**Visual and Linguistic Representations of Places of Origin** Maria Pia Pozzato, 2017-12-05 This book is about the representations both visual and linguistic which people give of their own places of origin It examines the drawings of interviewees who were asked to draw their own place of origin on a white A3 sheet using pencil or colour according to their choice If they were born in a place they did not remember because they moved in when they were very small they could draw the place they did remember as the scenario of their early childhood The drawings are examined from three different perspectives semiotics cognitive psychology and geography The semiotic instruments are used to describe how each person reconstructs a complex image of his/her childhood place and how they translate their own memories from one language to another e.g. from drawing to verbal story trying to approach what they want to express in the best possible way The cognitive psychological point of view helps clarify the emotional world of the interviewees and their motivations during the process of reconstruction and expression of their childhood experiences The geographical conceptualizations concern a cultural level and provide insight into the cartographic models that inspire the maps people drew One of the main findings was the influence from cultural codes as demonstrated in the fact that most of the US students interviewed drew their maps showing considerable cartographic expertise in comparison to their European counterparts

**Making Markets Making Place** Benjamin Coles, 2021-05-03 This book examines place and place making in London's Borough Market In particular it uses topography place writing to interrogate the ways in which Borough Market's material social sensual and discursive relations assemble to reproduce Borough Market as a place market and marketplace Its central premise is that market processes the negotiation and exchange of commodities are place processes This means that the often abstract relationships that ultimately define what we think of as the economy are embedded in the rich and every materiality sociality sensuality and meanings associated with place By tracing out these different elements topography illustrates the ways in which economic reproduction is grounded in particular and often discrete practices However by assembling them together this highlights the ways in which place and place making are the driving force behind the economy at large

**Fitting Into Place?** Yvette Taylor, 2012 This title adopts a multi dimensional approach to explore women's lives in context of de industrialization and the transition to a service sector leisure based economy The themes of mobility and transformation occupy centre stage as the book explores the ways in which gender and class may be reconfigured in changing times

**Conceptions of Space and Place in Strategic Spatial Planning** Simin Davoudi, Ian

Strange,2008-11-24 Bringing together authors from academia and practice this book examines spatial planning at different places throughout the British Isles Six illustrative case studies of practice examine which conceptions of space and place have been articulated presented and visualized through the production of spatial strategies Ranging from a large conurbation London to regional Yorkshire and Humber and national levels the case studies give a rounded and grounded view of the physical results and the theory behind them While there is widespread support for re orienting planning towards space and place there has been little common understanding about what constitutes spatial planning and what conceptions of space and place underpin it This book addresses these questions and stimulates debate and critical thinking about space and place among academic and professional planners *Practice of Petri Nets in Manufacturing* F. Dicesare,George

Harhalakis,Jean-Marie Proth,Manuel Silva-Suarez,F. Vernadat,2012-12-06 M Silva Significant changes have been occurring in industrialized countries since the Second World War Production is moving towards sophisticated high quality products economy of scale has been replaced by economy of scope jerky demands are progressively replacing steady demands and competitiveness is becoming a worldwide phenomenon These trends require highly automated manufacturing systems with small set up times and high flexibility As a consequence implementation and running costs of modern manufacturing systems are drastically increasing whereas their fields of application remain limited and every day become even narrower which increases the risk of early obsolescence This is the reason why designers are trying to improve the preliminary design phase also known as the paper study phase The preliminary design phase includes but is not limited to the functional specification and the evaluation of the system Many tools exist to support the functional specification of manufacturing systems IDEFO is one of these tools It leads using a top down approach to a precise functional description of the required system However its use cannot be extended further In general the evaluation starts with a modeling step which depends on the evaluation tool used and ends by applying the model to find out its main dynamic characteristics Two main approaches can be used to perform this task namely simulation and mathematical approach Using simulation the modeling tool is either a classical computer language or a simulation language Planning Urban Places Mary Ganis,2015-06-19 Urban change is often

difficult because we are dealing with people's elusive notions of place and perception time and change Urban design and planning in a changing urban context so that it remains relevant for people is elusive because the idea of place is embedded in memory and identity but whose memory and whose identity This book seeks to understand the urban change dynamic so that the planning of urban places aligns with the dynamic of people's perception of place Planning Urban Places examines the premise that building cities is a concrete business surrounded by a shifting context It discusses the notion of urban design and placemaking from the perspective of place perception and cognitive psychology place philosophy and human geography It also considers network theory to help illustrate the self organising paradigm of small world network theory for planning urban places *The Origin and Significance of Zero* ,2024-03-11 Winner of the 2024 Outstanding Academic Titles
