Theories of Art Today Noël Carroll, 2000 What is art The contributors to Theories of Art Today address the assertion that the term art no longer holds meaning They explore a variety of issues including aesthetic and institutional theories of art feminist perspectives on the philosophy of art the question of whether art is a cluster concept and the relevance of tribal art to philosophical aesthetics Contributors to this book include such distinguished philosophers and historians as Arthur Danto Joseph Margolis and George Dickie

From Text to Literature S. Olsen, A. Pettersson, 2005-09-14 The articles in this collection focus attention on the concept of literature and on the relationship between this concept and the concepts of a literary work and a literary text Adopting an analytic approach the articles attempt to clarify how these concepts govern our thinking about the phenomenon of literature in various ways exploring the issues which arise when these concepts are employed as theoretical instruments for describing and analyzing the phenomenon of literature

The Art Instinct Denis Dutton, 2009 The Dinka have a connoisseur s appreciation of the patterns and colours of the markings on their cattle The Japanese tea ceremony is regarded as a performance art Some cultures produce carving but no drawing others specialize in poetry Yet despite the rich variety of artistic expression to be found across many cultures we all share a deep sense of aesthetic pleasure The need to create art of some form is found in every human society In The Art Instinct Denis Dutton explores the idea that this need has an evolutionary basis how the feelings that we all share when we see a wonderful landscape or a beautiful sunset evolved as a useful adaptation in our hunter gather ancestors and have been passed on to us today manifest in our artistic natures Why do people indulge in displaying their artistic skills How can we understand artistic genius Why do we value art and what is it for These questions have long been asked by scholars in the humanities and in literature but this is the first book to consider the biological basis of this deep human need This sparking and intelligent book looks at these deep and fundamental questions and combines the science of evolutionary psychology with aesthetics to shed new light on longstanding questions about the nature of art

Art and Knowledge James O. Young, 2003-09-02 Almost all of us would agree that the experience of art is deeply rewarding Why this is the case remains a puzzle nor does it explain why many of us find works of art much more important than other sources of pleasure Art and Knowledge argues that the experience of art is so rewarding because it can be an important source of knowledge about ourselves and our relation to

each other and to the world The view that art is a source of knowledge can be traced as far back as Aristotle and Horace Artists as various as Tasso Sidney Henry James and Mendelssohn have believed that art contributes to knowledge As attractive as this view may be it has never been satisfactorily defended either by artists or philosophers Art and Knowledge reflects on the essence of art and argues that it ought to provide insight as well as pleasure It argues that all the arts including music are importantly representational This kind of representation is fundamentally different from that found in the sciences but it can provide insights as important and profound as available from the sciences Once we recognise that works of art can contribute to knowledge we can avoid thorough relativism about aesthetic value and we can be in a position to evaluate the avant garde art of the past 100 years Art and Knowledge is an exceptionally clear and interesting as well as controversial exploration of what art is and why it is valuable It will be of interest to all philosophers of art artists and art critics

Art in Three Dimensions Noël Carroll, 2010-07-15 This is a collection of essays by one of the most eminent figures in philosophy of art Carroll argues that philosophers of art need to refocus their attention on the ways in which art enters the life of culture and the lives of individual audience members

Images of Excellence Christopher Janaway, 1995-05-25 Plato was the first great figure in Western philosophy to assess the value of the arts he famously argued in the Republic that traditionally accepted forms of poetry drama and music are unsound claiming they are conducive to warped ethical standards detrimental to the psyche and purveyors of illusions about important matters in human life This view has been widely rejected but Christopher Janaway here argues that Plato's hostile case is a more coherent and profound challenge to the arts than has sometimes been supposed Denying that Plato advocates good art in any modern sense Dr Janaway seeks both to understand Plato's critique in the context of his own philosophy and to locate him in today's philosophy of art showing how issues in aesthetics arise from responses to his charges Plato's questions about beauty emotion representation ethical knowledge artistic autonomy and censorship are of contemporary relevance as formerly secure assumptions about the value of art and the aesthetic come under scrutiny Images of Excellence gives a new and original view of a famous issue in the history of philosophy it is written not only for readers working in ancient philosophy but for all who are interested in aesthetics art theory and literary theory

Artworks Robert Stecker,1996-12-09 What is art What is it to understand a work of art What is the value of art Robert Stecker seeks to answer these central questions of aesthetics by placing them within the context of an ongoing debate criticizing but also explaining what can be learned from alternative views His unified philosophy of art defined in terms of its evolving functions is used to explain and to justify current interpretive practices and to motivate an investigation of artistic value Stecker defines art roughly as an item that is an artwork at time t if and only if it is in one of the central art forms at t and is intended to fulfill a function art has at t or it is an artifact that achieves excellence in fulfilling such a function Further he sees the standard of acceptability for interpretations of artworks to be relative to their aim Finally he tries to understand the value of artworks through an analysis of literature and the identification of the most important functions of literary works In addition to offering original answers to major questions of aesthetics Artworks covers most of the major issues in contemporary analytic aesthetics and discusses many major as well as many minor figures who have written about these issues including Stanley Fish Joseph Margolis Richard Rorty and Richard Shusterman

Righteous Republic Ananya Vajpeyi, 2012-10-31. What India's founders derived from Western political traditions is widely understood. Less well known is how India's own rich knowledge traditions of 2,500 years influenced these men. Ananya Vajpeyi furnishes this missing account, showing how five founders turned to classical texts to fashion an original sense of Indian selfhood.

