Repositioning Feminism And Education:

Repositioning Feminism & Education Janice Jipson, 1995-08-22 This book presents testimony of feminisms in process The accounts are filled with tensions not least an uneasiness with feminism itself and the question of what exactly it means to be a feminist in education in the contemporary world It is their respect for their own differences and the honesty with which they write that makes this such a rich text From the Foreword by Kathleen Weiler Educators committed to social change face the common dilemma of how to take up the work of transformation without reinscribing systems of domination The struggle with the concept of imposition is central to the emergence of many educators identities and provides a site for exploring the complex relationship between power knowledge and teacher identity This book chronicles the collaborative efforts of five diverse women educators Native American European Jewish American rural midwestern working class to grapple with the tensions of taking up a political position while honoring the cultural social and historical context of others Their dialogue across feminist critical and postmodern theories and practices explores the process of fusing theory with political work in the world What emerges is the continual repositioning and disruption of taken for granted meanings as central to enhancing emancipatory education

Feminisms and Educational Research Wendy R. Kohli, Nicholas C. Burbules, 2011-12-29 Feminist theory has come a long way from its nascent beginnings no longer can it be classified as liberal socialist or radical It has shaped and evolved to take on multiple meanings and forms each distinct in its own perspective and theory In *Feminisms and Educational Research* the authors explore the various forms of feminisms tracing their history and their relation to gendered knowledge and identity Unlike other books on feminism the authors do not attempt to push that a particular theory is more correct than another but rather they give a complete overview of each of the forms of feminism The authors then couple the philosophical and theoretical ideas of western feminisms with the aims and conduct of educational research exploring how they interact and influence each other Focusing on more recent feminists both in education and related disciplines the book highlights illustrative examples from research to form a basis of understanding how the different feminisms have changed education

Wendy R. Kohli, Nicholas C. Burbules, 2012-07-01 The latest book in the *Philosophy Theory and Educational Research* series introduces the main philosophical and theoretical ideas of recent western feminisms as it applies to educational research Unlike other books that focus on these topics the authors present a balanced overview of the issues instead of pushing a particular perspective

Educating the Other Dr Carrie Paechter, Carrie Paechter, 2002-11 Despite improvements in girls relative academic success at the school leaving level this book examines how and why girls education remains subordinated to that of the boys

Under the Sign of Hope Leslie Rebecca Bloom, 1998-01-01 *Under the Sign of Hope* examines the practices of life history ethnographic fieldwork and interpretation of

women's narratives ultimately asserting the importance of self reflexivity for feminist methodology Bloom takes the stance that what is critical to research is an ability to analyze the complexities of researcher participant relationships and the limitations of narrative interpretation

Feminist Critical Policy Analysis: A perspective from primary and secondary schooling Catherine Marshall, 1997

Postmodern Philosophical Critique and the Pursuit of Knowledge in Higher Education Roger Mourad, 1997-08-30 This work explores the philosophical positions of five postmodern thinkers Lyotard Rorty Schrag Foucault and Derrida to show how their critiques imply that scholars are unduly limited by the belief that inquiry is fundamentally about gaining knowledge of phenomena that are assumed to exist prior to and independent of inquiry and to persist essentially unchanged by inquiry The author argues that there are good reasons why this constraint is both unnecessary and undesirable and he resituates the disciplines within a more flexible foundation that would expand what counts as legitimate inquiry This foundation would emphasize the inquirer as a cause of reality not just an observer who aims to accurately describe and explain phenomena Mourad proposes an intellectual and organizational form which he calls post disciplinary research programs These dynamic programs would be composed of scholars from diverse disciplines who collaborate to juxtapose disparate disciplinary concepts in order to create contexts for post disciplinary inquiries

Pregnant Bodies, Fertile Minds Wendy Luttrell, 2014-05-22 Focusing on fifty girls enrolled in a model public school program for pregnant teens Luttrell explores how pregnant girls experience society's view of them and also considers how these girls view themselves and the choices they've made Also includes an 8 page color insert

Qualitative Research Sandra G. Kouritzin, Nathalie A.C. Piquemal, Renee Norman, 2009-02-15 Evocative and provocative this book presents the points of view of often junior scholars in the social sciences who used non standard methods or writing practices to challenge the research as usual paradigm in the academy The authors discuss their lived personal experiences as well as their struggles and eventual successes

Women's Studies Linda Krikos, Cindy Ingold, 2004-08-30 This truly monumental work maps the literature of women's studies covering thousands of titles and Web sites in 19 subject areas published between 1985 and 1999 Intended as a reference and collection development tool this bibliography provides a guide for women's studies information for each title along with a detailed often evaluative review The annotations summarize each work's content its importance or contribution to women's studies and its relationship to other titles on the subject Core titles and titles that are out of print are noted and reviews indicate which titles are appropriate as texts or supplemental texts This definitive guide to the literature of women's studies is a must purchase for academic libraries that support women's studies programs and it is a useful addition to any academic or public library that endeavors to represent the field A team of subject specialists has taken on the immense task of documenting publications in the area of women's studies in the last decades of the 20th century The result is this truly monumental work which maps the field covering thousands of titles and Web sites in

