**Replacement Migration**, 2001      **Replacement migration** United Nations / Department of E, 2000      *Managing Migration* Philip L. Martin, Susan Forbes Martin, Patrick Weil, 2006-01-01 Managing Migration presents the valuable results of the Cooperative Efforts to Manage Emigration project a bottom up effort to identify models and best practices for spurring economic development and respect for human rights in migrant countries of origin      Turkish Immigrants in the European Union Refik Erzan, Kemal Kirisci, 2013-09-13 This book provides an analytical contribution to the contested issues marking Turkish membership to the European Union On October 2005 Turkey started the accession process towards EU membership Currently many Europeans fear that large numbers of Turkish nationals will flood member countries if Turkey were to become a member highlighting that many Turkish immigrants have failed to integrate into their host societies due to cultural difference Yet others argue that Turkey is a dynamic society with a growing educated population that could help address the dilemmas faced by most member countries emphasizing that accession would assist the integration of current immigrants in Europe Turkish Immigrants in the European Union addresses the following What are the demographic trends in Turkey compared to the member countries What is the potential scope and driving forces of immigration from Turkey to the EU How will these trends affect Turkish immigrants in Europe What is the integration problem of Turkish immigrants and how can it be resolved This book was previously published as a special issue of Turkish Studies and will be of interest to students and scholars of European studies and European integration      **Population Ageing in Central and Eastern Europe** Andreas Hoff, 2016-04-08 During the 1990s Europe became the first continent with a mature society where people aged 60 years and older outnumber children and as this trend continues the resulting ageing societies will differ from previous societies in their make up in their needs and in their resource allocation Population ageing poses an even greater challenge to the post communist societies of Central and Eastern Europe While still struggling to cope with the aftermath of the economic and social transition process following the breakdown of communism they are now facing even more rapid demographic change than Western Europe This book brings together leading scholars to present an understanding of the processes underlying the very rapid population ageing in Central and Eastern Europe In addition to discussing the main demographic drivers behind this development in each of the countries examined this volume also discusses its implications for policy healthcare provision workforces intergenerational family relations the social cohesion of future Central and Eastern European societies and the quality of life experienced by their citizens Organised around broad geographical regions with final sections analysing the book's findings and their future implications Population Ageing in Central and Eastern Europe will be of interest to gerontologists policy makers students and scholars of population change      *Demographic Change in Japan and the EU* Annette Schad-Seifert, Shingo Shimada, 2010-11-01 This volume contains selected papers of the 2008 annual conference of the German Association for Social Science Research on Japan Vereinigung f r sozialwissenschaftliche Japanforschung e V

VSJF The academic meeting has addressed the issue of demographic change in Japan in comparison to the social developments of ageing in Germany and other member states of the European Union The conference was organized by the Institute for Modern Japanese Studies at Heinrich Heine University of Duesseldorf and took place at the Mutter Haus in Kaiserswerth an ancient part of Duesseldorf Speakers from Germany England Japan and the Netherlands presented their papers in four sessions on the topics Demographic Trends and Social Analysis Family and Welfare Policies Ageing Society and the Organization of Households and Demographic Change and the Economy Central to all transnational and national studies on demographic change is the question of how societies can be reconstructed and be made adaptive to these changes in order to survive as solidarity communities The authors of this volume attend to this question by discussing on recent trends of social and economic restructuring and giving insight into new research developments such as in the area of households and housing family care work medical insurance robot technology or the employment sector **Population**

**Decline and the Remaking of Great Power Politics** Susan Yoshihara, Douglas A. Sylva, 2012 The destabilizing effects of population decline Impact of Rich Countries' Policies on Poor Countries Robert Picciotto, Rachel Weaving, 2011-12-31 All United Nations heads of state have endorsed the Millennium Development Goals which aim to reduce the incidence of absolute poverty by half by 2015 To reach those goals growth in developing countries will have to be twice the levels achieved in the 1990s for the next fifteen years This will require at the least new rules of the development game At present rich countries exercise control over the institutions that oversee the global economy This volume addresses a curiously neglected area of policy analysis the impact of rich countries policies on the global poor Four fifths of the world s people subsist on one fifth of the world s income One fifth live in abject poverty on less than one dollar a day The main responsibility for reducing poverty reduction naturally rests with developing countries But globalization means that rich countries must also play their part Industrialized countries dominate global environmental management through the heavy ecological footprint of their production and consumption patterns Adjustments of their policies by rich countries may be as critical as government reforms in poor countries Past research has concentrated on policy adjustments that need to be made within poor countries to aid effectiveness and trade reform Relatively little is known about the economic consequences of migration control of intellectual property and environmental regulations Even less research has been done on the interaction and combined impact of the full spectrum of rich countries policies on the economy society and ecology in poor countries These knowledge gaps inhibit rational debate let alone evidence based policymaking that may lead towards sustainable and equitable growth At current levels aid alone cannot deliver adequate progress towards the Millennium Development Goals The surveys by eminent development analysts and practitioners included in this volume sketch a road map for a better understanding of the mechanics of globalization and the improved design of development policies **Population Politics** Mike Dixon, Julia Margo, 2006 Europe s demographic trends are reshaping its social landscape and the life chances of its

citizens Britain's politicians need to pay heed and plan say Mike Dixon Julia Margo of the Institute of Public Policy Research

