Gender, Identity & Reproduction S. Earle, G.

Letherby,2003-10-31 *Gender Identity and Reproduction* draws on a variety of perspectives relevant to an understanding of reproduction across the life course Through a consideration of the representation of reproductive identities and experiences the book highlights difference and diversity in relation to contemporary reproductive choices The book focuses on women s and men s experiences of agency control and negotiation within the context of cultural medical political theoretical and lay ideologies of the reproductive process in contemporary Western societies *Genetic Governance* Robin Bunton,Alan Petersen,2005-03-18 Ethical and practical issues around genetic research are of major international concern both in academia and in the public domain Questions concerning what interventions are possible and appropriate with the increasing amount of genetic information available challenge our understandings of ourselves our health and wellbeing and the role of medical ethics public health surveillance and risk However there has been little reflection on the socio political effects of this new genetic knowledge and the changes in practice that are currently impacting on our lives Containing contributions from key international researchers this book examines the broader issues of genetic debates and looks at how prediction and risk assessment is being changed in the arenas of health medicine and reproduction bringing new insight on the dangers of surveillance regulation and increased inequality Developed out of the Taylor and Francis journal *Critical Public Health* the book considers the implications of developments in genetics for contemporary liberal governance as well as for the future of healthcare and public health **Labor of Love** Heather Jacobson,2016-03-15 While the practice of surrogacy has existed for millennia new fertility technologies have allowed women to act as gestational surrogates carrying children that are not genetically their own While some women volunteer to act as gestational surrogates for friends or family members others get paid for performing this service The first ethnographic study of gestational surrogacy in the United States *Labor of Love* examines the conflicted attitudes that emerge when the ostensibly priceless act of bringing a child into the world becomes a paid occupation Heather Jacobson interviews not only surrogate mothers but also their family members the intended parents who employ surrogates and the various professionals who work to facilitate the process Seeking to understand how gestational surrogates perceive their vocation she discovers that many regard surrogacy as a calling but are reluctant to describe it as a job In the process Jacobson dissects the complex set of social attitudes underlying this resistance toward conceiving of pregnancy as a form of employment Through her extensive field research Jacobson gives readers a firsthand look at the many challenges faced by gestational surrogates who deal with complicated medical procedures delicate work family balances and tricky social dynamics Yet *Labor of Love* also demonstrates the extent to which advances in reproductive technology are affecting all Americans changing how we think about maternity family and the labor involved in giving birth For more visit <http://www.heatherjacobsononline.com> **Born and Made** Sarah Franklin,Celia Roberts,2006-10-30 Are new reproductive and genetic technologies racing ahead of a society that is unable to establish limits to their use Have the new genetics outpaced our ability to control their future applications This book examines the case of preimplantation genetic

diagnosis PGD the procedure used to prevent serious genetic disease by embryo selection and the so called designer baby method Using detailed empirical evidence the authors show that far from being a runaway technology the regulation of PGD over the past fifteen years provides an example of precaution and restraint as well as continual adaptation to changing social circumstances Through interviews media and policy analysis and participant observation at two PGD centers in the United Kingdom *Born and Made* provides an in depth sociological examination of the competing moral obligations that define the experience of PGD Among the many novel findings of this pathbreaking ethnography of reproductive biomedicine is the prominence of uncertainty and ambivalence among PGD patients and professionals a finding characteristic of the emerging biosociety in which scientific progress is inherently paradoxical and contradictory In contrast to much of the speculative futurology that defines this field *Born and Made* provides a timely and revealing case study of the on the ground decision making that shapes technological assistance to human heredity      **Gender Panic, Gender Policy** Vasilikie (Vicky) Demos, Marcia Texler Segal, 2017-10-30 Using diverse theories and methods including analysis of on line data feminist critical discourse fieldwork grounded theory and queer theory this volume explores gender panic and policy in the United States and beyond      The Sociology of Medical Screening Natalie Armstrong, Helen Eborall, 2012-06-12 The Sociology of Medical Screening Critical Perspectives New Directions presents a series of readings that provide an up to date overview of the diverse sociological issues relating to population based medical screening Features new research data in most of the contributions Includes contributions from eminent sociologists such as David Armstrong Stefan Timmermans and Alison Pilnick Represents one of the only collections to specifically address the sociology of medical screening      **Assisting Reproduction, Testing Genes** Daphna Birenbaum-Carmeli, Marcia C. Inhorn, 2009 Following the routinization of assisted reproduction in the industrialized world technologies such as in vitro fertilization preimplantation genetic diagnosis and DNA based paternity testing have traveled globally and are now being offered to couples in numerous non Western countries This volume explores the application and impact of these advanced reproductive and genetic technologies in societies across the globe By highlighting both the cross cultural similarities and diverse meanings that technologies may assume as they enter multiple contexts the book aims to foster understanding of both the technologies and the settings Enhanced by cross cultural perspectives the book addresses the challenges that globalization presents to local understandings of science technology and medicine      **The Palgrave Handbook of Gender and Healthcare** Ellen Kuhlmann, Ellen Annandale, 2012-06-26 This authoritative state of the art reference collection addresses the main issues and core debates related to gender and healthcare in one accessible volume This essential guide to an area of increasing interest provides a critical overview of debates as well as practical guidance on how to bring gender perspectives to the heart of international health policy practice and research      Against Hybridity Haim Hazan, 2015-04-14 One of the major characteristics of our contemporary culture is a positive almost banal view of the transgression and disruption of cultural boundaries Strangers migrants and nomads

