Repertoires And Cycles Of Collective Action:

Repertoires and Cycles of Collective Action Mark Traugott, 1995 The modern era has generated a bewildering profusion of popular protest including widespread social movements and sporadic revolutionary upheaval Despite the seemingly chaotic character of such collective action social scientists have increasingly noted the remarkable regularities exhibited by even the most tumultuous social change In this volume sociologists political scientists and historians come together to assess the complementary concepts of repertoires and cycles as tools for illuminating the consistent patterns that emerge from the apparent chaos The significance of repertoires recurrent forms or tactics of social protest is explored in an essay on eighteenth and nineteenth century Britain by the originator of the concept Charles Tilly Sidney Tarrow whose work has most directly linked the concept of repertoires with that of cycles the recurrent peaks and troughs in the historical incidence of collective action contributes an essay that focuses on twentieth century Italy Other essays investigate the rhythms and logic of social change in contexts as diverse as sixteenth through nineteenth century Japan nineteenth century Europe and twentieth century America Through inquiries into the consequences of violent repression for social mobilization the struggle to control the linguistic terms of social conflict the unacknowledged antecedents of contemporary movements and the importance of movement families this volume demonstrates the usefulness of these two concepts and defines the relationship between them Collected from past issues of Social Science History with a new introduction and two new essays Repertoires and Cycles of Collective Action will reward an interdisciplinary audience of readers with the extraordinary vitality that emerges from this rich blend of historical perspectives Contributors Charles Brockett Craig Calhoun Doug McAdam Marc Steinberg Sidney Tarrow Charles Tilly Mark Traugott James White

The State against Society Grzegorz Ekiert, 1996-09-30 Classical images of state socialism developed in contemporary social sciences were founded on simple presuppositions State socialist regimes were considered to be politically stable due to their pervasive institutional and ideological control over the everyday lives of their citizens impervious to reform and change and representative of extreme political and economic dependency Despite their contrasting historical experiences they have been

treated as basically identical in their institutional design social and economic structures and policies Grzegorz Ekiert challenges this notion in a comparative analysis of the major political crises in post 1945 East Central Europe Hungary 1956 63 Czechoslovakia 1968 76 and Poland 1980 89 The author maintains that the nature and consequences of these crises can better explain the distinctive experiences of East Central European countries under communist rule than can the formal characteristics of their political and economic systems or their politically dependent status He explores how political crises reshaped party state institutions redefined relations between party and state institutions altered the relationship between the state and various groups and organizations within society and modified the political practices of these regimes He shows how these events transformed cultural categories produced collective memories and imposed long lasting constraints on mass political behavior and the policy choices of ruling elites These crises shaped the political evolution of the region produced important cross national differences among state socialist regimes and contributed to the distinctive patterns of their collapse

Does Skill Make Us Human? Natasha Iskander, 2021-11-09 An in depth look at Qatar's migrant workers and the place of skill in the language of control and power Skill specifically the distinction between the skilled and unskilled is generally defined as a measure of ability and training but *Does Skill Make Us Human* shows instead that skill distinctions are used to limit freedom narrow political rights and even deny access to imagination and desire Natasha Iskander takes readers into Qatar's booming construction industry in the lead up to the 2022 World Cup and through her unprecedented look at the experiences of migrant workers she reveals that skill functions as a marker of social difference powerful enough to structure all aspects of social and economic life Through unique access to construction sites in Doha in depth research and interviews Iskander explores how migrants are recruited trained and used Despite their acquisition of advanced technical skills workers are commonly described as unskilled and disparaged as unproductive poor quality or simply bodies She demonstrates that skill categories adjudicate personhood creating hierarchies that shape working conditions labor recruitment migration policy the design of urban spaces and the reach of global industries Iskander also discusses how skill distinctions define industry responses to global warming with employers recruiting migrants from climate damaged places at lower wages and exposing these workers to Qatar's extreme heat She considers how the dehumanizing politics of skill might be undone through tactical solidarity and creative practices With implications for immigrant rights and migrant working conditions throughout the world *Does Skill Make Us Human* examines the factors that justify and amplify inequality

Why Communism Did Not Collapse Martin K.

