Reproductive Rights And Technology:

Reproductive Health and Assisted Reproductive Technologies In Sub-Saharan Africa Olanike S. Adelakun, Erebi Ndoni, 2023-08-28 This book focuses on reproductive health rights and assisted reproductive technologies ART in sub Saharan Africa Each chapter is connected to the other by focusing on different aspects of ART as a means of achieving conception Topics such as regulation of ART practices surrogacy and specific aspects of ART which are gradually becoming acceptable but largely unregulated in Africa promises to be of interest to scholars researchers and fertility practitioners Research in the book take a rights based approach and ethical analysis of ART practice in sub Saharan Africa by authors from diverse backgrounds bringing together law and society perspectives Readers stand to gain new knowledge on the societal legal medical and psychological requirements effects and challenges of reproductive health rights and ART in the African context The book is also relevant to UN Sustainable Development Goal 3 Good Health and Well being given that it promotes and advocates for access to reproductive healthcare for persons who have difficulty or are unable to conceive without medical assistance

The Cambridge Handbook of Information Technology, Life Sciences and Human Rights Marcello Ienca, Oreste Pollicino, Laura Liguori, Elisa Stefanini, Roberto Andorno, 2022-05-26 Debates on the human rights implications of new and emerging technologies have been hampered by the lack of a comprehensive theoretical framework for the complex issues involved This volume provides that framework bringing a multidisciplinary and international perspective to the evolution of human rights in the digital and biotechnological era It delves into the latest frontiers of technological innovation in the life sciences and information technology sectors such as neurotechnology robotics genetic engineering and artificial intelligence Leading experts from the technological medical and social sciences as well as law philosophy and business share their extensive knowledge about the transformation of the rights framework in response to technological innovation In addition to providing a comprehensive interdisciplinary and international state of the art descriptive analysis the volume also offers policy recommendations to protect and promote human rights in the context of emerging socio technological trends

Ethical Dilemmas in Assisted Reproductive Technologies Joseph G. Schenker, 2011-08-29 Assisted reproductive technologies ART include the artificial or partially artificial methods to achieve pregnancy These new technologies lead to substantial changes regarding of ethical and legal aspects in reproductive medicine The book focuses on current hot topics about ethical dilemmas in ART e g about the duties of ethical committees guidelines regarding informed consent ethical and legal aspects of sperm donation embryo donation ethics of embryonic stem cells therapeutical cloning patenting of human genes commercialization

Gender and Technology Caroline Sweetman, 1998 This collection of articles from Gender and Development considers technologies of many kinds including those intended to save womens labour to enable them to control their fertility and to learn and communicate using computer technology

Women and Reproductive Technologies Annette Burfoot, Derya Güngör, 2021-11-15 The Open Access version

of this book available at www.taylorfrancis.com has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

A sociological and historical study of the development of reproductive technologies this book focuses on key technological developments through a biomedicalization lens with special attention to gender Using in vitro fertilization IVF as a hub it critically examines the main areas of related socio technical developments reproductive science birth control animal husbandry genetics and reproductive medicine Employing a critical framework to illuminate dominant discourses the book also highlights examples of social resistance as well as contradictory responses to new reproductive technologies Over eight chapters the author examines the social history of reproduction and sexuality reproductive technologies from old to new and debates surrounding new reproductive technologies and genetic engineering

Women and Reproductive Technologies pays close attention to the interconnections between the business of reproduction and replication industries the sociality of reproduction including reproductive justice and what are considered the technologies themselves As such it constitutes essential reading for students and researchers in the fields of sociology health studies and gender studies interested in the current state of human reproduction

The Oxford Handbook of Law, Regulation and Technology Roger Brownsword, Eloise Scotford, Karen Yeung, 2017-07-25

The variety pace and power of technological innovations that have emerged in the 21st Century have been breathtaking These technological developments which include advances in networked information and communications biotechnology neurotechnology nanotechnology robotics and environmental engineering technology have raised a number of vital and complex questions Although these technologies have the potential to generate positive transformation and help address grand societal challenges the novelty associated with technological innovation has also been accompanied by anxieties about their risks and destabilizing effects Is there a potential harm to human health or the environment What are the ethical implications Do these innovations erode or antagonize values such as human dignity privacy democracy or other norms underpinning existing bodies of law and regulation These technological developments have therefore spawned a nascent but growing body of law and technology scholarship broadly concerned with exploring the legal social and ethical dimensions of technological innovation This handbook collates the many and varied strands of this scholarship focusing broadly across a range of new and emerging technology and a vast array of social and policy sectors through which leading scholars in the field interrogate the interfaces between law emerging technology and regulation Structured in five parts the handbook I establishes the collection of essays within existing scholarship concerned with law and technology as well as regulatory governance II explores the relationship between technology development by focusing on core concepts and values which technological developments implicate III studies the challenges for law in responding to the emergence of new technologies examining how legal norms doctrine and institutions have been shaped challenged and destabilized by technology and even how technologies have been shaped by legal regimes IV provides a critical exploration of the implications of technological innovation examining the ways in which