are celebrated in our postmodern world of hybrids and cyborgs. But we pay a price for this celebration of hybridity: the non-hybrid figures in our societies are ignored, rejected, silenced, or exterminated. This book tells the story of these non-hybrid figures, the anti-heroes of our pop culture. The main example of non-hybrids in an otherwise hybridized world is that of deep old age. Hazan shows how we fervently distance ourselves from old age by grading and sequencing it into stages such as the third age, the fourth age, and so on. Aging bodies are manipulated through anti-aging techniques until it is no longer possible to do it anymore, at which point they become untransformable and non-marketable objects and hence commercially and socially invisible or masked. Other examples are used to elucidate the same cultural logic of the non-hybrid pain: the Holocaust, autism, fundamentalism, and corporeal death. On the face of it, these examples may seem to have nothing in common, but they all exemplify the same cultural logic of the non-hybrid and provoke similar reactions of criticism, terror, abhorrence, and moral indignation. This highly original and iconoclastic book offers a fresh critique of contemporary Western culture by focusing on that which is perceived as its other: the non-hybrid in our midst, often rejected, ignored, or silenced, and deemed to be in need of globally manageable correction.

*Autoethnography as Feminist Method* Elizabeth Etorre, 2016-11-25 Autoethnography is an ideal method to study the feminist I. Through personal stories, the author reflects on how feminists negotiate agency and the effect this has on one's political sensibilities. Speaking about oneself transforms into stories of political responsibility, a key issue for feminists who function as cultural mediators.

**Culture, Bodies and the Sociology of Health** Elizabeth Etorre, 2016-05-13 Culture Bodies and the Sociology of Health explores the boundaries between bodies and society with special reference to uncovering the cultural components of health and the ways in which bodies are categorized according to a form of culturally embedded health orthodoxy. Illustrating the importance of contextualizing the body as a cultural entity, this book demonstrates that the spaces and boundaries between healthy bodies are becoming more diverse than ever before. The volume's international team of scholars engage with a range of issues surrounding the cultural construction of the body as a site of health and illness. As such, it will be of interest not only to sociologists, especially sociologists of health, but also to scholars of media and communication studies as well as cultural theorists.

*Reproduction, Health, and Medicine* Elizabeth Mitchell Armstrong, Susan Markens, Miranda R. Waggoner, 2019-11-22 At a moment when reproduction is increasingly politicized, the volume explores the breadth of contemporary research on reproduction from the perspective of medical sociology, illuminating the lived experience of reproduction and offering insights to inform sociology and health policy.

*Corporeality* Cassandra A. Ogden, 2013-03-01 Regardless of how a person spends her or his day in a classroom, in work, or outside employment, whatever our thoughts, beliefs, and experiences of life, all living is embodied. We are of and within our bodies. During the last thirty years, social scientists have increasingly turned their attention to the body as a site of both theoretical engagement and empirical exploration. Recently, public discourse has also become preoccupied with embodied debates: the obesity crisis and the London 2012 Paralympics have located the body firmly in the realm of public interest. The

new essays collected in *Corporeality The Body and Society* demonstrate some of the unique advantages attainable through studying the body sociologically Focusing in on a series of embodied fields related to lifestyle media war disability drugs and mental health the book re states the fundamental importance of a body centred approach in the social sciences Work by established experts in the field sits side by side with new voices to provide an accessible and stimulating snap shot of the role of the body in society in the early twenty first century *Critical Interventions in the Ethics of Healthcare* Dave

Holmes,2016-04-22 *Critical Interventions in the Ethics of Healthcare* argues that traditional modes of bioethics are proving incommensurable with burgeoning biotechnologies and consequently emerging subjectivities Drawn from diverse disciplines this volume works toward a new mode of discourse in bioethics offering a critique of the current norms and constraints under which Western healthcare operates The contributions imagine new less paternalistic terms by which bioethics might proceed terms that do not resort to exclusively Western models of liberal humanism or to the logic of neoliberal economies It is argued that in this way we can begin to develop an ethical vocabulary that does justice to the challenges of our age Bringing together theorists practitioners and clinicians to present a wide variety of related disciplinary concerns and perspectives on bioethics this volume challenges the underlying assumptions that continue to hold sway in the ethics of medicine and health sciences

**The Sociology of Healthcare** Sarah Earle,Gayle Letherby,2008-03-28 A comprehensive collection of classic and contemporary readings in the sociology of health The Sociology of Healthcare will stimulate debate reflexive practice and critical thinking in applied sociology and is aimed at the teaching and learning needs of both lecturers and students

**Before Birth** Elizabeth Ettorre,2017-10-23 This title was first published in 2001 Featuring contributions from the UK Finland The Netherlands and Greece this unique book explores the ongoing tensions and important ethical legal and social issues related to the development of prenatal screening and the growth of new genetic technologies Degrees of Mixture, Degrees of Freedom Peter Wade,2017-05-04 Race mixture or mestizaje has played a critical role in the history culture and politics of Latin America In *Degrees of Mixture Degrees of Freedom* Peter Wade draws on a multidisciplinary research study in Mexico Brazil and Colombia He shows how Latin American elites and outside observers have emphasized mixture s democratizing potential depicting it as a useful resource for addressing problems of racism claiming that race mixture undoes racial difference and hierarchy while Latin American scientists participate in this narrative with claims that genetic studies of mestizos can help isolate genetic contributors to diabetes and obesity and improve health for all Wade argues that in the process genomics produces biologized versions of racialized difference within the nation and the region but a comparative approach nuances the simple idea that highly racialized societies give rise to highly racialized genomics Wade examines the tensions between mixture and purity and between equality and hierarchy in liberal political orders exploring how ideas and scientific data about genetic mixture are produced and circulate through complex networks
