Reorganizing The Rust Belt An Inside Study Of The American Labor Movement:

Reorganizing the Rust Belt Steven Henry Lopez,2004-04-05 Publisher Description *Reorganizing the Rust Belt* Steven Henry Lopez,2004 Publisher Description **Rethinking the American Labor Movement** Elizabeth Faue,2017-04-28 Rethinking the American Labor Movement tells the story of the various groups and incidents that make up what we think of as the labor movement While the efforts of the American labor force towards greater wealth parity have been rife with contention the struggle has embraced a broad vision of a more equitable distribution of the nation s wealth and a desire for workers to have greater control over their own lives In this succinct and authoritative volume Elizabeth Faue reconsiders the varied strains of the labor movement situating them within the context of rapidly transforming twentieth century American society to show how these efforts have formed a political and social movement that has shaped the trajectory of American life Rethinking the American Labor Movement is indispensable reading for scholars and students interested in American labor in the twentieth century and in the interplay between labor wealth and power *Organizing at the Margins* Jennifer Jihye Chun,2011-01-15 The realities of globalization have produced a surprising reversal in the focus and strategies of labor movements around the world After years of neglect and exclusion labor organizers are recognizing both the needs and the importance of immigrants and women employed in the growing ranks of low paid and insecure service jobs In *Organizing at the Margins* Jennifer Jihye Chun focuses on this shift as it takes place in two countries South Korea and the United States Using comparative historical inquiry and in depth case studies she shows how labor movements in countries with different histories and structures of economic development class formation and cultural politics embark on similar trajectories of change Chun shows that as the base of worker power shifts from those who hold high paying industrial jobs to the formerly unorganizable labor movements in both countries are employing new strategies and vocabularies to challenge the assault of neoliberal globalization on workers rights and livelihoods Deftly combining theory and ethnography she argues that by cultivating alternative sources of symbolic leverage that root workers demands in the collective morality of broad based communities as opposed to the narrow confines of workplace disputes workers in the lowest tiers are transforming the power relations that sustain downgraded forms of work Her case studies of janitors and personal service workers in the United States and South Korea offer a surprising comparison between converging labor movements in two very different countries as they refashion their relation to historically disadvantaged sectors of the workforce and expand the moral and material boundaries of union membership in a globalizing world **The New Oxford Handbook of Economic Geography** Dariusz Wójcik,2018-01-04 The first fifteen years of the 21st century have thrown into sharp relief the challenges of growth equity stability and sustainability facing the world economy In addition they have exposed the inadequacies of mainstream economics in providing answers to these challenges This volume gathers over 50 leading scholars from around the world to offer a forward looking perspective of economic geography to understanding the various building blocks relationships and

trajectories in the world economy The perspective is at the same time grounded in theory and in the experiences of particular places Reviewing state of the art of economic geography setting agendas and with illustrations and empirical evidence from all over the world the book should be an essential reference for students researchers as well as strategists and policy makers Building on the success of the first edition this volume offers a radically revised updated and broader approach to economic geography With the backdrop of the global financial crisis finance is investigated in chapters on financial stability financial innovation global financial networks the global map of savings and investments and financialization Environmental challenges are addressed in chapters on resource economies vulnerability of regions to climate change carbon markets and energy transitions Distribution and consumption feature alongside more established topics on the firm innovation and work The handbook also captures the theoretical and conceptual innovations of the last fifteen years including evolutionary economic geography and the global production networks approach Addressing the dangers of inequality instability and environmental crisis head on the volume concludes with strategies for growth and new ways of envisioning the spatiality of economy for the future

No Shortcuts Jane F. McAlevey, 2016-09-13 The crisis of the progressive movement is so evident that nothing less than a fundamental rethinking of its basic assumptions is required Today s progressives now work for professional organizations more comfortable with the inside game in Washington DC and capitols throughout the West where they are outmatched and outspent by corporate interests Labor unions now focus on the narrowest possible understanding of the interests of their members and membership continues to decline in lockstep with the narrowing of their goals Meanwhile promising movements like Occupy Wall Street and Black Lives Matter lack sufficient power to accomplish meaningful change Why do progressives in the United States keep losing on so many issues In No Shortcuts Jane McAlevey argues that progressives can win but lack the organized power to enact significant change to outlast their bosses in labor fights and to hold elected leaders accountable Drawing upon her experience as a scholar and longtime organizer in the student environmental and

labor movements McAlevey examines cases from labor unions and social movements to pinpoint the factors that helped them succeed or fail to accomplish their intended goals McAlevey makes a compelling case that the great social movements of previous eras gained their power from mass organizing a strategy today's progressives have mostly abandoned in favor of shallow mobilization or advocacy She ultimately concludes that in order to win progressive movements need strong unions built from bottom up organizing strategies that place the power for change in the hands of workers and ordinary people at the community level Beyond the concrete examples in this book McAlevey's arguments have direct implications for anyone involved in organizing for social change Much more than cogent analysis No Shortcuts explains exactly how progressives can go about rebuilding powerful movements at work in our communities and at the ballot box

How We Struggle Sian Lazar, 2023-01-20 A comparative ethnographic approach to the question of labour struggles and workers political agency A masterful book a resource that makes anthropology matter Andrea Muehlebach Professor of Anthropology University of Bremen When it comes to labor movements unionized industrial workers on the factory floor have only ever been part of the picture Across so many different workplaces sectors of the economy and geographical contexts the question of how working people struggle in the day to day has no single answer Here Sian Lazar offers a unique anthropological perspective on labor agency that takes in examples from across the globe from heavy industry and agriculture to the service and informal sectors She asks how do people strive to improve their lives and working conditions How are they constrained and enabled in that struggle by the nature of the work they do and by their own positionality in local histories cultures and networks How We Struggle explores worker action across the spectrum from organized trade unionism to individualized strategies of accommodation resistance and escape The book marries a discussion of global political economy and Marxist feminist theories of labor with ethnographic approaches that begin from a perspective of human experience kinship and radical heterogeneity