technological innovation has generated challenges for regulators in the governance of technological development and the implications of employing new technologies as an instrument of regulatory governance V explores various interfaces between law regulatory governance and new technologies across a range of key social domains *Proceedings of the International Conference On Law, Economics, and Health (ICLEH 2022)* Anggraeni Endah Kusumaningrum,Widyorini Indriasti Wardani,Edi Pranoto,Rohmad Pujiyanto,2023-04-16 This is an open access book ICLEH will bring the theme of Recover Together Stronger Together Through the Development of Law Economy and Health as our commitment to continuously sharing and disseminating the development of knowledge in the field of Social Science and Law Through this conference therefore we do encourage international collaboration idea sharing and networking among experts and participants in the respected field of law economy and health discipliners *Human Embryos and Preimplantation Genetic Technologies* E. Scott Sills,Gianpiero D. Palermo,2019-05-01 Human Embryos and Preimplantation Genetic Technologies Ethical Social and Public Policy Aspects presents the first holistic analysis of PGD and PGS as it is practiced and regulated worldwide In addition to scientific and technical aspects the book provides perspectives on the ethical legal religious policy and social implications of global assisted reproduction technologies including in Africa Asia Europe North and South America and Australia Chapters cover history ethics feminism family dynamics psychological and interpersonal factors the current state of PGD and PGS in 20 different sovereign nations and religious communities and provide an analysis of public policy concerns and future directions Provides an in depth discussion of PGD and PGS as practiced and regulated worldwide Offers an accessible resource for researchers medical professionals patients regulators and policymakers seeking expert opinions on PGS and PGD Contains chapters contributed by international clinicians researchers and thought leaders in the field of assisted reproductive technology *Contraceptive Technology* Robert Anthony Hatcher,2007 The leading reference in reproductive health for 30 years with over 2 000 000 copies in print Contraceptive Technology is included on CD ROM with all copies of the book and also available separately as listed below This is a direct electronic conversion complete and unabridged in a PDF format Includes word searching capabilities of the full Contraceptive Technology text Patient instructions or other content for individual counseling or use may also be printed out Active links are provided to the 300 websites recommended by the authors throughout Contraceptive Technology Please see the pages in the back of this book with instructions on how to activate and use the CD ROM Book jacket *The Disability Studies Reader* Lennard J. Davis,2006 The second edition of The Disability Studies Reader builds and improves upon the classic first edition which has sold well over 6000 copies since 1999 As a field disability studies burst onto the scene across the social sciences and humanities in the 1990s and the first edition of the reader gathered the best work that had been written on the subject including essays by famous authors such as Susan Sontag and Erving Goffman The new edition is more global in its coverage and adds material on genetic testing the human genome queer studies and issues in developing countries The size of the

audience has grown since the first edition's publication and the second edition's new material will make it even more useful for courses on the subject. Courses on the subject have mushroomed in the past ten years and can now be found across the social sciences, humanities, and behavioral sciences.

Women's Health Movements M. Turshen, 2007-09-17 This is an introduction to the women's health movements and what is being accomplished by women organizing to achieve better health care around the world.

Routledge Handbook of Global Health Rights Clayton Ó Néill, Charles Foster, Jonathan Herring, John Tingle, 2021-05-30 This book examines the idea of a fundamental entitlement to health and healthcare from a human rights perspective. The volume is based on a particular conceptual reasoning that balances critical thinking and pragmatism in the context of a universal right to health. Thus the primary focus of the book is the relationship or contrast between rights-based discourse, jurisprudential arguments, and real-life healthcare contexts. The work sets out the constraints that are imposed on a universal right to health by practical realities such as economic hardship, in countries' lack of appropriate governance, and lack of support for the implementation of this right through appropriate resource allocation. It queries the degree to which the existence of this legally enshrined right and its application in instruments such as the International Covenant on Economic, Social, and Cultural Rights (ICESCR) and the Universal Declaration of Human Rights (UDHR) can be more than an ephemeral aspiration but can actually sustain, promote, and instill good practice. It further asks if social reality and the inequalities that present themselves therein impede the implementation of laudable human rights, particularly within marginalised communities and cadres of people. It deliberates on what states and global bodies do or could do in practical terms to ensure that such rights are moved beyond the aspirational and become attainable and implementable. Divided into three parts, the first analyses the notion of a universal, inalienable right to health care from jurisprudential, anthropological, legal, and ethical perspectives. The second part considers the translation of international human rights norms into specific jurisdictional healthcare contexts. With a global perspective, it includes countries with very different legal, economic, and social contexts. Finally, the third part summarises the lessons learnt and provides a pathway for future action. The book will be an invaluable resource for students, academics, and policymakers working in the areas of health law and policy, and international human rights law.
