Reproduction Technology And Rights:

Reproduction, Technology, and Rights James M. Humber, Robert F. Almeder, 1996-01-01 In *Reproduction Technology and Rights* philosophers and ethicists debate the central moral issues and problems raised by today's revolution in reproductive technology. Leading issues discussed include the ethics of paternal obligations to children, the place of in vitro fertilization in the allocation of health care resources, and the ethical implications of such new technologies as blastomere separation and cloning. Also considered are how parents and society should respond to knowledge gained from prenatal testing and whether or not the right to abort should relieve men of the duty to support unwanted children. *Reproduction Technology and Rights* illuminates the moral and ethical choices that our society faces because of advances in reproductive technology and helps to make those decisions better informed.

Assisted Reproductive Technology Charles P. Kindregan, Maureen McBrien, 2006 As more people turn to assisted reproduction, the legal issues surrounding it have become increasingly complex. Beyond representing patients or clinics, numerous legal problems are arising from the technology's application. Disputes in divorce are the most common, but this technology impacts the law in other areas including personal injury, insurance, criminal law, and estate planning. Drawing from multiple legal sources, this book presents complex information in a direct, balanced, and fair manner. It includes a glossary, sample forms, and checklists, and a bibliography.

Human Reproductive Technologies and the Law Great Britain. Parliament. House of Commons. Science and Technology Committee, 2005 Approximately 1% of births in the UK were conceived using IVF. At present, IVF and embryo research are controlled by the Human Fertilisation and Embryology Authority, which was formed by a 1990 Act. Since then, scientific progress has been rapid, and the Department of Health has announced a review of that Act. This extensive inquiry will inform that review. It covers regulation of assisted reproduction, problems with the HFE Act, the operation of the Act, provision of infertility services, review of the Act, legislative and regulatory models. It makes recommendations on issues such as choosing the sex of babies, the need for a separate review of abortion, the regulatory bodies required, and a legislative framework that balances the freedom of the individual with the interests of the state so that any intervention has a sound ethical base.