Composing the Canon in the German Democratic Republic Elaine Kelly, 2014-09-01. When the German Democratic Republic (GDR) was founded in 1949, its leaders did not position it as a new state. Instead, they represented East German socialism as the culmination of all that was positive in Germany's past. The GDR was heralded as the second German Enlightenment, a society in which the rational ideals of progress, Bildung, and revolution that had first come to fruition with Goethe and Beethoven would finally achieve their apotheosis. Central to this founding myth was the Germanic musical heritage. Just as the canon had defined the idea of the German nation in the nineteenth century, so in the GDR it contributed to the act of imagining the collective socialist state. *Composing the Canon in the German Democratic Republic* uses the reception of the Germanic musical heritage to chart the changing landscape of musical culture in the German Democratic Republic. Author Elaine Kelly demonstrates the nuances of musical thought in the state, revealing a model of societal ascent and decline that has implications that reach far beyond studies of the GDR itself. The first book-length study in English devoted to music in the GDR, *Composing the Canon in the German Democratic Republic* is a seminal text for scholars of music in the Cold War and in Germany more widely.

Popular Chinese Literature and Performing Arts in the People's Republic of China, 1949-1979 Bonnie S. McDougall, 2024-06-21. The essays in this volume constitute an exceptionally broad and inclusive account of Chinese literature and performing arts since 1949. Extending beyond fiction to poetry and drama, and covering song, opera, and film, as well, these essays reveal a more lively and varied cultural life than that disclosed by studies confined to fiction and literary politics. Rather than stopping at the assumption that art reflects Party or government policy, the essays uncover the traditional roots of popular literature and performing art by employing literary and artistic methods of analysis. While often lacking in appeal to Western audiences, these popular arts nonetheless have their own artistic validity and convey complex meanings to broadly based Chinese audiences. The materials and analyses presented here have social as well as cultural relevance. Variety and change rather

than monolithic uniformity have characterized post 1949 cultural bureaucracies writers performers and audiences This title is part of UC Press s Voices Revived program which commemorates University of California Press s mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1984

Encyclopedia of Rhetoric and Composition Theresa Enos,2013-10-08 First Published in 1996 Routledge is an imprint of Taylor Francis an informa company

End-of-Art Philosophy in Hegel, Nietzsche and Danto Stephen Snyder,2018-11-04 This book examines the little understood end of art theses of Hegel Nietzsche and Danto The end of art claim is often associated with the end of a certain standard of taste or skill However at a deeper level it relates to a transformation in how we philosophically understand our relation to the world Hegel Nietzsche and Danto each strive philosophically to overcome Cartesian dualism redrawing the traditional lines between mind and matter Hegel sees the overcoming of the material in the ideal Nietzsche levels the two worlds into one and Danto divides the world into representing and non representing material These attempts to overcome dualism necessitate notions of the self that differ significantly from traditional accounts the redrawn boundaries show that art and philosophy grasp essential but different aspects of human existence Neither perspective however fully grasps the duality The appearance of art s end occurs when one aspect is given priority for Hegel and Danto it is the essentialist lens of philosophy and in Nietzsche s case the transformative power of artistic creativity Thus the book makes the case that the end of art claim is avoided if a theory of art links the internal practice of artistic creation to all of art s historical forms

Poetic Inquiry and Arts-Based Research for the Maintenance of the Republic and What Comes After Angelo J. Letizia,2023-12-19 This book demonstrates the power of poetry and the ways in which academics can utilize poetry to go beyond the scholarly realm and create works of art which unlike traditional academic works problematize and question reality rather than simply describe it Through its disciplinary scholarly and personal construction poetry holds the potential to erase what we know and build a new world The purpose of this book is to show how professors and students who write poetry can be emboldened to imagine new forms of government and political arrangements promote social change and challenges to power structures and detail radical ways of living with each other more generally Conceiving of the republic as a democratic republic or representative democracy the author calls attention to the idea of poetry as evidence based which despite the absence of verifiable data nonetheless gives structure to ideas and experiences filtered through human cognition imagination and senses Grounded in theory arts based research and poetic inquiry and supplemented with practical class assignments pedagogical strategies and reflective items this volume will appeal to faculty scholars and postgraduate students working across research methods arts based research and practice and language and linguistics
