Trump, White Evangelical Christians, and American Politics Anand Edward Sokhey,Paul A. Djupe,2024-03-05 In Trump White Evangelical Christians and American Politics political scientists Anand Edward Sokhey and Paul A Djupe bring together a wide range of scholars and writers to examine the relationship between former President Donald Trump and white American evangelical Christians They argue that while this relationship which saw evangelicals supporting a famously unfaithful materialistic and irreligious candidate despite self defining in opposition to these characteristics prompted many to wonder if Trump himself transformed American evangelical religion in politics this alliance reflected both change and the outcome of dynamics that were in place or building for decades Contributors contextualize the Trump presidency within the story of religious demographic change the growth of politicized religion nationalistic religious expression and the ways religion and politics in the United States are

enmeshed in the politics of race These investigations find that the idea of religious transformation is not accurate Instead the years 2015 to 2022 saw mainly minor changes to the ways religion appeared in public life but these changes ultimately complemented and advanced an existing white evangelical strategy to increase political and social power as they became a demographic minority in the United States Taken together this collection reveals new insights for readers seeking to understand the religious dimensions of Trump's rise the reasons evangelicals become political activists and the multifaceted alliances between secular politicians and conservative religious subcultures Contributors Abraham Barranca Ruth Braunstein Ryan P Burge David E Campbell Jeremiah J Castle Paul A Djupe John C Green Sarah Heise Geoffrey C Layman Andrew R Lewis Gerardo Mart Eric L McDaniel Napp Nazworth Shayla F Olson Enrique Quezada Llanes Kaylynn Sims Anand Edward Sokhey Hilde L vdal Stephens Kyla K Stepp Allan Tellis

Protest and Resistance in the Chinese Party State Hank Johnston, Sheldon Zhang, 2022-02-24 Although contemporary China is a repressive state protests and demonstrations have increased almost tenfold between 2005 and 2015 This is an astounding statistic when one considers that Marxist Leninist regimes of the past tolerated little or no public dissent How can protests become so common in an autocratic state What are the trends of repression and mobilization This collection helps to answer these compelling questions through in depth analyses of several Chinese protest movements and state responses The chapters examine the opportunities and constraints for protest mobilization and explains their importance for understanding contemporary Chinese society

Handling of Unyielding Complaints in China Xiaowei Gui, 2022-09-28 This book provides a framework of protest handling which redirects our attention away from the strength of protesters and towards the constraints of state power drawing on detailed case studies randomly collected in 7 provinces in China over the last decade It finds that the challenges of retaining legitimacy the propensity for responsiveness the contradictions of the petition system and the dynamics of elite alignments are key elements shaping the fate of nail like petitions A nail like person refers to the individual who looks like a stubborn nail on a plank of wood that cannot be easily hammered down His persistent protest thus

is theoretically puzzling since such individual based protest is assumed to be too weak to effectively challenge a powerful authoritarian regime. Although this phenomenon is widely observed in China, it is ignored by current studies on collective action. Meanwhile, this book delves into the life politics of nail-like persons and reveals that their escalation of grievance, marginalized social status, inability of pursuing desirable lives through legitimate means, and communication with fellow petitioners also reinforce their determination of contention. This book describes deeply the fate of individual based protests in China. It scrutinizes the state's role in shaping contention at its macro, intermediate, and micro levels, and meanwhile pays more attention to local specifics that are crucial to uncovering the logic of petitioners' actions and consciousness. This book has implications for scholars and graduates who are interested in contentious politics and state-society interactions in China.