Gavin J. Andrews, David R. Phillips, 2004-11-10 During recent years an increasing amount of academic research has focused on older people with a particular emphasis on settings places and spaces This book provides a comprehensive review of research and the policy area of ageing and place An insightful book on an important topic Andrews and Phillips have together edited a valuable information and reference source for those with interests in the spatial dimensions of ageing in the twenty first century Ranging from macro scale perspectives on the distribution of older populations on national scales to the meaning of specific local places and settings to older individuals on the micro scale the book spans an entire range of research traditions and international perspectives *Encyclopedia of Government and Politics* M. E. Hawkesworth, Maurice Kogan, 2004 This is a brand new edition of the critically acclaimed Encyclopedia of Government and Politics which has been fully revised and updated to provide a systematic account of politics and political studies at the beginning of the new millennium Providing a penetrating analysis of government and politics at a global regional and nation state level the Encyclopedia assesses both traditional and contemporary approaches and projects the paths of future research The articles provide a degree of critical analysis far beyond a simple descriptive outline of the subject Internationally respected contributors have been carefully selected to present contending approaches to related topics both to clarify the political implications of the various methodologies and to enrich the portrayal of political life With its expanded revised and updated coverage Encyclopedia of Government and Politics is more than ever an indispensable tool for students teachers professional analysts and policy makers *Population Ageing and Economic Growth* Sandra Gruescu, 2007-05-26 1 1 Motivation and main question of this research A modern society faces two alternatives with regards to its population trend It can either grow or age A population which chooses not to grow any more or which chooses to shrink will necessarily age And because of the impossibility of all populations in all countries growing forever it is likely that every country will face this ageing process at some point in time Because of this and the importance of economic growth for the well being of a society the relationship

between an ageing population and economic growth will be relevant for each country. It is already an important and much discussed matter for many. Although population ageing is faced by virtually all industrialised countries, the time frame and the intensity of the process vary. The substantial changes forecasted for the demographic structure of many countries over coming decades have led to substantial research activity aiming to analyse and quantify the effects of these changes on a nation's economic performance. A change in population size and population growth rate can affect both the demand and supply side of an economy. The extent of the effects, however, is not clear. The structure of a population, for example, regarding distribution of age or gender, may also influence the economic performance of a society.

**Rural Aging in 21st Century America** Nina Glasgow, E. Helen Berry, 2012-12-14. This book investigates sociological, demographic, and geographic aspects of aging in rural and nonmetropolitan areas of the United States. Population aging is one of the most important trends of the 20th and 21st centuries, and it is occurring worldwide, especially in more developed countries such as the United States. Population aging is more rapid in rural than urban areas of the U.S. In 2010, 15 percent of the nonmetropolitan compared to 12 percent of the metropolitan population were 65 years of age and older. By definition, rural communities have smaller sized populations and more limited healthcare, transportation, and other aging relevant services than do urban areas. It is thus especially important to study and understand aging in rural environments. *Rural Aging in 21st Century America* contributes evidence-based, policy relevant information on rural aging in the U.S. A primary objective of the book is to improve understanding of what makes the experience of rural aging different from aging in urban areas and to increase understanding of the aged change the nature of rural places. The book addresses unique features of rural aging across economic, racial, ethnic, migration, and other structures and patterns, all with a focus on debunking myths about rural aging and to emphasize opportunities and challenges that rural places and older people experience.

**The Family in the New Millennium** Thomas B. Holman, A. Loveless, 2006-12-30. A remarkable team of contributors based across 19 countries explores and explains events worldwide affecting the natural family: married father and mother with biological children, detailing concepts and benefits of natural family that have been taken for granted across centuries but are now being challenged in many ways. These scholars, many admittedly taking stands that may be deemed politically incorrect, conclude that natural family is being threatened and is vital to provide common ground among all societies, cultures, and religious traditions. Psychologists, sociologists, economists, theologians, lawyers, health care professionals, and award-winning journalists are among the chapter authors, as are Nobel Prize Laureate Gary Becker, U.S. Department of Health Assistant Secretary for Children and Families Wade Horn, and former Prime Minister of Malaysia Mahathir Bin Mohamad. Whether or not you agree with their arguments, science and conclusions you'll want to know what these influential figures are saying. Addressing many lightning rod issues from divorce and abortion to euthanasia and same sex marriage, writers here span the world from the United States, Canada, and the United Kingdom to Australia, Turkey, India, and China. Intellectuals included are associated with

