Renewing Unilever Transformation Tradition:

Renewing Unilever : Transformation and Tradition Geoffrey Jones, 2005-07-01 Unilever is one of the world's largest suppliers of fast moving consumer goods in foods home and personal care. It operates in over 100 countries. Its scope and scale make it a unique global corporation. Yet the story of Unilever is not simply a tale of corporate evolution. Unilever is a corporation that has a big impact on the lives of people round the world. Indeed a Unilever brand can be found in one in every two households worldwide. Geoffrey Jones, a leading business historian from the Harvard Business School, takes us inside this corporation which from its origins in Britain and the Netherlands has become a worldwide manufacturer of fast moving consumer products. Unilever's operations cover food and home and personal care and its brands include Lipton, Hellmann's, Birds Eye, Wall's, Surf, Domestos, Comfort, Dove, Sunsilk, Pond's, Signal, Axe and Ben & Jerry's. In particular the book focuses on the evolution of the company over the last half century. Managing such a firm in the era of globalization posed enormous challenges. The book covers the company's strategies and provides compelling evidence of its decision making, marketing, brand management, innovation, acquisition strategies, corporate culture and human resource management. The author has had full access to corporate archives and executives and provides us with a unique insight into the workings and strategies of one of the world's oldest and largest multinationals.

This collection is an excellent starting point for understanding the field and finding areas where business history management theory and social science can intersect Canadian Business History Newsletter January 2019 *British Business in the Formative Years of European Integration, 1945-1973* Neil Rollings, 2007-12-10 This book questions conventional accounts of the history of European integration and British business Integration accounts normally focus on the nation state while Neil Rollings focuses on business and its role in the development of European integration which business historians have previously overlooked Business provided a key link between economic integration political integration and the process of Europeanization British businessmen perceived early on that European integration meant much more than the removal of tariffs and access to new markets Indeed British entry into the European community would alter the whole landscape of the European working environment Consideration of European integration is revealed as a complex relative and dynamic issue covering many issues such as competition policy taxation and company law Based on extensive archival research this book uses the case of business to emphasize the need to blend national histories with the history of European integration History of Artificial Cold, Scientific, Technological and Cultural Issues Kostas Gavroglu, 2013-11-19 The history of artificial cold has been a rather intriguing interdisciplinary subject physics chemistry technology sociology economics anthropology consumer studies which despite some excellent monographs and research papers has not been systematically exploited It is a subject with all kinds of scientific technological as well as cultural dimensions For example the common home refrigerator has brought about unimaginably deep changes to our everyday lives changing drastically eating habits and shopping mentalities From the end of the 19th century to the beginning of the 21st issues related to the production and exploitation of artificial cold have never stopped to provide us with an incredibly interesting set of phenomena novel theoretical explanations amazing possibilities concerning technological applications and all encompassing cultural repercussions The discovery of the unexpected and bizarre phenomena of superconductivity and superfluidity the necessity to incorporate macroscopic quantum phenomena to the framework of quantum mechanics the discovery of Bose Einstein condensation and high temperature superconductivity the use of superconducting magnets for high energy particle accelerators the construction of new computer hardware the extensive applications of cryomedicine and the multi billion industry of frozen foods are some of the more dramatic instances in the history of artificial cold **The Making of Modern Management** John F. Wilson, Andrew Thomson, 2006-08-24 Management has always been part of human organization but it is only in the last two centuries or so that it has been the central driver of economic activity as companies have moved from family firms to hugely complex multinational corporations with many layers of management The term management is commonly used in three ways as a process or activity as a structure in any organization and as a group or class of people carrying out certain roles in an organization This book is the first detailed account of the evolution of management in all three senses The focus is mainly on the UK but throughout the broader question of why corporate management structures

developed so impressively in the USA Germany and Japan is borne in mind while arguably little progress was made in this regards in the UK Equally the authors consider why given that management is now so widely studied so little careful research has been undertaken into the evolution of the practice and the profession of management The book is divided into four sections Part One provides An Introduction to Management History Part Two Management and Organization explores the historical development through the 19th and 20th centuries Part Three Managers in Context looks at the social and cultural context of management and managers and Part Four considers three key functional areas labour marketing and accounting and finance This rich detailed and path breaking book will be essential reading for anyone wanting to understand the evolution of management as we now understand it whether academics students or managers themselves *The Oxford Handbook of Employment Relations* Adrian Wilkinson, Geoffrey Wood, Richard Deeg, 2014-03-13 There have been numerous accounts exploring the relationship between institutions and firm practices However much of this literature tends to be located into distinct theoretical traditional silos such as national business systems social systems of production regulation theory or varieties of capitalism with limited dialogue between different approaches to enhance understanding of institutional effects Again evaluations of the relationship between institutions and employment relations have tended to be of the broad brushstroke nature often founded on macro data and with only limited attention being accorded to internal diversity and details of actual practice The Handbook aims to fill this gap by bringing together an assembly of comprehensive and high quality chapters to enable understanding of changes in employment relations since the early 1970s Theoretically based chapters attempt to link varieties of capitalism business systems and different modes of regulation to the specific practice of employment relations and offer a truly comparative treatment of the subject providing frameworks and empirical evidence for understanding trends in employment relations in different parts of the world Most notably the Handbook seeks to incorporate at a theoretical level regulationist accounts and recent work that link bounded internal systemic diversity with change and at an applied level a greater emphasis on recent applied evidence specifically dealing with the employment contract its implementation and related questions of work organization It will be useful to academics and students of industrial relations political economy and management **Management History** Morgen Witzel, 2010-01-21 Introduction to management history Organisation Strategy Human resource management Marketing Financial management Technology innovation and knowledge Business and society Leadership Conclusion how history impacts on management **The SAGE Encyclopedia of Corporate Reputation** Craig E. Carroll, 2016-05-04 What creates corporate reputations and how should organizations respond Corporate reputation is a growing research field in disciplines as diverse as communication management marketing industrial and organizational psychology and sociology As a formal area of academic study it is relatively young with roots in the 1980s and the emergence of specialized reputation rankings for industries products services and performance dimensions and for regions Such rankings resulted in competition between organizations and the

alignment of organizational activities to qualify and improve standings in the rankings In addition today s changing stakeholder expectations the growth of advocacy demand for more disclosures and greater transparency and globalized mediatized environments create new challenges pitfalls and opportunities for organizations Successfully engaging dealing with and working through reputational challenges requires an understanding of options and tools for organizational decision making and stakeholder engagement For the first time the vast and important field of corporate reputation is explored in the format of an encyclopedic reference The SAGE Encyclopedia of Corporate Reputation comprehensively overviews concepts and techniques for identifying building measuring monitoring evaluating maintaining valuing living up to and or changing corporate reputations Key features include 300 signed entries are organized in A to Z fashion in 2 volumes available in a choice of electronic or print formats Entries conclude with Cross References and Further Readings to guide students to in depth resources Although organized A to Z a thematic Reader s Guide in the front matter groups related entries by broad areas A Chronology provides historical perspective on the development of corporate reputation as a discrete field of study A Resource Guide in the back matter lists classic books key journals associations websites and selected degree programs of relevance to corporate reputation A General Bibliography will be accompanied by visual maps noting the relationships between the various disciplines touching upon corporate reputation studies The work concludes with a comprehensive Index which in the electronic version combines with the Reader s Guide and Cross References to provide thorough search and browse capabilities
