## **Reptilian Incubation:**

**Nests, Eggs, and Incubation** Denis Charles Deeming, Silas James Reynolds, 2015 Nests Eggs and Incubation brings together a global team of leading authorities to provide a comprehensive overview of the fascinating and diverse field of avian reproduction Starting with a new assessment of the evolution of avian reproductive biology in light of recent research the book goes on to cover four broad areas the nest the egg incubation and the study of avian reproduction New research on nest structures egg traits and life history is incorporated whilst contemporary methodologies such as self contained temperature probes and citizen science are also discussed Applied chapters describe how biological knowledge can be applied to challenges such as urbanisation and climate change The book concludes by suggesting priorities for future research This book builds upon the foundations laid down by Charles Deeming's 2002 work Avian Incubation available for readers of this book to access online for free much of which remains relevant today Read in conjunction with this previous volume it provides an up to date and thorough review of egg biology nest function and incubation behaviour which will be an essential resource for students of avian biology as well as both professional and amateur ornithologists working in the field of avian reproduction

**Ecophysiological Analysis of Vulnerability to Climate Warming in Ectotherms** Lin Zhang, Buddhi Dayananda, Bao-jun Sun, Jigang Xia, 2023-07-25 Temperature plays a critical role in animal survival and climate warming is one of the greatest threats to global biodiversity in the future It is already affecting species and communities with severe impacts and it is predicted that climate warming will cause species extinctions and distributional shifts in the coming decades The impact of climate warming is expected to be particularly severe on ectothermic animals including fishes amphibians and reptiles Thus assessing species responses to ongoing climate warming and determining what conservation actions should be taken are among the most significant and controversial challenges for ecologists Identifying the most vulnerable species to extinction as a result of climate warming is an appropriate first step in mitigating the impacts of a changing world An organism's vulnerability to climate warming depends on its sensitivity to environmental changes its exposure to the change and its ability to recover from and potential to adapt to change The interaction of these factors makes predicting the effects of climate warming on species a complex and major challenge for ecologists Developing a deeper knowledge of ectotherms' vulnerability to climate warming is crucial to enhance our understanding of extinction processes and significantly contribute to conservation efforts by guiding the implementation of better policies and management strategies to prevent the extinction of remaining populations Investigations of climate warming vulnerability are likely to benefit from measurements of environmental conditions taken at the scale at which organisms experience them Therefore the main objective of this interdisciplinary Research Topic is to bring together research on how ectotherms respond to climate warming at various levels We will particularly focus on the life history energy strategy physiological response etc We encourage inter and multidisciplinary research approaches linking molecular biology thermal physiology and ecology

**The Most Perfect Thing** Tim Birkhead,2016-04-12 A bird's egg is a nearly perfect survival capsule an external womb and one of natural selection's most wonderful creations Shortlisted for the Royal Society Insight Investment Science Book Prize 2016 One of Forbes Best Books About Birds and Birding in 2016 Renowned ornithologist Tim Birkhead opens this gripping story as a female guillemot chick hatches already carrying her full quota of tiny eggs within her undeveloped ovary As she grows into adulthood only a few of her eggs mature are released into the oviduct and are fertilized by sperm stored from copulation that took place days or weeks earlier Within a matter of hours the fragile yolk is surrounded by albumen and the whole is gradually encased within a turquoise jewel of a shell Soon the fully formed egg is expelled onto a rocky ledge where it will be incubated for four weeks before a chick emerges and the life cycle begins again THE MOST PERFECT THING is about how eggs in general are made fertilized developed and hatched Birkhead uses birds eggs as wondrous portals into natural history enlivened by the stories of naturalists and scientists including Birkhead and his students whose discoveries have advanced current scientific knowledge of reproduction     Genomic and Epigenomic Biomarkers of Toxicology and Disease Saura C. **TEXTBOOK OF ANIMAL BEHAVIOUR, THIRD EDITION** MANDAL, FATIK BARAN,2015-09-18 This well accepted book now in its Third Edition is an extension of the previous edition The text has further enriched with more information to understand animal behaviour coherently and scientifically The book attempts to provide a reasonably suitable account of animal behaviour for undergraduate as well as postgraduate students Although behaviour of animals has fascinated people for a long behavioural biology has been incorporated in the syllabi very recently The study of behaviour received its important boost from the work of Charles Darwin who used the term instinct to refer to the natural behaviour of animals In the 1930s a comprehensive theory of animal behaviour emerged through the work of Konrad Lorenz and later of Niko Tinbergen Biological study of behaviour in fact came of age as a science when Lorenz Tinbergen and Karl von Frisch received the Nobel Prize for their contribution to science Observing and describing exactly what animals do is fascinating and scientific analysis of their behaviour is significant for several reasons Each species tends to have an array of stereotyped behaviours some of which are shared with related species but others are unique Ecology natural selection macroevolution microevolution and gene constitute the foundation of animal behaviour Various animal groups exhibit diverse strategies for their survival and

reproduction which are discussed in this book The book is primarily intended for the students of B Sc M Sc Zoology Life Science for their courses It would be useful for the researchers in the field of animal behaviour and conservation biologists It would also attract students who are pursuing courses in Sociology and Anthropology Key features Presents a well balanced view of ethology Discusses the current development in the field Includes a glossary of important terms Offers chapter end questions to check the students understanding of the concept     *The Evolution of Parental Care* Nick J. Royle,Per T.

