## **Representations Of Finite Chevalley Groups:**

*Representations of Finite Chevalley Groups* B. Srinivasan, 2006-11-14      **Representations of Finite Chevalley Groups**  
B. Srinivasan, 2014-09-01      *Representations of Finite Chevalley Groups* George Lusztig, 1978 The notes came from a series of lectures given by the author at a CBMS Regional Conference held at Madison Wisconsin in August 1977 The main purpose of the notes was to show how  $l$  adic cohomology of algebraic varieties over fields of positive characteristic can be used to obtain information on the representations of finite Chevalley groups      **Representations of finite Chevalley groups**  
Bhama Srinivasan, 1979      *Representations of Finite Chevalley Groups* James E. Humphreys, 1976      Vertices of irreducible representations of finite Chevalley groups in the describing characteristic Richard Dipper, 1980      *On Some Problems in Representation Theory of Finite Chevalley Groups* Corneliu Hoffman, 1998      Modular Representations of Finite Groups of Lie Type James E. Humphreys, 2006 A comprehensive treatment of the representation theory of finite groups of Lie type over a field of the defining prime characteristic      *The Arcata Conference on Representations of Finite Groups, Part 1* Paul Fong, 1987 The papers in these proceedings of the 1986 Arcata Summer Institute bear witness to the extraordinarily vital and intense research in the representation theory of finite groups The confluence of diverse mathematical disciplines has brought forth work of great scope and depth Particularly striking is the influence of algebraic geometry and cohomology theory in the modular representation theory and the character theory of reductive groups over finite fields and in the general modular representation theory of finite groups The continuing developments in block theory and the general character theory of finite groups is noteworthy The expository and research aspects of the Summer Institute are well represented by these papers

**Ordinary and Modular Representations of Chevalley Groups** J. E. Humphreys, 2006-11-14      *Representations of Groups* Bruce Normansell Allison, Gerald Howard Cliff, Canadian Mathematical Society, 1995 Survey and research articles from the June 1994 seminar address representations of Lie algebraic finite and quantum groups and the relationships among these areas Topics include complex reflection groups and their associated braid groups automata to perform basic calculations in Coxeter groups Heck algebras and representations of finite reductive groups and Koszul algebras and duality Of interest to graduate students and research mathematicians No index Annotation copyright by Book News Inc Portland OR

Groups, Combinatorics & Geometry A. A. Ivanov, Martin W. Liebeck, Jan Saxl, 2003 This book contains the proceedings of the L M S Durham Symposium on Groups Geometry and Combinatorics July 16 26 2001 P v      Representations of Algebraic Groups Jens Carsten Jantzen, 2003-01-01 Now back in print by the AMS this is a significantly revised edition of a book originally published in 1987 by Academic Press This book gives the reader an introduction to the theory of algebraic representations of reductive algebraic groups To develop appropriate techniques the first part of the book is an introduction to the general theory of representations of algebraic group schemes Here the author describes important basic notions induction functors cohomology quotients Frobenius kernels and reduction mod  $p$  among others The second part of the book is

devoted to the representation theory of reductive algebraic groups It includes topics such as the description of simple modules vanishing theorems the Borel Bott Weil theorem and Weyl's character formula and Schubert schemes and line bundles on them For this revised edition the author added nearly 150 pages of new material describing some later developments among them Schur algebras Lusztig's conjecture and Kazhdan Lusztig polynomials tilting modules and representations of quantum groups He also made major revisions to parts of the old text Jantzen's book continues to be the ultimate source of information on representations of algebraic groups in finite characteristics It is suitable for graduate students and research mathematicians interested in algebraic groups and their representations Low Rank

Representations and Graphs for Sporadic Groups Cheryl E. Praeger, Leonard H. Soicher, 1996-12-05 This book presents a complete classification of the transitive permutation representations of rank at most five of the sporadic simple groups and their automorphism groups together with a comprehensive study of the vertex transitive graphs associated with these representations Included is a list of all vertex transitive distance regular graphs on which a sporadic almost simple group acts with rank at most five In this list are some new interesting distance regular graphs of diameter two which are not distance transitive For most of the representations a presentation of the sporadic group is given with words in the given generators which generate a point stabiliser this gives readers sufficient information to reconstruct and study the representations and graphs Practical computational techniques appropriate for analysing finite vertex transitive graphs are described carefully making the book an excellent starting point for learning about groups and the graphs on which they act