institutions from Brigham Young University Georgetown School of Medicine and the Boston College School of Law to the University of Geneva and the Maxim Institute in New Zealand      **Mainstreaming Ageing** Asghar Zaidi, 2017-09-29 The Madrid International Plan of Action on Ageing MIPAA adopted at the Second World Assembly on Ageing is the first international agreement that specifically recognises the potential of older people to contribute to the development of their societies In monitoring its implementation two key approaches are evident a qualitative bottom up participatory approach and an approach that uses quantitative indicators to monitor sustainable progress and policies With the European Centre for Social Welfare Policy and Research playing a pivotal role in the monitoring of the implementation process one of its key tasks has been to develop a list of indicators of achievement This book contains extended and revised versions of policy briefs and background papers that support the implementation monitoring process The analyses included in these chapters make concrete suggestions towards quantitative indicators with the aim of assisting national governments in mainstreaming ageing in their policies The contributors provide an overview of the current situation with respect to population ageing and its consequences and also provide projections for the future The book also includes the final list of quantitative indicators that arose out of consultations with international experts related to the four main topics addressed demography income and wealth labour market participation and social protection and financial sustainability      **Soft Or Hard Borders?** Joan DeBardeleben, 2017-07-05 Bringing together leading European and North American experts this timely volume answers questions about the implications and management of the new external borders of the European Union following another phase of enlargement Implications of the EU's new external border especially its eastern border with Russia and Ukraine will be a key issue for the new member countries for the EU and for the new neighbouring regions The contributors address this emerging question from two perspectives They examine whether an expanded Europe will create a new dividing line in Europe between insiders and outsiders and also consider the concrete problems of border management and how the issues will be handled The book will be of particular value to those concerned with European politics and the expansion of Europe and to those with an interest in political sociology      What to Expect When No One's Expecting Jonathan V. Last, 2014-06-10 Look around you and think for a minute Is America too crowded For years we have been warned about the looming danger of overpopulation people jostling for space on a planet that's busting at the seams and running out of oil and food and land and everything else It's all bunk The population bomb never exploded Instead statistics from around the world make clear that since the 1970s we've been facing exactly the opposite problem people are having too few babies Population growth has been slowing for two generations The world's population will peak and then begin shrinking within the next fifty years In some countries it's already started Japan for instance will be half its current size by the end of the century In Italy there are already more deaths than births every year China's One Child Policy has left that country without enough women to marry its men not enough young people to support the country's elderly and an impending population contraction that has the ruling

class terrified And all of this is coming to America too In fact it s already here Middle class Americans have their own informal one child policy these days And an alarming number of upscale professionals don t even go that far they have dogs not kids In fact if it weren t for the wave of immigration we experienced over the last thirty years the United States would be on the verge of shrinking too What happened Everything about modern life from Bugaboo strollers to insane college tuition to government regulations has pushed Americans in a single direction making it harder to have children And making the people who do still want to have children feel like second class citizens What to Expect When No One s Expecting explains why the population implosion happened and how it is remaking culture the economy and politics both at home and around the world Because if America wants to continue to lead the world we need to have more babies **The Cultural Defense of Nations**

Liav Orgad,2015-11-05 The Cultural Defense of Nations presents a timely thought provoking thesis on some of the most pressing issues of our time global immigration majority groups and national identity Never in human history has so much attention been paid to human movement Global migration yields demographic shifts of historical significance profoundly shaking up world politics as has been seen in the refugee crisis the Brexit referendum and the 2016 U S election The Cultural Defense of Nations addresses one of the greatest challenges facing liberalism today is a liberal state justified in restricting immigration and access to citizenship in order to protect its majority culture Liberal theorists and human rights advocates recognize the rights of minorities to maintain their unique cultural identity but assume that majorities have neither a need for similar rights nor a moral ground for defending them The majority culture so the argument goes can take care of itself However with more than 250 million immigrants worldwide majority groups increasingly seek to protect what they consider to be their national identity In recent years liberal democracies have introduced proactive immigration and citizenship policies that are designed to defend the majority culture This book shifts the focus from the prevailing discussion of cultural minority rights and for the first time addresses the cultural rights of majorities It proposes a new approach by which liberal democracies can welcome immigrants without fundamentally changing their cultural heritage forsaking their liberal traditions or slipping into extreme nationalism Disregarding the topic of cultural majority rights is not only theoretically wrong but also politically unwise With forms of majority nationalism rising and the growing popularity of extreme right wing parties in the West time has come to liberally address the new challenge **Handbook of Population** Dudley L.

Poston,Michael Micklin,2006-08-10 This comprehensive handbook provides an overview and update of the issues theories processes and applications of the social science of population studies The volume s 30 chapters cover the full range of conceptual empirical disciplinary and applied approaches to the study of demographic phenomena This book is the first effort to assess the entire field since Hauser and Duncan s 1959 classic The Study of Population The chapter authors are among the leading contributors to demographic scholarship over the past four decades They represent a variety of disciplines and theoretical perspectives as well as interests in both basic and applied research
