Report Of The Miller Center Commission On The Presidency And Science Advising:

Report of the Miller Center Commission on the Presidency and Science Advising Miller Center Commission on the Presidency and Science Advising, 1989-01 The commission consisting of nine highly placed public officials scientists educators science advisers and science writers looked at science advising as a presidential question rather than one of science policy The core proposition of this report is that the president needs a strong system of science advising which includes a skilled chief science adviser assisted by well qualified staff and with ready access to nongovernmental sources of advice and knowledge Furthermore the commission recommends that a new president consider a spectrum of possible roles for this very flexible staff position and select the roles that best satisfy his needs rather than accept a particular historical model of science advice A major responsibility of a science adviser is to give the president access to the expertise he needs from the science and engineering community inside and outside government Co published with the Miller Center of Public Affairs **The Presidency and Science Advising** Kenneth W. Thompson, 1986 Miller Center Journal, 1995 Kenneth W. Thompson, The Prophet of Norms F. Rajae, 2013-03-12 The aim of this book is to capture the international thought and practice of Kenneth W Thompson His career embodied three roles in which he revealed his thoughts and practice as a facilitator of space for encouraging debates scholarship and practice as an educator and most importantly as a theorist of international relations The Miller Center Papers Pat Dunn, 1998 *Science & Government Report*, 1989 **Science Trends**, 1988-11 Worldwide Science and Technology Advice to the Highest Levels of Governments William T. Golden, First published in 1990 Routledge is an imprint of Taylor Francis an informa company To Assure Pride and Confidence in the Electoral Process Jimmy Carter, Gerald R. Ford, Lloyd N. Cutler, 2004-05-26 In 2000 the American electoral system was tested by a political ordeal unlike any in living memory Not since 1876 77 has the outcome of a national election remained so unsettled for so long The past election s recount conundrum shook the nation s faith in the mechanisms that support the democratic process Led by former Presidents Ford and Carter the National Commission on Federal Election Reform undertook a study of the American electoral system The resulting report describes where and what went wrong during the 2000 election and makes clear and specific recommendations for reform directed at state government Congress news organizations and others This volume also includes the full text of the Task Force Reports from the Commission

Freedom's Laboratory Audra J. Wolfe, 2020-08-04 The Cold War ended long ago but the language of science and freedom continues to shape public debates over the relationship between science and politics in the United States Scientists like to proclaim that science knows no borders Scientific researchers follow the evidence where it leads their conclusions free of prejudice or ideology But is that really the case In Freedom s Laboratory Audra J Wolfe shows how these ideas were tested to their limits in the high stakes propaganda battles of the Cold War Wolfe examines the role that scientists in concert with administrators and policymakers played in American cultural diplomacy after World War II During this period the

engines of US propaganda promoted a vision of science that highlighted empiricism objectivity a commitment to pure research and internationalism Working both overtly and covertly wittingly and unwittingly with governmental and private organizations scientists attempted to decide what exactly they meant when they referred to scientific freedom or the US ideology More frequently however they defined American science merely as the opposite of Communist science Uncovering many startling episodes of the close relationship between the US government and private scientific groups Freedom s Laboratory is the first work to explore science s link to US propaganda and psychological warfare campaigns during the Cold War Closing in the present day with a discussion of the 2017 March for Science and the prospects for science and science diplomacy in the Trump era the book demonstrates the continued hold of Cold War thinking on ideas about science and politics in the United States *Report on Activities ...* John D. and Catherine T.
