Cultures of Relatedness Janet Carsten, 2000-03-09 Our understanding of what makes a person a relative has been transformed by radical changes in marriage arrangements and gender relations and by new reproductive technologies We can no longer take it for granted that our most fundamental social relationships are grounded in biology or nature These developments have prompted anthropologists to take a fresh look at idioms of relatedness in other societies and to review the ways in which relationships are symbolised and interpreted in our own society Defamiliarizing some classic cases challenging the established analytic categories of anthropology the contributors to this innovative book focus on the boundary between the biological and the social and bring into question the received wisdom at the heart of the study of kinship

Theorising and Representing Maternal Realities Julie Kelso, Marie Porter, 2009-05-05 Maternal research is a rapidly expanding multi disciplinary form of scholarship Prior to second wave feminism most motherhood literature was written from a male perspective This literature focused on telling mothers how to practice mothering without acknowledging the expertise of the mothers themselves Research on motherhood as it is experienced in all its facets by mothers has only emerged in recent decades This book is aimed at expanding academic knowledge of motherhood from a feminist perspective looking particularly at how maternal subjectivities can be represented and theorised When mothers themselves academic or not are responsible for theorisation and representation of maternal realities dominant theories and representations of motherhood are radically challenged In Theorising and Representing Maternal Realities the contributors argue that it is no longer acceptable to regard mothers as mere objects of knowledge and research They are primarily the subjects of knowledge and research

On Having an Own Child Karin Lesnik-Oberstein, 2018-04-24 How are ideas of genetics blood the family and relatedness created and consumed This is the first book ever to consider in depth why people want children and specifically why people want children produced by reproductive technologies such as IVF ICSI etc As the book demonstrates even books ostensibly devoted to the topic of why people want children and the reasons for using reproductive technologies tend to start with the assumption that this is either simply a biological drive to reproduce or a socially instilled desire This book uses psychoanalysis not to provide an answer in its own right but as an analytic tool to probe more deeply the problems of these assumptions The idea that reproductive technologies simply supply an own child is questioned in this volume in terms of asking how and why reproductive technologies are seen to create this ownness Given that it is the idea of an own child that underpins and justifies the whole use of reproductive technologies this book is a crucial and wholly original intervention in this complex and highly topical area

The New Arab Man Marcia C. Inhorn, 2012-03-25 Middle Eastern Muslim men have been widely vilified as terrorists religious zealots and brutal oppressors of women The *New Arab Man* challenges these stereotypes with the stories of ordinary Middle Eastern men as they struggle to overcome infertility and childlessness through assisted reproduction Drawing on two decades of ethnographic research across the Middle East with hundreds of men from a variety of social and religious backgrounds Marcia Inhorn shows how the new Arab man is self consciously rethinking the patriarchal masculinity of his forefathers and unseating received wisdoms This is especially true in childless Middle Eastern marriages where contrary to popular belief infertility is more common among men than women Inhorn captures the marital moral and material commitments of couples undergoing assisted reproduction revealing how new technologies are transforming their

lives and religious sensibilities And she looks at the changing manhood of husbands who undertake transnational egg quests set against the backdrop of war and economic uncertainty out of devotion to the infertile wives they love Trenchant and emotionally gripping The New Arab Man traces the emergence of new masculinities in the Middle East in the era of biotechnology

Reproductive Health and Maternal Sacrifice Pam Lowe, 2016-06-29 This book demonstrates that the symbol of maternal sacrifice is the notion that proper women put the welfare of children whether born in utero or not conceived over and above any choices and desires of their own The idea of maternal sacrifice acts as powerful signifier in judging women's behaviour that goes beyond necessary care for any children The book traces its presence in various aspects of reproductive health from contraception to breastfeeding Pam Lowe shows

how although nominally choices are presented to women around reproductive health maternal sacrifice is used to discipline women into conforming to specific norms reasserting traditional forms of womanhood This has significant implications for women s autonomy Women can resist or reject this disciplinary position when making reproductive decisions but in doing so they may be positioned as transgressing and or need to justify their decisions The book will be of great interest to scholars of sociology gender studies and health studies
