new kind of international relations and construct a common future for the planet Chan argues that the certainties of singular traditions of philosophy have failed to help us understand power shifts and struggles in an endlessly diverse world Chan argues that fusing different strands of Western Eastern religious and philosophical thought is far more likely to help us move forward amidst uncertainty In doing so he takes us on a journey from the battlefields of Eritrea to the Twin Towers via the Book of Job Clausewitz Fanon and Wahabism You ll never think about international politics in quite the same way again *Geopolitical Exotica* Dibyesh Anand, *Geopolitical Exotica* examines exoticized Western representations of Tibet and Tibetans and the debate over that land s status with regard to China Concentrating on specific cultural images of the twentieth century promulgated by novels popular films travelogues and memoirs Dibyesh Anand lays bare the strategies by which Exotica Tibet and Tibetanness have been constructed and he investigates the impact these constructions have had on those who are being represented Although

images of Tibet have excited the popular imagination in the West for many years Geopolitical Exotica is the first book to explore representational practices within the study of international relations Anand challenges the parochial practices of current mainstream international relations theory and practice claiming that the discipline remains mostly Western in its orientation His analysis of Tibet's status with regard to China scrutinizes the vocabulary afforded by conventional international relations theory and considers issues that until now have been undertheorized in relation to Tibet including imperialism history diaspora representation and identity In this masterfully synthetic work Anand establishes that postcoloniality provides new insights into themes of representation and identity and demonstrates how IR as a discipline can meaningfully expand its focus beyond the West Dibyesh Anand is a reader in international relations at the University of Westminster London

Plural International Relations in a Divided World Stephen Chan, 2017-02-27 The world is troubled and full of misunderstandings It seems a new world order of fundamentalist violence and meaningless atrocity is upon us whilst civilised instruments for cooperation and compromise are becoming increasingly ineffective In this timely book Stephen Chan explores the historical and philosophical roots of difference and discord in the international system He begins with the introduction of the Westphalian system showing how throughout the 20th century new states from the Middle East Asia and Africa entered that system with reservations preconditions and great efforts to introduce new forms of concerts and congresses but without seriously challenging the international status quo By contrast the 21st century has brought turmoil and change in the form of militant Islam be it the Taleban Al Qaeda or ISIS whose varied roots and fluid emergence have so far prevented the West from being able to understand and combat it Developing Kissinger's suspicion of Saudi Arabia as an Islamic state in Westphalian dress Chan argues that what is at stake today is not the development of a new Caliphate or an old radicalism but the effort to supplant and replace the Westphalian system itself This is the complex and challenging reality to which a truly modern and persuasively relevant plural international relations must now adapt Whether it can do so remains to be seen

Defiant Dictatorships P. Brooker, 1997-09-30 Why did some Communist and Middle Eastern dictatorships those in China Vietnam North Korea Cuba Syria Iraq Libya and Iran remained defiantly stable during the onset of a democratic age in the 1980s and early 1990s The book offers an explanation based upon external relations the regimes defiance of external military or political foes and then searches for alternative or supplementary explanations by examining the changes that occurred in these dictatorships political structures ideologies and economic policies during 1980-94

Nuclear Logics Etel Solingen, 2009-02-09 Nuclear Logics examines why some states seek nuclear weapons while others renounce them Looking closely at nine cases in East Asia and the Middle East Etel Solingen finds two distinct regional patterns In East Asia the norm since the late 1960s has been to forswear nuclear weapons and North Korea which makes no secret of its nuclear ambitions is the anomaly In the Middle East the opposite is the case with Iran Iraq Israel and Libya suspected of pursuing nuclear weapons capabilities with Egypt as the anomaly in recent decades Identifying

the domestic conditions underlying these divergent paths Solingen argues that there are clear differences between states whose leaders advocate integration in the global economy and those that reject it Among the former are countries like South Korea Taiwan and Japan whose leaders have had stronger incentives to avoid the political economic and other costs of acquiring nuclear weapons The latter as in most cases in the Middle East have had stronger incentives to exploit nuclear weapons as tools in nationalist platforms geared to helping their leaders survive in power Solingen complements her bold argument with other logics explaining nuclear behavior including security dilemmas international norms and institutions and the role of democracy and authoritarianism Her account charts the most important frontier in understanding nuclear proliferation grasping the relationship between internal and external political survival Nuclear Logics is a pioneering book that is certain to provide an invaluable resource for researchers teachers and practitioners while reframing the policy debate surrounding nonproliferation **Africa** Air University (U.S.). Library,1994 **The International Politics of an**

Embodied God Stephen Chan, OBE,2024-10-02 In a world of violence in which religion seems to play an increasing role the understanding of the Religions of the Book Judaism Christianity and Islam is highly important This book concentrates on these religions all with common ancestry that claim their mandates come from a holy text These religions are embodied in both a text and a political purpose associated with a contentious nationalism and internationalism Chan indicates their commonalities especially in the political realm but also their approaches to conflict with one another within themselves and with others who do not have a centralizing Book **Redefining the Third World** Nana Poku,Lloyd Pettiford,1999-01-12 Given the end of the cold war economic development of the Asia Pacific region the emergence of Neo Liberal democratisation and the further marginalisation of Africa in the global political economy this book provides a timely theoretical analysis of current trends in the third world global politics **Japan's Maritime Security Strategy** L. Black,2014-03-07 Since the late 1990s the Japan Coast Guard JCG has countered a myriad of outlaw threats at sea including piracy terrorism the proliferation of Weapons of Mass Destruction WMD and the threat posed by rogue states Japan s innovative strategy has transformed maritime security governance in Southeast Asia and beyond
