events such as the International Year of Artisanal Fisheries and Aquaculture IYAFA 2022 are being integrated and supported through Blue Transformation a priority area of FAO's new Strategic Framework 2022-2031 designed to accelerate achievement of the 2030 Agenda for Sustainable Development in food and agriculture. The concept of Blue Transformation emerged from the Thirty-fourth Session of the FAO Committee on Fisheries in February 2021 and in particular the Declaration for Sustainable Fisheries and Aquaculture which was negotiated and endorsed by all FAO Members. The Declaration calls for support for an evolving and positive vision for fisheries and aquaculture in the twenty-first century where the sector is fully recognized for its contribution to fighting poverty, hunger and malnutrition. In this context, Part 1 of this edition of *The State of World Fisheries and Aquaculture* reviews the world status of fisheries and aquaculture while Parts 2 and 3 are devoted to Blue Transformation and its pillars on intensifying and expanding aquaculture, improving fisheries management and innovating fisheries and aquaculture value chains. Blue Transformation emphasizes the need for forward-looking and bold actions to be launched or accelerated in coming years to achieve the objectives of the Declaration and in support of the 2030 Agenda. Part 4 covers current and high-impact emerging issues: COVID-19, climate change and gender equality that require thorough consideration for transformative steps and preparedness to secure sustainable, efficient and equitable fisheries and aquaculture and finally draws some outlook on future trends based on projections. *The State of World Fisheries and Aquaculture* aims to provide objective, reliable and up-to-date information to a wide audience: policymakers, managers, scientists, stakeholders and indeed everyone interested in the fisheries and aquaculture sector.