Dimitrov,2013-07-31 This volume brings together a distinguished group of scholars working to address the puzzling durability of communist autocracies in Eastern Europe and Asia which are the longest lasting type of non democratic regime to emerge after World War I The volume conceptualizes the communist universe as consisting of the ten regimes in Eastern Europe and Mongolia that eventually collapsed in 1989 91 and the five regimes that survived the fall of the Berlin Wall China Vietnam Laos North Korea and Cuba The essays offer a theoretical argument that emphasizes the importance of institutional adaptations as a foundation of communist resilience In particular the contributors focus on four adaptations of the economy of ideology of the mechanisms for inclusion of potential rivals and of the institutions of vertical and horizontal accountability The volume argues that when regimes are no longer able to implement adaptive change contingent leadership choices and contagion dynamics make collapse more likely

the efforts of nonviolent INGOs *New Critical Writings in Political Sociology* Alan Scott, 2024-11-01 The articles collected together in this volume are concerned with why and how people get involved in politics whether through formal mechanisms such as voting through some of the more informal means and settings of social movement networks and political protest or through engagement in public debate But just as important is the question of why people do not get involved in politics What social conditions ideas and values facilitate or discourage political activity How is it that some people are systematically disempowered in democratic societies in comparison with others What social forms offer the most promise for extending and deepening democracy This volume brings together the most seminal papers which together form a record of how political sociologists since the 1970s have framed questions about the range and limits of democratic political engagement and developed concepts and methodologies in order to research the answers to those questions *Shifting Dynamics of Contention in the Digital Age* Jun Liu, 2020-06-22 Over the past decades waves of political contention involving the use of information and communication technologies have swept across the globe The phenomenon stimulates the scholarship on digital communication technologies and contentious collective action to thrive as an exciting relevant but highly fragmentary and contested field with disciplinary boundaries To advance interdisciplinary understanding *Shifting Dynamics of Contention in the Digital Age* outlines a communication centered framework that articulates the intricate relationship between technology communication and contention It systematically explores the influence of mobile technology on political contention in China the country with the world's largest number of mobile and internet users Using first hand in depth interview and fieldwork data *Shifting Dynamics of Contention in the Digital Age* tracks the strategic choice of mobile phones as repertoires of contention illustrates the effective mobilization of mobile communication on the basis of its strong and reciprocal social ties and identifies the communicative practice of forwarding officially alleged rumors as a form of everyday resistance Through this groundbreaking study *Shifting Dynamics of Contention in the Digital Age* presents a nuanced portrayal of an emerging dynamics of contention both its strengths and limitations through the embedding of mobile communication into Chinese society and politics *Rethinking Social Movements* Jeff Goodwin, James M. Jasper, 2004 This landmark volume brings together some of the titans of social movement theory in a grand reassessment of its status For some time the field has been divided between a dominant structural approach and a cultural or constructivist tradition The gaps and misunderstandings between the two sides as well as the efforts to bridge them closely parallel those in the social sciences at large This book aims to further the dialogue between these two distinct approaches to social movements and to show the broader implications for social science as a whole as it struggles with issues including culture emotion and agency Visit our website for sample chapters *Revolutionizing Repertoires* Robert S. Jansen, 2017-10-17 Politicians and political parties are for the most part limited by habit they recycle tried and true strategies draw on models from the past and mimic others in the present But in rare moments politicians break with routine and try something new Drawing on pragmatist

theories of social action Revolutionizing Repertoires sets out to examine what happens when the repertoire of practices available to political actors is dramatically reconfigured Taking as his case study the development of a distinctively Latin American style of populist mobilization Robert S Jansen analyzes the Peruvian presidential election of 1931 He finds that ultimately populist mobilization emerged in the country at this time because newly empowered outsiders recognized the limitations of routine political practice and understood how to modify transpose invent and recombine practices in a whole new way Suggesting striking parallels to the recent populist turn in global politics Revolutionizing Repertoires offers new insights not only to historians of Peru but also to scholars of historical sociology and comparative politics and to anyone interested in the social and political origins of populism
