

Report Writing

By Doug Knight

Why is an engineer in an English class?

Engineers must communicate - everyone must communicate somehow - writing is still the main method of communicating when you can't talk face to face

In my case, I have written reports on one subject and another all my career, and for six years I have been a technical writer

A technical writer translates the engineer's notes, drawings, etc into manuals that tell people how to use and fix things - writes many other things also

What kinds of writers are there? KEEP SHORT

Fiction - story tellers

Non-fiction - write about real things, or situations - just about any topic where the subject is real

Journalist

Historian

General non-fiction (cookbooks, how to books, investigations)

Technical (instruction manuals, reports, specifications)

Business (memos, reports, usually on an organisational - get things done - theme)

Advertising (everything in the best light)

Who is a writer writing for?

The reader

The reader is the most important person in the writing process

The writer must do the thinking for the reader - must answer all the questions that the reader will have - and answer them at the right time - the reader cannot stick up their hand

ALWAYS THINK OF THE READER

Annual Report for the Fiscal Year Ending ... to the Governor Indiana State School for the Deaf,1919

The National Education Goals Report ,1995

The Writing Report Card, 1984-88 Arthur N. Applebee,1990 Based on two national assessments of the writing proficiency of representative samples of students in grades 4 8 and 11 conducted during the school years ending in 1984 and 1988 this report assesses the informative persuasive and imaginative writing performance of

the nation's students and tracks changes in performance over time. The first three chapters of the report describe student performance on the informative, persuasive, and imaginative writing tasks included in the writing trend assessments based on the results of the primary trait and holistic analyses. The fourth chapter summarizes trends in average task accomplishment for the nation and various demographic subpopulations. In the fifth chapter, trends in students' grammar, punctuation, and spelling are discussed. The sixth chapter discusses factors that appear to be related to writing performance, such as students' instructional experiences and home environment. The report concludes that despite some progress on some tasks, students' writing performance across tasks remains low and has changed little across time. The report also finds that the extent to which students at all grade levels value writing, use it in their own lives, and engage in writing process activities remains quite limited. A procedural appendix and an appendix of data are attached. RS
