    Reproducing Kernels and their Applications S. Saitoh,Daniel Alpay,Joseph A. Ball,Takeo Ohsawa,2013-11-11 The First International Congress of the International Society for Analysis its Applications and Computations ISAAC 97 was held at the University of Delaware from 3 to 7 June 1997 As specified in the invitation of the President Professor Robert P Gilbert of the ISAAC we organized the session on Reproducing Kerneis and Their Applications In our session we presented 24 engaging talks on topics of current interest to the research community As suggested and organized by Professor Gilbert we hereby publish its Proceedings Rather than restricting the papers to Congress participants we asked the Ieading mathematicians in the field of the theory of reproducing kern eIs to submit papers However due to time restrietions and a compulsion to limit the Proceedings a reasonable size we were unable to obtain a comprehensive treatment of the theory of reproducing kernels Nevertheless we hope this Proceedings of the First International Conference on reproducing kerneis will become a significant reference volume Indeed we believe that the theory of reproducing kernels will stand out as a fundamental and beautiful contribution in mathematical sciences with a broad array of applications to other areas of mathematics and science We would like to thank Professor Robert Gilbert for his substantial contri bu tions to the Congress and to our Proceedings We also express our sincere thanks to the staff of the University of Delaware for their manifold cooperation in organizing the Congress   **Integral Transforms, Reproducing Kernels and Their Applications** Saburou Saitoh,2020-11-26 The general theories contained in the text will give rise to new ideas and methods for the natural inversion formulas for general linear mappings in the framework of Hilbert spaces containing the natural solutions for Fredholm integral equations of the first kind   **Theory of Reproducing Kernels and Applications** Saburou Saitoh,Yoshihiro Sawano,2016-10-14 This book provides a large extension of the general theory of reproducing kernels published by N Aronszajn in 1950 with many concrete applications In Chapter 1 many concrete reproducing kernels are first introduced with detailed information Chapter 2 presents a general and global theory of reproducing kernels with basic applications in a self contained way Many fundamental operations among reproducing kernel Hilbert spaces are dealt with Chapter 2 is the heart of this book Chapter 3 is devoted to the Tikhonov regularization using the theory of reproducing kernels with applications to numerical and practical solutions of bounded linear operator equations In Chapter 4 the numerical real inversion formulas of the Laplace transform are presented by applying the Tikhonov regularization where the reproducing kernels play a key role in the results Chapter 5 deals with ordinary differential equations Chapter 6 includes many concrete results for various fundamental partial differential equations In Chapter 7 typical integral equations are presented with discretization methods These chapters are applications of the general theories of Chapter 3 with the purpose of practical and numerical constructions of the solutions In Chapter 8 hot topics on reproducing kernels are presented namely norm inequalities convolution inequalities inversion of an arbitrary matrix representations of inverse mappings identifications of nonlinear systems sampling theory

statistical learning theory and membership problems Relationships among eigen functions initial value problems for linear partial differential equations and reproducing kernels are also presented Further new fundamental results on generalized reproducing kernels generalized delta functions generalized reproducing kernel Hilbert spaces andas well a general integral transform theory are introduced In three Appendices the deep theory of Akira Yamada discussing the equality problems in nonlinear norm inequalities Yamada s unified and generalized inequalities for Opial s inequalities and the concrete and explicit integral representation of the implicit functions are presented **Reproducing Kernel Spaces and Applications** Daniel Alpay,2012-12-06 20 Pattern recognition and statistical learning theory the theory of support vector machines See 40 58 In this last volume we refer in particular to the papers 63 and 64 Since this topic is maybe less known to the operator theory community we mention that the support vector method is a general approach to function estimation problems See 63 p 26 We note that the above list and the given references are by no way exhaustive We refer to the first section of the paper of S Saitoh in the present volume for another and mainly different list of topics where reproducing kernel spaces appear Quite often a given question is best understood in a reproducing kernel Hilbert space for instance when using Cauchy s formula in the Hardy space H 2 and one finds oneself as Mr Jourdain of Moliere Bourgeois Gentilhomme speaking Prose without knowing it 48 p 51 Par ma foil il y a plus de quarante ans que je dis de la prose sans que l j en susse rien **Theory of Reproducing Kernels and Its Applications** Saburou Saitoh,1988 **The Schur Algorithm, Reproducing Kernel Spaces and System Theory** Daniel Alpay,2001 Looks at matrix valued Schur functions and their applications from the unifying point of view of space with reproducing kernels to study the relationship between the modeling of time invariant dissipative linear systems and the theory of linear operators Chapters cover reproducing kernel spaces theory of linear systems the Schur algorithm and the inverse scattering problem operator models interpolation the indefinite case the non stationary case and Riemann surfaces Originally published in French by Societe Mathematique de France 1998 Translated from the French by Stephen S Wilson Author information is not given c Book News Inc **Selected Papers on Analysis and Differential Equations** American Mathematical Society,2010 This volume contains translations of papers that originally appeared in the Japanese journal Sugaku These papers range over a variety of topics in ordinary and partial differential equations and in analysis Many of them are survey papers presenting new results obtained in the last few years This volume is suitable for graduate students and research mathematicians interested in analysis and differential equations This volume contains translations of papers that originally appeared in the Japanese journal Sugaku These papers range over a variety of topics in ordinary and partial differential equations and in analysis Many of them are survey papers presenting new results obtained in the last few years This volume is suitable for graduate students and research mathematicians interested in analysis and differential equations *New Perspectives on Approximation and Sampling Theory* Ahmed I.