19 subject areas published between 1985 and 1999. Intended as a reference and collection development tool, this bibliography provides a guide for women's studies information for each title along with a detailed, often evaluative review. The annotations summarize each work's content, its importance or contribution to women's studies, and its relationship to other titles on the subject. Most reviews cite and describe similar and contrasting titles, substantially extending the coverage. Core titles and titles that are out of print are noted, and reviews indicate which titles are appropriate as texts or supplemental texts. Taking up where the previous volume by Loeb Searing and Stineman left off, this is the definitive guide to the literature of women's studies. It is a must purchase for academic libraries that support women's studies programs and a welcome addition to any academic or public library that endeavors to represent the field.

Visual Pedagogies in Higher Education, 2022-10-17

The use of images in education is expanding, but clear and comprehensive guidelines on how to carry out visual activities with students of a variety of fields are difficult to find. With the case studies from Finland, Canada, the United Kingdom, Australia, Japan, Poland, Turkey, and the United States, contributors to this volume offer detailed reflections on the pedagogical role of using images in higher education. Examples include drawing, collage making, video production, object-based learning, photography projects, and many more. The book constructs a solid argument for the further development of visual pedagogies in higher education, highlighting the need to support students in advancing their visual competency as it has become fundamental to command in everyday life and professional contexts. Contributors are Gyuzel Gadelshina, Tad Hara, Joanna Kdra, McKenzie Lloyd Smith, Gary McLeod, Olivia Meehan, Marianna Michaowska, Iryna Molodecky, Pinar Nuhoğlu, Kibar Paul Richter, Karen F. Tardrew, Rob Wilson, and Rasa Akevi.

Feminist Critical Policy Analysis I, Catherine Marshall, 2020-09-23

This text sets out to challenge the traditional power basis of the policy decision makers in education. It contests that others who have an equal right to be consulted and have their opinions known have been silenced, declared irrelevant, postponed, and otherwise ignored. Policies have thus been formed and implemented without even a cursory feminist critical glance. The chapters in this text illustrate how to incorporate critical and feminist lenses and thus create policies to meet the lived realities, the needs, aspirations, and values of women and girls. A particular focus is the primary and secondary sectors of education.

Gendered Futures in Higher Education, Becky Ropers-Huilman, 2012-02-01. This volume addresses the ways in which gender takes shape in and is shaped by higher education environments. Focusing on historical knowledge and contemporary experience, the contributors identify several key gender issues affecting students, faculty, and leaders in higher education. They examine such diverse topics as what lessons women's colleges have to offer, violence on campus, women faculty, and part-time employment, and intersecting identities of race and gender, and they apply critical perspectives to suggest needed change. While they may not agree on the necessary strategies to improve higher education environments, they do agree that those environments are currently deeply and problematically gendered.

The Politics of Early Childhood Education, Lourdes Diaz Soto, 2000. As the conservative political mood of our nation eliminates programs for the increasing

numbers of bilingual children educators are nevertheless expected to teach linguistically and culturally diverse learners with limited background knowledge and resources This edited volume challenges mainstream educators to critically examine how to best meet the needs of bilingual bicultural children in contemporary America Culture and Difference Antonia Darder, 1995-12-30 The yearning to remember who we are is not easily detected in the qualitative dimensions of focus groups and ethnographic research methods nor is it easily measured in standard quantified scientific inquiry It is deeply rooted obscured by layer upon layer of human efforts to survive the impact of historical amnesia induced by the dominant policies and practices of advanced capitalism and postmodern culture Darder's introduction sets the tone by describing the formation of Warriors for Gringostroika and The New Mestizas In the words of Anzaldua those who cross over pass over the confines of the normal Critical essays follow by Mexicanas poets activists and educators of all colors and persuasions The collection coming out of the good work of the Southern California University system relates to all locales and spectrums of the human condition and will no doubt inspire excellent creativity of knowing and remembering among all who chance to read any part thereof **Contemporary Curriculum Discourses** William F. Pinar, 1999 JCT was the most important journal of curriculum studies during the field's paradigm shift in the 1970s Its editors sponsored a yearly conference which also supported the intellectual breakthrough that was the reconceptualization of American curriculum studies This collection brings together the best of JCT articles plus key documentary material of importance to scholars and students alike Undergraduate and graduate students in curriculum instruction and foundations would find this book useful and insightful