Smiseth,Mathias Kölliker,2012-08-09 Parental care includes a wide variety of traits that enhance offspring development and survival This novel book provides a fresh perspective on the current state of the study of the evolution of parental care written by some of the top researchers in the field and taking a broad taxonomic approach

## **Cognitive Ecology II** Reuven Dukas,John M. Ratcliffe,2009-11-15

Merging evolutionary ecology and cognitive science cognitive ecology investigates how animal interactions with natural habitats shape cognitive systems and how constraints on nervous systems limit or bias animal behavior Research in cognitive ecology has expanded rapidly in the past decade and this second volume builds on the foundations laid out in the first published in 1998 Cognitive Ecology II integrates numerous scientific disciplines to analyze the ecology and evolution of animal cognition The contributors cover the mechanisms ecology and evolution of learning and memory including detailed analyses of bee neurobiology bird song and spatial learning They also explore decision making with mechanistic analyses of reproductive behavior in voles escape hatching by frog embryos and predation in the auditory domain of bats and eared insects Finally they consider social cognition focusing on alarm calls and the factors determining social learning strategies of corvids fish and mammals With cognitive ecology ascending to its rightful place in behavioral and evolutionary research this volume captures the promise that has been realized in the past decade and looks forward to new research prospects

[South American Sauropodomorph Dinosaurs](#) Alejandro Otero,José L. Carballido,Diego Pol,2022-04-25 Sauropodomorpha Huene 1932 is one of the most successful groups of dinosaurs including the most abundant and diverse herbivorous forms with a worldwide record extending from the late Triassic to the late Cretaceous Sauropodomorphs comprise a diverse assemblage of early forms traditionally called prosauropods and the well established clade Sauropoda Marsh 1878 Early sauropodomorphs were small to medium sized forms with long necks and reduced skulls mostly bipeds and omnivores and were abundant in continental environments in the Late Triassic and Early Jurassic With more than 150 valid species and a worldwide distribution Sauropoda includes the dominant herbivorous dinosaurs from the Middle Jurassic to the Late Cretaceous Its unique body plan characterized by gigantic size graviportal locomotion long necks and tails and reduced skulls made this group an undisputed icon in popular culture since the 19th century In South America the sauropodomorph record is particularly rich and abundant and many species have shed light to understand important

milestones in the evolutionary history of this group of dinosaurs The origin of Sauropodomorpha the transition to Sauropoda and the diversification of its most successful evolutionary lineages are largely exemplified by the South American fossil record In this contribution we synthetize the diversity of sauropodomorphs from South America including data on their geographic and stratigraphic provenance phylogenetics paleobiology taphonomy and behaviour underscoring their significance within the context of sauropodomorph evolution

### **Exploring Studbooks for Wildlife Management and Conservation**

F.P.G. Princée,2016-12-20 Many endangered species of wild animals are managed in captivity through studbooks In this book these data rich resources are mined in innovative integrated and statistically tested ways to maximise information gain for conservation practice whether for captive or released reintroduced or managed wild populations This book is thus an important tool for all species managers and for students and researchers in small population biology and wildlife conservation The book's studbook analyses are grouped in three interrelated sections natural history demography and genetics Statistical tests to determine the significance of results or to compare results between subgroups are undertaken throughout Real studbooks of a variety of species e.g. cranes wolverines blesbok illustrate the practical applications and interpretations of the analyses and statistics The natural history section presents analyses to determine baseline species information such as litter size inter birth interval longevity and seasonality Demography covers census style analyses age class based life tables comparative survival analyses and population projections Solutions for dealing with small sample sizes are included Inbreeding depression and unconscious selection form the main focus of the genetics section Survival and life table analyses are used to assess inbreeding effects Quantitative genetics methods are applied to natural history traits as a tool to monitor genetic variation A fourth section on conservation shows how data from captive populations can be used where natural history data from wild populations are missing A real example uses studbook data to inform Population Viability Analysis The final section deals with issues related to incomplete and missing data and statistical topics The purpose written open source software programs Population Management Library PML and studbookR used for analyses in the book are available at [www.princee.com](http://www.princee.com)
