

COMMON ESG REPORTING FRAMEWORKS

GLOBAL REPORTING INITIATIVE (GRI)

The GRI comprises a set of three standards — universal, sector, and topic — to help organizations prepare an effective ESG report. Organizations can use any combination of standards (e.g., a broad standard on climate change alongside a sector-specific one on fossil fuel usage), depending on their industry and goals.

Over 7 in 10 of the world's largest companies use GRI in their ESG reporting, making it the most commonly used framework. Through their website, you can download their reporting information, learn more about their standards, and register your ESG report with them.

United Nations
Global Compact

UNITED NATIONS GLOBAL COMPACT (UNGC)

The UNGC enables organizations to align themselves with the United Nations' Sustainable Development Goals (SDGs), approved and adopted by all member states of the UN. The UNGC provides 10 principles organizations can follow, which cover human rights, labor, environment, and anti-corruption.

You can join the UNGC on their website, enlist in courses about sustainability through their academy, and learn more about the UN's sustainability goals.

TCFD

Task Force on
Climate-Related
Financial Disclosures

TASK FORCE ON CLIMATE-RELATED FINANCIAL DISCLOSURES (TCFD)

Created by the Financial Stability Board, the TCFD helps companies disclose the right type of information to ensure investors can accurately price and assess risks related to sustainability. Organizations can use TCFD to ensure they publicize appropriate and consistent disclosures related to climate change.

You can download their recommendations — which encompass governance, strategy, risk management, and metrics — and learn more about their research on their website.
